

# Ecclesiastical Latin

## EL-I.10: Passive Voice and Deponent Verbs

Distinguish true passives, deponents, participles, and forms of *fio*, while preserving subject, agency, and agreement

---

|              |                                                                                      |

## Part I

## Lesson

## CHAPTER 1

## Unit 10: The Passive Voice and Deponent Verbs

On completing this unit, you can:

- form and parse present-system passive verbs;
- construct and translate perfect-system passives;
- distinguish personal agent from means or instrument; and
- recognize common deponents as passive in form but active in meaning.

## 1.1 Present-system passive forms

In the **active voice**, the grammatical subject is presented as acting or being in a state rather than receiving an action; in the **passive voice**, the subject receives the action. The **agent** is the person or being that performs a passive action, whether or not the sentence expresses that agent. The present passive personal endings are *-r*, *-ris* (or *-re*), *-tur*, *-mur*, *-mini*, *-ntur*. The grammatical subject receives the action; an expressed agent is not required.

|       | 1st <i>laudor</i> | 2nd <i>moneor</i> | 3rd <i>regor</i> | 3rd- <i>io</i> <i>capior</i> | 4th <i>audior</i> |
|-------|-------------------|-------------------|------------------|------------------------------|-------------------|
| 1 sg. | laudor            | moneor            | regor            | capior                       | audior            |
| 2 sg. | laudaris          | moneris           | regeris          | caperis                      | audiris           |
| 3 sg. | laudatur          | monetur           | regitur          | capitur                      | auditur           |
| 1 pl. | laudamur          | monemur           | regimur          | capimur                      | audimur           |
| 2 pl. | laudamini         | monemini          | regimini         | capimini                     | audimini          |
| 3 pl. | laudentur         | monentur          | reguntur         | capiuntur                    | audiuntur         |

Imperfect passives replace the active endings with passive endings after the same tense sign: *laudabar*, *monebar*, *regebar*, *capiebar*, *audiebar*. First- and second-conjugation futures begin *laudabor*, *laudaberis*, *laudabitur* and *monebor*, *moneberis*, *monebitur*; third, third-*io*, and fourth begin *regar*, *regeris*, *regetur*; *capiar*, *capieris*, *capietur*; and *audiar*, *audieris*, *audietur*. Present passive infinitives are *laudari*, *moneri*, *regi*, *capi*, *audiri*; note the third-conjugation *-i*, not *-eri*.

## 1.2 Perfect-system passives

The fourth principal part supplies the **perfect passive participle**, a verbal adjective expressing action received and prior to the reference point. Combine it with a form of *sum*, making the participle agree with the subject: *laudatus sum*, “I, masculine, was or have been praised”; *laudata est*, “she was praised”; *laudati sunt*, “they, masculine or mixed, were praised”; and *laudata sunt*, “neuter things were praised”. Present forms of *sum* make the perfect passive, imperfect forms make the pluperfect passive, and future forms make the future perfect passive: *laudatus eram*, “I had been praised”; *laudatus ero*, “I shall have been praised”.

A personal agent normally takes *a/ab* plus ablative: *a Domino*, “by the Lord”. An impersonal means or instrument normally uses the ablative alone: *verbo sanatur*, “it is healed by a word”.

### 1.3 Deponents

**Deponent verbs** use passive morphology with active meaning. Their forms look passive, but their syntax and English meanings are active; they can, for example, govern the same kinds of objects as active verbs. Learn their principal parts in deponent form: *confiteor, confiteri, confessus sum*, “confess”; *sequor, sequi, secutus sum*, “follow”; *misereor, misereri, misertus sum*, “have mercy”. Thus *sequitur* means “he or she follows”, not “is followed”, and *confessus est* means “he confessed”, not “he was confessed”.

#### Worked example: *Ite, missa est*

Worked passage ID: W.I.41; exact source and collation state are recorded in the passage inventory.

*ite* is the irregular second-person plural imperative of *eo*, “go”. In this Late Latin formula, *missa* is a feminine singular noun meaning “dismissal”, serving as the subject or nominal assertion with *est*: “Go; it is the dismissal”. It is historically related to *mitto*, but a participial ellipsis should not be presented as the sole contextual parse.

#### Worked example: *Per quem omnia facta sunt*

Worked passage ID: W.I.42; exact source and collation state are recorded in the passage inventory.

