

Ecclesiastical Latin

EL-III.12: Full-Mass Capstone

Sustain the independent-reader protocol across one complete formulary and prepare a separately delayed transfer to a different category

Stage	Stage III — Independent Missal Reading
Prerequisite	EL-III.11 and mastery evidence from every preceding Stage III genre module
Next	EL-GATE-III; after passing it, EL-A1

Read *EL-GUIDE: Start Here* before using this packet. Course method, pacing, source conventions, and answer protocol are stated there; this module begins with its lesson and assumes previously taught terms.

Part I

Lesson

CHAPTER 1

Full-Mass Unseen Capstones

On completing this unit, you can:

- execute a complete formulary reading without leaning on remembered English;
- keep a disciplined lookup and error ledger;
- demonstrate direct comprehension through Latin answers and grammatical evidence;
- decide honestly whether to advance, remediate a genre, or repeat a gate.

The capstone is not a race and not a performance of vague spiritual familiarity. It is an audit trail. Use a clean copy of the *Missale Romanum* (1962), blank paper, a Latin dictionary, and no parallel translation. A grammar may be consulted only after the timed first pass and must be logged like a dictionary lookup.

A **capstone** is an integrative assessment requiring earlier skills to operate together on a substantial new task. An **audit trail** is the written record that makes the process checkable: marks, proposed parses, lookups, revisions, and classified errors. **Direct comprehension** means that the learner can follow agents, actions, relations, and discourse movement from the Latin itself. A **literal sense** is a restrained account that preserves those grammatical relations; it need not mimic Latin word order or replace each Latin word mechanically with one English word.

1.1 The complete-Mass protocol

1. **Inventory, 5 minutes.** List the formulary and every genre it contains. Identify directions to a Common or another Mass.
2. **Cold read.** Read all Proper texts once without a lookup. Mark finite verbs, clause boundaries, speakers, and only the most likely heads.
3. **Analytical read.** Complete dependencies, prose-order lines for compressed passages, and the ellipsis ledger. Add the fixed Ordo and Canon by random-entry prompts rather than reciting from the beginning.
4. **Controlled lookup.** Look up only marked content words after proposing lemma, morphology, and function. Record every lookup.
5. **Direct-comprehension proof.** Answer twelve questions in simple Latin: agents, actions, recipients, causes, purposes, contrasts, and temporal sequence. Then give a restrained literal written sense.
6. **Audit.** Check against the analytical key or a competent reader. Classify every error as form, construction, vocabulary, reference, ellipsis, or unsupported inference.

For that classification, a **form error** misidentifies or produces morphology; a **construction error** misstates a syntactic dependency; a **vocabulary error** selects the wrong contextual sense; a **reference error** assigns a pronoun or modifier to the wrong referent; an **ellipsis error** supplies or omits wording without grammatical warrant; and an **unsupported inference** asserts more than the textual evidence permits.

1.2 Dictionary thresholds

The target is not zero dictionary use. Mature readers use dictionaries to distinguish senses. The target is no dictionary dependence for grammatical structure. Permit ten new content-word lookups per five hundred words on the first local capstone and five on the delayed second capstone. A repeated lookup of a word

already in the ledger counts twice. Proper names do not count, but failing to identify their case does. The separate terminal transfer gate sets its own aid conditions.

1.3 Evidence domains

A complete-formulary record separates five kinds of evidence: morphology; clause structure; reference and licensed ellipsis; direct comprehension; and dictionary discipline. Each domain protects against a distinct failure. A smooth translation cannot compensate for a broken clause map, and a low lookup count cannot compensate for guessed morphology.

Record each domain separately during practice. Exact sampling floors and the two selected capstone assignments belong to the post-worksheet assessment, where a failed domain directs remediation rather than disappearing into an average. Familiar teaching material may diagnose a skill, but it cannot prove the unfamiliar transfer required by the separate EL-GATE-III publication.

Part II

Practice

CHAPTER 1

Transfer, retrieval, and application

1.1 The complete-Mass protocol — transfer practice

Connection. A complete read is a sequence of auditable decisions, not a long translation assignment.

Transfer task. Before Worksheet III.45, make a one-page process record with genre inventory, cold-map checkpoint, lookup release, direct-summary checkpoint, and final audit.

Retrieval check. State the evidence required before the lookup checkpoint opens.

1.2 Dictionary thresholds — transfer practice

Connection. A lookup ceiling measures morphological independence only when repeated and false lookups remain visible.

Transfer task. For ten sample entries from the completed capstone, mark known, inferred, justified new lookup, avoidable lookup, or repeated ledger failure.

Retrieval check. Compute the content-word rate using the packet's stated denominator.

1.3 Assigned capstones — transfer practice

Connection. A second formulary tests transfer only when category, heading, and prior exposure are documented.

