

Ecclesiastical Latin

EL-I.7: *Sum* and *Possum*

Recognize the six indicative tenses of *sum*, use *possum* with its infinitive, and distinguish predicate complements from objects

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-I.7
Course stage	Stage I — Foundations
Prerequisites	EL-I.6 mastery: trace noun–adjective agreement and classify adjective use
Observable outcome	Recognize the six indicative tenses of <i>sum</i> , use <i>possum</i> with its infinitive, and distinguish predicate complements from objects
Printed practice	Worksheets I.26 (Variant B) and I.27 (Variant C), with terminal keys
Extension bank	Worksheets I.25 and I.28 remain optional remediation or delayed-recall variants
Next dependency	EL-I.8, The Present Active System

1.1 Two focused sessions

Session 1 — guided acquisition. Triage copula, predicate, and complement structures across the full indicative of *sum*, then complete Worksheet I.26 as the guided all-tense application.

Session 2 — transfer and gate. Retrieve *possum* and its complementary-infinitive pattern, complete Worksheet I.27 independently, and pass the enrichment exit ticket without assigning accusative case to a predicate complement.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Write at least 34 of 36 displayed *sum* forms correctly, parse at least 18 of 20 *sum/possum* forms, and analyze five linking or ability clauses without confusing predicate, object, or infinitive complement.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- the present, imperfect, future, perfect, pluperfect, and future-perfect indicative of *sum*;
- nominative predicate nouns and adjectives after a copula;
- ordinary indicative forms and perfect stems of *possum*; and
- complementary infinitives and visibly bracketed supplied copulas.

2.2 High-risk contrast

Sum links a subject to a nominative predicate complement; it does not transfer action to an accusative object. *Possum* normally requires an infinitive that completes its meaning, not a predicate nominative.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Unit 7: *Sum* and *Possum*

On completing this unit, you can:

- recognize all indicative forms of *sum* in the present and perfect systems;
- conjugate the corresponding systems of *possum*;
- identify predicate nouns and adjectives; and
- restore a clearly implied form of *sum* in a liturgical clause.

1.1 The indicative of *sum*

The **indicative mood** normally presents an action or state as asserted or asked about, rather than commanded, wished, or treated as contingent. *Sum*, “be”, is a **linking verb** or **copula**: it joins a subject to a predicate complement rather than transferring action to a direct object.

A verb’s **present system** comprises present, imperfect, and future; its **perfect system** comprises perfect, pluperfect, and future perfect. The present and perfect systems use different stems in ordinary verbs. The **subjunctive mood**, previewed here in prayer formulas, can present an action as wished, commanded, possible, or dependent rather than simply asserted; Volume II teaches its complete formation and uses.

	1 sg.	2 sg.	3 sg.	1 pl.	2 pl.	3 pl.
Present	sum	es	est	sumus	estis	sunt
Imperfect	eram	eras	erat	eramus	eratis	erant
Future	ero	eris	erit	erimus	eritis	erunt
Perfect	fui	fuisti	fuit	fuimus	fuistis	fuerunt
Pluperfect	fuera	fueras	fuera	fueramus	fueratis	fuerant
Future perfect	fuiro	fueris	fuerit	fuerimus	fueritis	fuerint

The present infinitive is *esse*, the perfect infinitive *fuisse*, and the imperatives are *es* and *este*. *Sum* links a subject to a nominative predicate noun or adjective; it does not take an accusative object. In prayers, present subjunctives *sit*, “may it be”, and *sint*, “may they be”, often express a wish. For now, recognize those two forms without attempting a complete subjunctive system.

1.2 The compound *possum*

	1 sg.	2 sg.	3 sg.	1 pl.	2 pl.	3 pl.
Present	possum	potes	potest	possumus	potestis	possunt
Imperfect	poteram	poteras	poterat	poteramus	poteratis	poterant
Future	potero	poteris	poterit	poterimus	poteritis	poterunt
Perfect	potui	potuisti	potuit	potuimus	potuistis	potuerunt

Complete the remaining perfect tenses regularly from *potu-*: *potueram*, *potueras*, . . . and *potuero*, *potueris*, The present infinitive is *posse*; the perfect infinitive is *potuisse*. *Possum* normally takes a **complementary infinitive**, an infinitive that completes the meaning of another verb: *possum videre*, “I am able to

see”.

Worked example: *Dignum et iustum est*

Worked passage ID: W.I.25; exact source and collation state are recorded in the passage inventory.

est is third-person singular present. Neuter predicate adjectives *dignum* and *iustum* refer to the action just proposed: “It is fitting and just.”

Worked example: *Non sum dignus ut intres sub tectum meum*

Worked passage ID: W.I.26; exact source and collation state are recorded in the passage inventory.

sum is first-person singular present; predicate *dignus* is masculine singular nominative because the traditional speaker is grammatically masculine. *intres* is second-person singular present active subjunctive in an *ut*-clause completing predicate adjective *dignus*; full subjunctive formation belongs to a later volume. Translation: “I am not worthy that you should enter under my roof.”

