

Ecclesiastical Latin

EL-II.14: Word Order, Ellipsis, Attraction, and Liturgical Compression

Recover dependency networks in compressed liturgical periods, label supplies by evidentiary status, and produce lossless prose-order Latin

Stage	Stage II — Core Grammar
Prerequisite	EL-II.13 mastery: distinguish adverbial case uses through morphology, governor, and meaning
Next	EL-GATE-II, Core Grammar Assessment Sequence (C-A and delayed C-B); after passage, EL-III.1, The Independent Reader Workflow

Read *EL-GUIDE: Start Here* before using this packet. Course method, pacing, source conventions, and answer protocol are stated there; this module begins with its lesson and assumes previously taught terms.

Part I

Lesson

CHAPTER 1

Word order, ellipsis, attraction, and liturgical compression

On completing this unit, you can:

- reconstruct clause structure when related words are separated;
- supply only ellipses licensed by grammar and parallelism;
- recognize incorporated antecedents and mood/case attraction;
- unpack the address–ground–petition architecture of compressed liturgical prose.

1.1 Reading what endings connect

Word order is the sequence in which words appear; **syntax** is the network of grammatical relations among them. Latin can separate words that belong together, so changing the order need not change the syntax. Always use endings, agreement, and government to recover that network before relying on position.

Order and emphasis

Latin commonly places subject–object–verb, modifier near noun, and governing word after its dependents, but none is an inviolable rule. Initial and final positions carry emphasis; pronouns and particles often come early; verbs can be delayed to close a period. Hyperbaton separates agreeing words around material they frame: *sanctas . . . manus suas*. Chiasmus arranges ABBA; asyndeton omits conjunctions; anaphora repeats a word. Recover syntax from endings and government before rearranging into English.

Licensed ellipsis

Ellipsis is the omission of a word that grammar and context make recoverable. Latin readily omits a form of *sum*, a repeated verb, an antecedent recoverable from a relative, or a noun recoverable from an adjective/participle. Supply the smallest element that makes the attested syntax complete: *Sanctus Dominus* can imply *est*; *viventes Deo* can share prior *esse*. Do not insert an agent, causal relation, or theological interpretation that the grammar leaves open.

Attraction and incorporation

Attraction is the adjustment of a form or mood under the influence of a nearby construction rather than its simplest independent syntax. A relative's normal case comes from its own clause, but Latin sometimes attracts it into the case of its antecedent, especially when the antecedent itself is omitted or incorporated: *in qua mensura*, "in the measure in which." A relative or subordinate clause inside subjunctive discourse may itself take subjunctive by **modal attraction**, especially when it belongs to the thought rather than the narrator's assertion. Attraction is a diagnosis after ordinary agreement and government fail, not a shortcut around parsing.

The compressed collect and Canon period

Use this recovery order:

1. circle every finite verb and conjunction;
2. locate vocative address and nominative subject;
3. attach each accusative/dative to a governing verb;
4. match separated adjectives, participles, and relatives by endings;
5. bracket subordinate clauses from marker to finite verb;
6. supply parallel ellipses, then make a literal prose-order version;
7. only then produce readable English.

Liturgical prose often has one finite petition supporting many vocatives, appositions, participles, genitives, and prepositional phrases. Punctuation is a guide, not a substitute for these steps.

1.2 Reading the forms in context

Worked example: fronting and delayed government in the Canon

Worked passage ID: W.II.59; exact source and collation state are recorded in the passage inventory.

Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.

Analysis. Accusative *te* is fronted far before its governing *rogamus ac petimus*. Vocative *Pater* is expanded by *clementissime*; *Filium* and *Dominum* are appositions to *Iesum Christum*. Nominative *supplices* describes the implicit subject *nos*.

Translation. “Therefore, most merciful Father, through Jesus Christ your Son our Lord, we humbly ask and petition you.”

Worked example: an adjective chain and final verb in the Canon

Worked passage ID: W.II.60; exact source and collation state are recorded in the passage inventory.

Quam oblationem tu, Deus, in omnibus, quæsumus, benedictam, adscriptam, ratam, rationabilem, acceptabilemque facere digneris.