Transfer task. Complete the assignment block for temporal Worksheet III.45 now and for Common Worksheet III.47 only after delay: exact heading, category, source trail, prior exposure, and assessor choice.

Retrieval check. Give one reason a familiar teaching Mass cannot serve as blind transfer.

1.4 Worksheet-specific mastery decision — transfer practice

Connection. The temporal and Common worksheets ask for different evidence, so each form must be judged by its own printed tasks and thresholds.

Transfer task. Prepare separate decision checklists for III.45 and delayed III.47. Copy every requested task and numeric floor from its worksheet; after completing the form, mark each requirement met or not met and prescribe one exact remediation action for every failure.

Retrieval check. State the form-sample and lookup limits for both worksheets and explain why passing III.45 cannot certify III.47 or EL-GATE-III.

Part III

Worksheets

CHAPTER 1

Unit III.12: Full-Mass Unseen Capstones

Worksheet III.45 — Variant A

Worksheet ID: III.45

Focus: Temporal capstone: Dominica XII post Pentecosten

Use: Use a clean 1962 Missal; no facing translation.

1. Inventory every text and direction in the formulary.

2. Cold-read all Propers; submit a clause map and lookup marks before opening a dictionary.

3. Analyze the Collect beginning *Omnipotens et misericors Deus*; identify the subject/content of *venit*.

4. Write an argument map for 2 Cor. 3:4–9 with at least six logical steps.

5. Answer six agent/action questions about Lc. 10:23–37 in simple Latin.

6. Audit forty sampled forms and your dictionary ledger.

Worksheet III.47 — Variant C**Worksheet ID:** III.47**Focus:** Common capstone: one martyr non-pontiff**Use:** Assessor chooses a feast not used above.

1. Identify exactly which texts are Proper and which are taken from *Commune unius Martyris non Pontificis*.

-
2. Write the saint's nominative and genitive and expand every N. in context.

-
3. Cold-read the complete formulary and classify vocabulary by witness, combat, reward, protection, and intercession.

-
4. Give prose-order reconstructions for the Collect, Secret, Postcommunion, and one chant verse.

-
5. Write ten Latin comprehension answers about agent, petition, reason, promised effect, and Gospel command.

-
6. Perform the forty-form and lookup audit.
-

Part IV

Assessment

CHAPTER 1

Mastery assessment and record

Worksheet III.45, temporal core. Complete the formulary inventory and pre-lookup cold map; identify the Collect's subject/content; cite six or more steps in the Epistle's argument; answer all six Gospel agent/action questions in accurate simple Latin; and score at least 36 of 40 sampled forms/functions, with at most ten new content-word lookups per five hundred words. Propose a lemma, form, and function before each lookup.

Worksheet III.47, delayed Common. Document the Proper/Common trail and every supplied name form; classify only printed vocabulary; give lossless prose-order reconstructions of the three orations and a chant verse; answer at least 9 of 10 questions with at least 85 percent of the Latin clauses grammatically defensible; score at least 36 of 40 sampled forms with at most five new content-word lookups per five hundred words; and count a repeated ledger word twice.

Advance when: Pass every criterion above for both worksheets, with III.47 delayed; no score compensates for another failed requirement. This packet does not replace EL-GATE-III.

Required delay. Administer Worksheet III.47 later, not in the same two-session sitting. Course exit still requires EL-GATE-III and its two unfamiliar M-C Masses.

Complete the assessment before opening the answer part. Record evidence, not confidence or elapsed time.

Evidence	First attempt	Delayed check
Date and conditions		
Worksheet ID and score		
Mastery task and result		
One recurring error family		
Correction stated as a rule		
Unseen or remediation item used		

If the criterion is met: continue to EL-GATE-III; after passing it, EL-A1.

If it is not met: Use III.46 and III.48 for optional second-temporal and Requiem remediation.

Advance / remediate decision: _____ **Next review date:** _____

Reason in one complete sentence: _____

Part V

Answer Key

Open this part only after completing the assessment record. Use the comparison and alternative-answer protocol in EL-GUIDE.

CHAPTER 1

Practice models and rubrics

The complete-Mass protocol — model and rubric

Model / acceptable evidence. The model requires every finite frame, participant or antecedent uncertainty, and proposed lemma to be written before lookup. Missing one genre returns the learner to the inventory.

Dictionary thresholds — model and rubric

Model / acceptable evidence. The audit counts only new content words as permitted lookups, but records avoidable and repeated failures separately. A rate without the word-count denominator or contemporaneous ledger is not accepted.

Assigned capstones — model and rubric

Model / acceptable evidence. A valid record identifies the physical Missal heading and honestly discloses exposure. Reused teaching material may diagnose fluency but cannot prove unfamiliar transfer.