Worked example: *Pleni sunt caeli et terra gloria tua*

Worked passage ID: W.I.27; exact source and collation state are recorded in the passage inventory.

sunt is third-person plural present because its compound subject is plural. Predicate *pleni* remains nominative. Translation: “Heaven and earth are full of your glory.”

Worked example: *Ego sum via, et veritas, et vita (Jn 14:6)*

Worked passage ID: W.I.28; exact source and collation state are recorded in the passage inventory.

ego is the nominative subject. The three predicate nouns are also nominative, not accusative. Translation: “I am the way, and the truth, and the life.”

Worked example: *Sine me nihil potestis facere (Jn 15:5)*

Worked passage ID: W.I.29; exact source and collation state are recorded in the passage inventory.

potestis is second-person plural present and takes complementary infinitive *facere*. *nihil* is the accusative object of *facere*: “Without me you can do nothing.”

In *Dominus vobiscum*, a blessing, understand *sit*: “The Lord be with you”. Liturgical Latin often omits a form that the setting makes obvious; bracket the supplied word in a close analysis instead of pretending it is printed.

1.3 Handwritten study and controlled composition

Write the six tenses of *sum* from memory, then cover the table and reproduce each person-column by tense rather than each row by tense. Derive four tenses of *possum* by hand and underline its infinitive complement in five self-written clauses. Change *sum dignus* through all six persons; change it to imperfect and future. Compose “we were ready”, *parati eramus*; “they will be holy”, *sancti erunt*; and “you (plural) can praise God”, *potestis Deum laudare*.

Advance when: Write all 36 displayed forms of *sum* with at least 34 correct; identify person, number, tense, and mood for 18 of 20 forms of *sum* or *possum*; and translate five linking clauses without assigning an accusative to a predicate noun or adjective.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 The indicative of *sum* — enrichment and transfer

Connection. A copula/predicate/complement triage begins with the verb's function rather than an English word order.

Transfer task. For the project-composed clauses *Maria magistra est*, *Discipuli parati erant*, and *Pax erit donum*, box the copula, underline the subject, and double-underline every predicate complement. Then change only the tense.

Retrieval check. State the case of both subject and predicate complement and explain why neither is a direct object.

1.2 The compound *possum* — enrichment and transfer

Connection. The ability verb and its infinitive form one verbal center while retaining distinct finite and non-finite jobs.

Transfer task. For the project-composed clause *Discipulus potest legere*, label person, number, tense, and mood on *potest*; label *legere* as complementary infinitive; then change the subject to plural and the time to past ability.

Retrieval check. Explain which verb anchors the clause and which form supplies the activity made possible.

1.3 Handwritten study and controlled composition — enrichment and transfer

Connection. An independent exit ticket tests whether paradigms support clause analysis instead of remaining isolated recitation.

Transfer task. Without notes: parse *fuimus*, *erunt*, *potuistis*; supply nominative predicate forms for a plural subject; build one project-composed ability clause; and bracket an omitted copula in a verbless project-composed acclamation.

Retrieval check. Write one sentence distinguishing object, predicate complement, and complementary infinitive.

Part IV

Selected Practice

CHAPTER 1

Unit 7: *Sum* and *Possum*

Worksheet I.26 — Variant B

Worksheet ID: I.26

Focus: Perfect-system forms and linking-clause syntax**Use:** This is equivalent to Variant A but ranges across all six indicative tenses.

1. Write all six persons of the perfect active indicative of *sum*.

-
2. Parse *fueraimus*, *fuero*, *fuertint*, *fuit*; note any form that can be ambiguous outside this unit's indicative frame.

-
3. Transform *sancti erunt*, “they will be holy”, into imperfect, perfect, and pluperfect.

-
4. Give the present and perfect infinitives and the singular/plural imperatives of *sum*.

-
5. Diagnose *Via et veritas est bonæ*, intended “The way and truth are good”.

-
6. **Text:** *Ego sum via, et veritas, et vita*.

Passage ID: I.26.1; exact source and collation state are recorded in the passage inventory.

Identify subject, linking verb, and all predicate nouns; explain their case and translate.

Worksheet I.27 — Variant C**Worksheet ID:** I.27**Focus:** The compound *possum*, tense contrasts, and ellipsis**Use:** Supply an infinitive wherever ability requires one.

1. Write all six present forms of *possum*.

-
2. Give the requested forms: 3 plural imperfect, 2 singular future, 1 plural perfect, 3 singular pluperfect, 2 plural future perfect of *possum*.

-
3. Translate and distinguish *poterat facere*, *potuit facere*, and *potuerat facere*.

-
4. Complete with the correct form of *possum*:

ego _____ *audire*; nos _____ *laudare*; vos cras _____ *venire*.

-
5. Correct *Possunt Deum laudant*.

-
6. **Text:** *Sine me nihil potestis facere*.