Analysis. Accusative *quam oblationem* is the object of *facere*; five accusative feminine adjectives are its object complements. Deponent *digneris* governs *facere* and comes last; parenthetic *quæsumus* carries the plea. Enclitic *-que* joins the final adjective to the series.

Translation. “Be pleased, O God, we ask, to make this offering blessed in every respect, enrolled, ratified, rational/reasonable, and acceptable.” The conventional liturgical rendering “spiritual” is theological and idiomatic rather than the closest lexical gloss.

Worked example: ellipsis and acclamation in the Sanctus

Worked passage ID: W.II.61; exact source and collation state are recorded in the passage inventory.

Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth. Pleni sunt cæli et terra gloria tua.

Analysis. The triple nominative adjectives form a verbless acclamation. Analytic English may supply [*est*], but Latin does not require a predicate-nominative parse: the adjectives are predicative or acclamatory modifiers of *Dominus Deus*. In the next sentence, *pleni* agrees with *cæli et terra*, and ablative *gloria tua* expresses fullness.

Translation. “Holy, holy, holy is the Lord God of hosts. Heaven and earth are full of your glory.”

Worked example: incorporated antecedent (Matthew 7:2)

Worked passage ID: W.II.62; exact source and collation state are recorded in the passage inventory.

In quo enim iudicio iudicaveritis, iudicabimini; et in qua mensura mensi fueritis, remetietur vobis.

Analysis. *Quo iudicio* and *qua mensura* incorporate the standards into their relative clauses: “with the judgment with which,” “in the measure in which.” Future perfect *iudicaveritis* and *mensi fueritis* precede the main futures. *iudicabimini* is second-person plural future passive of *iudico*; *remetietur* is formally third-person singular future indicative of deponent *remetior*, *remetiri*, *remensus sum*, exceptionally used with passive sense here, “will be measured back”.

Translation. “For with the judgment with which you judge, you will be judged; and in the measure in which you have measured, it will be measured back to you.”

Worked example: nested compression in the Canon

Worked passage ID: W.II.63; exact source and collation state are recorded in the passage inventory.

Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias.

Analysis. Fronted *hanc oblationem* is the object of *accipias*; its two genitives identify those whose offering it is. Parenthetical *quæsumus* introduces the substantive *ut*-request. Predicate participle *placatus* agrees with the implicit subject *tu*: “being appeased/gracious.”

Translation. “Therefore we ask you, Lord, graciously to accept this offering of our service and also of your whole household.”

1.3 Writing laboratory

Copy the *Quam oblationem* sentence on alternate lines. Connect every adjective to *oblationem*, draw an arrow from *facere* to the object, and another from *digneris* to *facere*. Beneath it write a prose-order Latin version, retaining every word.

Do the same with a collect chosen at random: (1) diplomatic copy, (2) marked syntax, (3) prose-order Latin, (4) close English, (5) idiomatic English. Then compress the composed sentence *Rogamus te, Pater clementissime, ut dona quæ offerimus benedicas* by fronting *te*, inserting *supplices*, and delaying the two governing verbs.

Part II

Practice

CHAPTER 1

Transfer, retrieval, and application

1.1 Reading what endings connect — transfer practice

Connection. G/P/I labels separate grammatical necessity, strict parallel recovery, and interpretive help before a supply enters reconstruction.

Transfer task. Apply G, P, or I to every omitted element proposed in the lesson's ellipsis examples. For each G or P, cite the ending, government, or strict parallel that licenses it; keep every I outside the reconstructed Latin.

Retrieval check. Define G, P, and I and state which labels may enter a clause reconstruction.

1.2 Reading the forms in context — transfer practice

Connection. A period diagram holds distant dependencies without mistaking punctuation or proximity for syntax.

Transfer task. Choose one worked period already printed in the lesson. Place finite governors on the center line, attach subjects and complements, branch subordinate clauses from their governors, and put address/apposition material in separate frames. Number the printed order around the diagram.

Retrieval check. Explain how the diagram can preserve emphasis even after a prose-order line is written.

1.3 Writing laboratory — transfer practice

Connection. A five-version record prevents prose-order reconstruction and idiomatic translation from silently changing the source.

Transfer task. Complete the lesson sequence: diplomatic copy, marked syntax, prose-order Latin, close English, and idiomatic English. Add a period diagram and a G/P/I ledger between marked syntax and prose order.