*omnia* is neuter plural nominative. *facta sunt* is neuter plural perfect of *fio, fieri, factus sum*, “come to be, be made”, not a regular passive form of *facio*. Translation: “Through whom all things were made.”

#### Worked example: *Petite, et dabitur vobis* (Mt 7:7)

Worked passage ID: W.I.43; exact source and collation state are recorded in the passage inventory.

*dabitur* is third-person singular future passive indicative of *do*; its subject, “it”, is understood. *vobis* is dative plural recipient. Translation: “Ask, and it will be given to you.”

#### Worked example: *Confiteor Deo omnipotenti*

Worked passage ID: W.I.44; exact source and collation state are recorded in the passage inventory.

*confiteor* is first-person singular present deponent indicative and has active meaning. *Deo omnipotenti* is dative singular. Translation: “I confess to almighty God.”

#### Worked example: *Qui sequitur me, non ambulat in tenebris* (Jn 8:12)

Worked passage ID: W.I.45; exact source and collation state are recorded in the passage inventory.

*sequitur* is third-person singular present deponent; *me* is its object. *ambulat* is present active. Translation: “He who follows me does not walk in darkness.”

#### Worked example: *Misereatur vestri omnipotens Deus*

Worked passage ID: W.I.46; exact source and collation state are recorded in the passage inventory.

*misereatur* is third-person singular present deponent subjunctive, expressing a prayer; its meaning is active, “may he have mercy”. *vestri* is the genitive object found in this formula, and *omnipotens Deus* is the nominative subject. Translation: “May almighty God have mercy on you.”

## 1.4 Handwritten study and controlled composition

Copy the present passive table and change each form back to active without changing person or number. Write the imperfect and future passive of *laudo* and *rego*. Build a six-cell chart from masculine, feminine, and neuter subjects crossed with singular and plural perfect passive forms. For each deponent example, write “passive form, active meaning” in the margin. Compose “the word is heard”, *verbum auditur*; “the souls were guarded by the Lord”, *animæ a Domino custoditæ sunt*; and “we follow Christ”, *Christum sequimur*.

## Part II

# Practice

## CHAPTER 1

---

### Transfer, retrieval, and application

#### 1.1 Present-system passive forms — transfer practice

**Connection.** A true passive changes the relation between grammatical subject and action without erasing person, number, tense, or mood.

**Transfer task.** Take three active forms from the lesson's paradigm and convert them to passive while holding every other coordinate constant. For each resulting clause, mark grammatical subject and any expressed personal agent or means.

**Retrieval check.** State which coordinates stay fixed in an active-to-passive form conversion.

#### 1.2 Perfect-system passives — transfer practice

**Connection.** A perfect passive is a two-part agreement structure: participle plus finite *sum*.

**Transfer task.** Use the lesson model to build a grid varying subject gender and number while holding the tense constant, then vary the tense while holding one subject constant. Draw one agreement arrow and one tense arrow per form.

**Retrieval check.** Identify which component carries gender and which carries person and tense.

#### 1.3 Deponents — transfer practice

**Connection.** A deponent's dictionary entry resolves the mismatch between passive morphology and active lexical meaning.

**Transfer task.** From the lesson's deponent entries, make a card with present form, infinitive, perfect participial principal part, surface morphology, and active sense. Contrast one card with a true passive form of similar appearance.

**Retrieval check.** Explain why translating every *-tur* form as "is being" is unsafe.

#### 1.4 Handwritten study and controlled composition — transfer practice

**Connection.** A four-way tree makes the evidence order explicit before translation.

**Transfer task.** Classify the passive-looking forms in the lesson's final review as true finite passive, deponent finite verb, participle within a verbal group, or form of *fio*. For each, cite morphology, dictionary identity, and syntactic attachment.

**Retrieval check.** Recite the decision order without giving an English translation.

## Part III

## Worksheets

## CHAPTER 1

## Unit 10: Passive Voice and Deponents

## Worksheet I.37 — Variant A

Worksheet ID: I.37

**Focus:** Present-system passives, agency, and means**Use:** Keep grammatical subject distinct from personal agent.

1. Write all six present passive forms of *laudo* and *rego*.

- 
2. Convert without changing person, number, tense, or mood: *laudat, regimus, audiebant, capietis*.