Passage ID: I.27.1; exact source and collation state are recorded in the passage inventory.

Parse *potestis*, identify its infinitive and the roles of *me* and *nihil*, then translate.

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

The indicative of *sum* — model and rubric

Connection. A copula/predicate/complement triage begins with the verb's function rather than an English word order.

Model / acceptable evidence. In each project-composed clause, the subject and predicate noun or adjective are nominative; *est*, *erant*, and *erit* link rather than transfer action. A tense change alters the copula while preserving the nominal relation unless another coordinate is deliberately changed.

The compound *possum* — model and rubric

Connection. The ability verb and its infinitive form one verbal center while retaining distinct finite and non-finite jobs.

Model / acceptable evidence. The transformed clause may be *Discipuli poterant legere*. Finite *potest/poterant* anchors person, number, tense, and mood; *legere* is non-finite and completes the idea of ability.

Handwritten study and controlled composition — model and rubric

Connection. An independent exit ticket tests whether paradigms support clause analysis instead of remaining isolated recitation.

Model / acceptable evidence. Expected parses are first-person plural pluperfect of *sum*, third-person plural future of *sum*, and second-person plural perfect of *possum*. Predicate forms must agree with the plural subject; the ability clause needs finite *possum* plus an infinitive; a supplied copula must be visibly bracketed. The final distinction must identify accusative target, nominative completion, and non-finite verbal completion respectively.

CHAPTER 3

Unit 7: *Sum* and *Possum*

Solution I.26 — Variant B

Worksheet ID: I.26

Focus: Perfect-system forms and linking-clause syntax**Use:** This is equivalent to Variant A but ranges across all six indicative tenses.

1. Write all six persons of the perfect active indicative of *sum*.
Answer / model: *fui, fuisti, fuit, fuimus, fuistis, fuerunt*.
2. Parse *fueraimus, fuero, fuerint, fuit*; note any form that can be ambiguous outside this unit's indicative frame.
Answer / model: *fueraimus*: 1 plural pluperfect active indicative; *fuero*: 1 singular future perfect active indicative; *fuerint*: 3 plural future perfect active indicative, also potentially perfect subjunctive; *fuit*: 3 singular perfect active indicative.
3. Transform *sancti erunt*, “they will be holy”, into imperfect, perfect, and pluperfect.
Answer / model: *sancti erant; sancti fuerunt; sancti fuerant*.
4. Give the present and perfect infinitives and the singular/plural imperatives of *sum*.
Answer / model: Present infinitive *esse*; perfect infinitive *fuisse*; imperatives *es, este*.
5. Diagnose *Via et veritas est bonæ*, intended “The way and truth are good”.
Answer / model: *Via et veritas sunt bonæ*. Compound subject requires plural *sunt*; predicate adjective is feminine plural nominative *bonæ*.
6. **Text:** *Ego sum via, et veritas, et vita*.
Passage ID: I.26.1; exact source and collation state are recorded in the passage inventory.
Identify subject, linking verb, and all predicate nouns; explain their case and translate.
Answer / notes: *ego*: nominative subject; *sum*: 1 singular present active indicative; *via, veritas, vita*: coordinated nominative predicate nouns. “I am the way, and the truth, and the life.”

Solution I.27 — Variant C**Worksheet ID:** I.27**Focus:** The compound *possum*, tense contrasts, and ellipsis**Use:** Supply an infinitive wherever ability requires one.

1. Write all six present forms of *possum*.

Answer / model: *possum, potes, potest, possumus, potestis, possunt.*

2. Give the requested forms: 3 plural imperfect, 2 singular future, 1 plural perfect, 3 singular pluperfect, 2 plural future perfect of *possum*.

Answer / model: *poterant, poteris, potuimus, potuerat, potueritis.*

3. Translate and distinguish *poterat facere*, *potuit facere*, and *potuerat facere*.

Answer / model: “He was able/could do”; “he was able/managed to do”; “he had been able to do”. They are imperfect, perfect, and pluperfect respectively, all with complementary *facere*.

4. Complete with the correct form of *possum*:

ego _____ audire; nos _____ laudare; vos cras _____ venire.

Answer / model: *ego possum audire; nos possumus laudare; vos cras poteritis venire.*

5. Correct *Possunt Deum laudant*.

Answer / model: *Possunt Deum laudare*. A finite form of *possum* takes a complementary infinitive, not another finite present verb.

6. **Text:** *Sine me nihil potestis facere.*

Passage ID: I.27.1; exact source and collation state are recorded in the passage inventory.

Parse *potestis*, identify its infinitive and the roles of *me* and *nihil*, then translate.

Answer / notes: *potestis*: 2 plural present active indicative of *possum*; complement *facere*; *me*: ablative after *sine*; *nihil*: neuter accusative object of *facere*. “Without me you can do nothing.”

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-I.7, *Sum and Possum*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet teaches the indicative of *sum* and operational *possum*; complete subjunctive morphology remains in Stage II.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