Retrieval check. State the invariant that all five versions must preserve.

Part III

Worksheets

CHAPTER 1

Word order and liturgical compression: parallel forms

Worksheet II.53 — Compression A

Worksheet ID: II.53

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture

Use: First circle finite verbs; then reconnect words by endings.

1. Put in prose order: *Te, Pater, supplices rogamus.*

-
2. Reconnect *sanctas in manus suas accepit.*
-

3. Analyze the nominal acclamation *Sanctus, Sanctus, Sanctus Dominus*; state whether *[est]* is a possible expansion.
-

4. Unpack *in qua mensura mensi fueritis*.
-

5. **Text:** *Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.*

Passage ID: II.53.1; exact source and collation state are recorded in the passage inventory.

Mark object, address, apposition, subject description, and verbs.

6. Compress *Nos supplices te rogamus, Pater clementissime, ut dona benedicas*.
-

Worksheet II.56 — Compression D

Worksheet ID: II.56

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture

Use: First circle finite verbs; then reconnect words by endings.

1. Unpack the genitives in *oblationem servitutis nostræ et cunctæ familiæ tuæ*.

-
2. Explain *placatus* in *ut placatus accipias*.

-
3. Identify anaphora and asyndeton: *hæc dona, hæc munera, hæc sancta sacrificia illibata*.

-
4. Reconstruct *in quo iudicio iudicaveritis, iudicabimini*.

-
5. **Text:** *Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias.*

Passage ID: II.56.1; exact source and collation state are recorded in the passage inventory.

Mark the one main requested action and translate.

-
6. Produce five stages for any unseen two-line collect: copy, marked syntax, prose-order Latin, close English, idiomatic English.
-

Cumulative retention forms

Use one unused worksheet from every unit after a delay of at least several study sessions. Then select an unseen collect and lesson paragraph. Score morphology, clause classification, and translation separately. The Volume II gate in the teaching volume governs advancement; these worksheets diagnose the precise family to revisit.

Part IV

Assessment

CHAPTER 1

Mastery assessment and record

Advance when: Within twenty minutes, attach at least 90 percent of the words in an unseen eight-line period, produce complete prose-order Latin without additions or omissions, and defend every supply or attraction from a specific ending, construction, or strict parallel.

Stage edge. Do not enter Stage III until the local compression standard is met and the separate EL-GATE-II sequence is passed. A construction family below 80 percent requires a fresh parallel pair and retest.

Complete the assessment before opening the answer part. Record evidence, not confidence or elapsed time.

Evidence	First attempt	Delayed check
Date and conditions		
Worksheet ID and score		
Mastery task and result		
One recurring error family		
Correction stated as a rule		
Unseen or remediation item used		

If the criterion is met: continue to EL-GATE-II, Core Grammar Assessment Sequence (C-A and delayed C-B); after passage, EL-III.1, The Independent Reader Workflow.

If it is not met: Worksheets II.54 and II.55 remain optional remediation or delayed-recall variants.

Advance / remediate decision: _____ **Next review date:** _____

Reason in one complete sentence: _____

Part V

Answer Key

Open this part only after completing the assessment record. Use the comparison and alternative-answer protocol in EL-GUIDE.

CHAPTER 1

Practice models and rubrics

Reading what endings connect — model and rubric

Model / acceptable evidence. G is grammatically required, such as an implicit subject contained in a finite verb; P is recoverable from a strict parallel member; I is interpretive help. Only justified G and P supplies enter reconstruction, and no label licenses an invented agent, cause, or theological proposition.

Reading the forms in context — model and rubric

Model / acceptable evidence. Every printed word must appear exactly once in the diagram and attach by morphology or government. The numbered original positions preserve fronting and delay as rhetorical facts; the prose-order line exposes dependencies without pretending the original order was accidental.

Writing laboratory — model and rubric

Model / acceptable evidence. All printed words, grammatical relations, negation, agency, time, and propositional content must remain accounted for. Supplies require G/P/I labels; prose order may rearrange but not rewrite; idiomatic English may smooth expression but not reverse or omit a relation.

CHAPTER 2

Word order and liturgical compression: parallel forms

Solution II.53 — Compression A

Worksheet ID: II.53

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture**Use:** First circle finite verbs; then reconnect words by endings.