- 
3. Give the present passive infinitives of *laudo*, *moneo*, *rego*, *cipio*, and *audio*; identify the special third-conjugation ending.

- 
4. Translate *a Domino laudatur* and *verbo sanatur*; distinguish agent from means.

- 
5. Correct *animæ custoditur a Domino* when plural souls are the subject.

- 
6. **Text:** *Petite, et dabitur vobis*.

*Passage ID: I.37.1; exact source and collation state are recorded in the passage inventory.*

Parse both verbs, identify the subject of the passive and the recipient, then translate.

**Worksheet I.40 — Variant D****Worksheet ID:** I.40**Focus:** True passives, deponents, participles, and *fio***Use:** Classify every passive-looking form before translating.

1. Classify and parse *laudatur, sequitur, facta sunt, benedictus est*, giving the contextual questions that remain.
- 

2. Give 3 singular present, imperfect, future, perfect, and pluperfect passive of *audio*.
- 

3. Convert *Deus laudat sanctos* to present passive and *Deus creavit mundum* to perfect passive.
- 

4. Translate “we follow the Lord”, “the words will be heard”, and “the souls had been guarded”.
- 

5. Diagnose *Omnia facti sunt per ipsum*.
- 

6. **Text:** *Ite, missa est*.

*Passage ID: I.40.1; exact source and collation state are recorded in the passage inventory.*

Parse the imperative and nominal assertion, state the conventional force of the fixed formula, and translate.

---

## Part IV

# Assessment

## CHAPTER 1

---

### Mastery assessment and record

**Advance when:** Convert at least 18 of 20 active/passive forms without changing their other coordinates, build eight agreeing perfect passives, and classify at least nine of ten contextual passive-looking verbs as true passive, deponent, or *fio*.

Complete the assessment before opening the answer part. Record evidence, not confidence or elapsed time.

| Evidence                        | First attempt | Delayed check |
|---------------------------------|---------------|---------------|
| Date and conditions             |               |               |
| Worksheet ID and score          |               |               |
| Mastery task and result         |               |               |
| One recurring error family      |               |               |
| Correction stated as a rule     |               |               |
| Unseen or remediation item used |               |               |

**If the criterion is met:** continue to EL-I.11, Pronouns and Prepositions.

**If it is not met:** Worksheets I.38 and I.39 remain optional remediation or delayed-recall variants.

**Advance / remediate decision:** \_\_\_\_\_ **Next review date:** \_\_\_\_\_

**Reason in one complete sentence:** \_\_\_\_\_

## Part V

# Answer Key

*Open this part only after completing the assessment record. Use the comparison and alternative-answer protocol in EL-GUIDE.*

---

## CHAPTER 1

### Practice models and rubrics

#### Present-system passive forms — model and rubric

**Model / acceptable evidence.** Person, number, tense, and mood remain fixed; voice changes. The former object may become grammatical subject in a clause transformation, while a personal agent is expressed with *a/ab* plus ablative and means ordinarily with the bare ablative.

#### Perfect-system passives — model and rubric

**Model / acceptable evidence.** The perfect passive participle agrees with the subject in gender and number; the finite form of *sum* carries person, number, tense contribution, and mood. Both components are required for the complete finite group.

#### Deponents — model and rubric

**Model / acceptable evidence.** Each deponent card must preserve passive-form principal parts while assigning the active lexical sense shown in the lesson. The retrieval answer must require dictionary identity and context because *-tur* can occur in true passives and deponents.

#### Handwritten study and controlled composition — model and rubric

**Model / acceptable evidence.** A complete tree first identifies whether the form is finite or participial, then checks its dictionary entry, verbal companions, subject agreement, and clause role. *fio* retains its own lexical identity. Translation follows classification rather than deciding it.

## CHAPTER 2

## Unit 10: Passive Voice and Deponents

## Solution I.37 — Variant A

Worksheet ID: I.37

Focus: Present-system passives, agency, and means

Use: Keep grammatical subject distinct from personal agent.