Worksheet-specific mastery decision — model and rubric

Model / acceptable evidence. III.45 requires its inventory, cold map, Collect analysis, six-step argument map, six Gospel answers, at least 36/40 sampled forms/functions, and no more than ten new lookups per five hundred words. III.47 requires its assignment trail, supplied forms, evidence-bounded vocabulary, four reconstructions, at least 9/10 comprehension answers with 85 percent grammatically defensible clauses, at least 36/40 sampled forms, and no more than five new lookups per five hundred words. A failed requirement directs remediation and a fresh attempt; neither worksheet replaces EL-GATE-III.

CHAPTER 2

Unit III.12: Full-Mass Unseen Capstones

Solution III.45 — Variant A

Worksheet ID: III.45

Focus: Temporal capstone: Dominica XII post Pentecosten**Use:** Use a clean 1962 Missal; no facing translation.

1. Inventory every text and direction in the formulary.
Answer / model: Key should list Introit, Collect, Epistle 2 Cor. 3:4–9, Gradual/Alleluia, Gospel Lc. 10:23–37, Offertory, Secret, Communion, Postcommunion, and applicable Ordinary/seasonal directions. Record actual page/rubric evidence.
2. Cold-read all Propers; submit a clause map and lookup marks before opening a dictionary.
Answer / model: Model key checks that every finite verb is underlined, connectors circled, speech bounded, and proposed heads marked. No meanings need be polished; any pre-lookup erasure must remain visible.
3. Analyze the Collect beginning *Omnipotens et misericors Deus*; identify the subject/content of *venit*.
Answer / model: The substantive *ut tibi a fidelibus tuis digne et laudabiliter serviatur* is what comes *de cuius munere*; the second *ut* gives the petition's desired result.
4. Write an argument map for 2 Cor. 3:4–9 with at least six logical steps.
Answer / model: A correct model includes confidence through Christ, denial of self-sufficiency, sufficiency from God, ministry of the new covenant, letter/Spirit contrast, death ministry's glory, and the greater glory of the Spirit's ministry. Exact wording may vary; each step must cite Latin markers.
5. Answer six agent/action questions about Lc. 10:23–37 in simple Latin.
Answer / model: Model content: disciples are blessed; a lawyer questions Jesus; a man descends and is wounded; priest and Levite pass; Samaritan has mercy and cares for him; Jesus commands similar action. Grammar need not imitate Vulgate complexity but must preserve agents and sequence.
6. Audit forty sampled forms and your dictionary ledger.
Answer / model: Pass: at least 36/40 morphology/function; no more than ten new content-word lookups per five hundred words; each lookup shows proposed lemma, form, and function.

Solution III.47 — Variant C

Worksheet ID: III.47

Focus: Common capstone: one martyr non-pontiff

Use: Assessor chooses a feast not used above.

1. Identify exactly which texts are Proper and which are taken from *Commune unius Martyris non Pontificis*.
Answer / model: Key must cite headings and directions in the chosen 1962 Missal. “I recognize this text” earns no credit without the assignment trail.
2. Write the saint’s nominative and genitive and expand every N. in context.
Answer / model: All inserted forms must match their syntactic case. Also audit titles *Martyris/Confessoris* and pronouns; capitalization alone is not evidence.
3. Cold-read the complete formulary and classify vocabulary by witness, combat, reward, protection, and intercession.
Answer / model: Model accepts only lexemes actually present. Each entry must include lemma, form in passage, and construction; no prefilled thematic word may be claimed absent evidence.
4. Give prose-order reconstructions for the Collect, Secret, Postcommunion, and one chant verse.
Answer / model: Each reconstruction must retain every printed word, bracket every supply, attach relatives correctly, and name the rhetorical effect of one displaced element.
5. Write ten Latin comprehension answers about agent, petition, reason, promised effect, and Gospel command.
Answer / model: Pass: at least 9/10 preserve core content and at least 85% of clauses are grammatically defensible; simple Latin is preferred to copied Missal clauses without adaptation.
6. Perform the forty-form and lookup audit.
Answer / model: At least 36/40; ceiling five new content-word lookups per five hundred by the final attempt. A repeated ledger word counts twice.

Part VI

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-III.12, *Full-Mass Capstone*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative lesson, transfer practice for its internal submodules, two selected worksheets, one local mastery assessment, and matching solutions. The printed core is one temporal capstone; the Common worksheet is deliberately delayed. EL-GATE-III, specifically M-C, remains the controlling unfamiliar two-Mass exit gate.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. EL-GUIDE owns the course-wide study method, pacing, lookup discipline, answer protocol, source classes, and advancement rules; this packet assumes that orientation and terminology taught in prerequisite modules.

1.2 Controlling records and local state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and transfer practice. EL-GUIDE owns the corpus, normalization, translation, non-authority, review, and answer conventions that apply here. Claim-local qualifications remain beside the affected material; check received wording against the course-wide passage inventory.

Any installed snapshot is a working study held from release until its exact bytes and outstanding distribution gates receive separate authorization.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.

- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