1. Put in prose order: *Te, Pater, supplices rogamus.*

Answer / model: *Supplices te rogamus, Pater.* *Te* remains object; *supplices* remains nominative with implicit *nos*.

2. Reconnect *sanctas in manus suas accepit.*

Answer / model: *sanctas* and *suas* both modify accusative plural *manus*; *in manus* marks motion into the hands.

3. Analyze the nominal acclamation *Sanctus, Sanctus, Sanctus Dominus*; state whether *[est]* is a possible expansion.

Answer / model: The triple nominative adjectives are predicative or acclamatory with *Dominus*. A pedagogical expansion may use *[est]*, but the Latin is a verbless nominal acclamation and does not uniquely require an omitted copula.

4. Unpack *in qua mensura mensi fueritis.*

Answer / model: “In the measure in which you have measured.” *Qua mensura* is an incorporated antecedent/relative phrase, ablative.

5. **Text:** *Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.*

Passage ID: II.53.1; exact source and collation state are recorded in the passage inventory.

Mark object, address, apposition, subject description, and verbs.

Answer / notes: *Te*: fronted object; *Pater*: vocative; *Filium/Dominum*: apposition to *Iesum Christum*; *supplices*: implicit *nos*; *rogamus/petimus*: governing verbs. “Therefore, most merciful Father, through Jesus Christ your Son our Lord, we humbly ask and petition you.”

6. Compress *Nos supplices te rogamus, Pater clementissime, ut dona benedicas.*

Answer / model: Model: *Te, clementissime Pater, nos supplices rogamus ut dona benedicas.* Fronting preserves every supplied word and role; Latin may omit *nos*, but the exercise asks to retain it.

Solution II.56 — Compression D

Worksheet ID: II.56

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture

Use: First circle finite verbs; then reconnect words by endings.

1. Unpack the genitives in *oblationem servitutis nostræ et cunctæ familiæ tuæ*.

Answer / model: Both *servitutis nostræ* and *cunctæ familiæ tuæ* depend on *oblationem*: “the offering of our service and of your whole household.”

2. Explain *placatus* in *ut placatus accipias*.

Answer / model: Nominative masculine singular perfect passive participle used predicatively with implicit *tu*: “being appeased/graciously, may you accept.”

3. Identify anaphora and asyndeton: *hæc dona, hæc munera, hæc sancta sacrificia illibata*.

Answer / model: Repeated *hæc* is anaphora; absence of conjunctions between the three appositional objects is asyndeton.

4. Reconstruct *in quo iudicio iudicaveritis, iudicabimini*.

Answer / model: “With the judgment with which you have judged, you will be judged.” *quo iudicio* incorporates antecedent and relative standard; future perfect precedes future passive.

5. **Text:** *Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias*.

Passage ID: II.56.1; exact source and collation state are recorded in the passage inventory.

Mark the one main requested action and translate.

Answer / notes: *Quæsumus* introduces substantive *ut placatus accipias*; fronted *hanc oblationem* is object. “Therefore we ask you, Lord, graciously to accept this offering of our service and also of your whole household.”

6. Produce five stages for any unseen two-line collect: copy, marked syntax, prose-order Latin, close English, idiomatic English.

Answer / model: Model method: preserve every attested word; identify address–relative ground–petition–content; move only after parsing; make close English preserve grammar; then smooth idiom without changing agency, time, or negation.

Part VI

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-II.14, *Word Order, Ellipsis, Attraction, and Liturgical Compression*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative lesson, transfer practice for its internal submodules, two selected worksheets, one local mastery assessment, and matching solutions. This Stage II capstone teaches grammatical recovery of compressed prose; rhetorical or theological interpretation remains subordinate to the attested wording and syntax.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. EL-GUIDE owns the course-wide study method, pacing, lookup discipline, answer protocol, source classes, and advancement rules; this packet assumes that orientation and terminology taught in prerequisite modules.

1.2 Controlling records and local state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and transfer practice. EL-GUIDE owns the corpus, normalization, translation, non-authority, review, and answer conventions that apply here. Claim-local qualifications remain beside the affected material; check received wording against the course-wide passage inventory.

Any installed snapshot is a working study held from release until its exact bytes and outstanding distribution gates receive separate authorization.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.

- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