1. Write all six present passive forms of *laudo* and *rego*.  
**Answer / model:** *laudor, laudaris, laudatur, laudamur, laudamini, laudantur; regor, regeris, regitur, regimur, regimini, reguntur*.
2. Convert without changing person, number, tense, or mood: *laudat, regimus, audiebant, capietis*.  
**Answer / model:** *laudatur, regimur, audiebantur, capiimini*.
3. Give the present passive infinitives of *laudo*, *moneo*, *rego*, *cipio*, and *audio*; identify the special third-conjugation ending.  
**Answer / model:** *laudari, moneri, regi, capi, audiri*. Third and third-*io* use *-i*, not *-eri*.
4. Translate *a Domino laudatur* and *verbo sanatur*; distinguish agent from means.  
**Answer / model:** “He/she is praised by the Lord”: personal agent takes *a* plus ablative. “He/she is healed by a word”: impersonal means uses ablative alone.
5. Correct *animæ custoditur a Domino* when plural souls are the subject.  
**Answer / model:** *Animæ custodiuntur a Domino*. Plural nominative subject requires 3 plural passive *custodiuntur*.
6. **Text:** *Petite, et dabitur vobis*.  
*Passage ID: I.37.1; exact source and collation state are recorded in the passage inventory.*  
Parse both verbs, identify the subject of the passive and the recipient, then translate.  
**Answer / notes:** *petite*: 2 plural present active imperative; *dabitur*: 3 singular future passive indicative, with understood neuter subject “it”; *vobis*: dative plural recipient. “Ask, and it will be given to you.”

## Solution I.40 — Variant D

Worksheet ID: I.40

**Focus:** True passives, deponents, participles, and *fio*

**Use:** Classify every passive-looking form before translating.

- Classify and parse *laudatur*, *sequitur*, *facta sunt*, *benedictus est*, giving the contextual questions that remain.  
**Answer / model:** *laudatur*: 3 singular present true passive, “is praised”. *sequitur*: 3 singular present deponent, “follows”. *facta sunt*: neuter plural perfect of *fio*, “were made/came to be”. *benedictus est*: masculine singular perfect passive, “was/has been blessed”, or adjective plus *est*, “is blessed”, as context decides.
- Give 3 singular present, imperfect, future, perfect, and pluperfect passive of *audio*.  
**Answer / model:** *auditur*, *audiebatur*, *audietur*, *auditus/audita/auditum est*, *auditus/audita/auditum erat*; participle gender follows the subject.
- Convert *Deus laudat sanctos* to present passive and *Deus creavit mundum* to perfect passive.  
**Answer / model:** *Sancti a Deo laudantur*; *Mundus a Deo creatus est*.
- Translate “we follow the Lord”, “the words will be heard”, and “the souls had been guarded”.  
**Answer / model:** *Dominum sequimur*; *verba audientur*; *animæ custoditæ erant*.
- Diagnose *Omnia facti sunt per ipsum*.  
**Answer / model:** *Omnia facta sunt per ipsum*. Neuter plural subject *omnia* requires neuter plural *facta*.
- Text:** *Ite, missa est*.  
*Passage ID: I.40.1; exact source and collation state are recorded in the passage inventory.*  
 Parse the imperative and nominal assertion, state the conventional force of the fixed formula, and translate.  
**Answer / notes:** *ite*: irregular 2 plural present active imperative of *eo*, “go”. In this Late Latin formula, *missa* is a feminine singular noun meaning “dismissal”, serving as subject or nominal assertion with *est*: “Go; it is the dismissal”. It is historically related to *mitto*, but a participial ellipsis is not the sole contextual parse.

## Part VI

# Scope and Sources

## CHAPTER 1

### Scope and Qualifications

#### 1.1 Packet boundary

This is module EL-I.10, *Passive Voice and Deponent Verbs*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative lesson, transfer practice for its internal submodules, two selected worksheets, one local mastery assessment, and matching solutions. This packet teaches the ordinary classification tree; dictionary identity controls whether a verb is deponent, and *fio* is not reduced to a regular passive of *facio*.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. EL-GUIDE owns the course-wide study method, pacing, lookup discipline, answer protocol, source classes, and advancement rules; this packet assumes that orientation and terminology taught in prerequisite modules.

#### 1.2 Controlling records and local state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and transfer practice. EL-GUIDE owns the corpus, normalization, translation, non-authority, review, and answer conventions that apply here. Claim-local qualifications remain beside the affected material; check received wording against the course-wide passage inventory.

Any installed snapshot is a working study held from release until its exact bytes and outstanding distribution gates receive separate authorization.

## CHAPTER 2

### References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

#### 2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.

- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

## 2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

## 2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
