

Ecclesiastical Latin

EL-I.11: Pronouns and Prepositions

Resolve pronoun antecedents and reflexive reference while applying the case government of core prepositions

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-I.11
Course stage	Stage I — Foundations
Prerequisites	EL-I.10 mastery: distinguish passive, deponent, participial, and <i>fio</i> structures
Observable outcome	Resolve pronoun antecedents and reflexive reference while applying the case government of core prepositions
Printed practice	Worksheets I.41 (guided Variant A) and I.44 (independent Variant D), with terminal keys
Extension bank	Worksheets I.42 and I.43 remain optional remediation or delayed-recall variants
Next dependency	EL-I.12, A Repeatable Method for Reading the Missal

1.1 Two focused sessions

Session 1 — guided acquisition. Trace personal, reflexive, demonstrative, and possessive antecedent chains, then complete Worksheet I.41 as the guided application.

Session 2 — transfer and gate. Apply the relative-pronoun and two-case-preposition maps, complete Worksheet I.44 independently, and state the governor for every oblique case.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Write at least 90 percent of the displayed pronoun forms, govern at least 18 of 20 prepositional objects correctly, and resolve antecedent, gender, number, case, and function for at least nine of ten unseen relative pronouns.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- personal and reflexive pronoun forms and direct versus indirect reflexive reference;
- *is*, *ea*, *id* and *hic*, *hæc*, *hoc*, including possessive reference;
- relative-pronoun antecedent gender/number versus internal clause case; and
- accusative, ablative, and two-case preposition government.

2.2 High-risk contrast

A relative pronoun receives gender and number from its antecedent but case from its own clause. A preposition governs its object's case; the nearest English phrase or noun position does not.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Unit 11: Pronouns and Prepositions

On completing this unit, you can:

- decline personal, demonstrative, and relative pronouns;
- distinguish reflexive possession from non-reflexive possession;
- apply the case government of core prepositions; and
- resolve pronoun antecedents in liturgical clauses.

1.1 Personal and reflexive pronouns

A **pronoun** stands for a noun phrase or points to a participant without repeating its noun. A **personal pronoun** identifies speaker, addressee, or another participant. A **reflexive pronoun** refers back to the subject of its own clause; a **possessive adjective** identifies a possessor but agrees with the thing possessed. These categories describe different relations, even when English translates them with similar words.

	First person		Second person		Reflexive
	sg.	pl.	sg.	pl.	sg./pl.
Nom.	ego	nos	tu	vos	—
Gen.	mei	nostri/nostrium	tui	vestri/vestrum	sui
Dat.	mihi	nobis	tibi	vobis	sibi
Acc.	me	nos	te	vos	se
Abl.	me	nobis	te	vobis	se

Forms in *-i* such as *nostri* commonly express an objective relation, while *nostrium* is normally partitive; the same distinction holds for *vestri/vestrum*. With personal pronouns, *cum* follows its object: *mecum*, *tecum*, *nobiscum*, *vobiscum*, *secum*. Possessives *meus*, *tuus*, *noster*, *vester*, and *suus* are adjectives and agree with the thing possessed. *Suus* refers back to the clause's subject; *eius* or *eorum/earum* normally means “his, her”, or “their” when the possessor is not that subject.

In reported thought, a subordinate clause, or some biblical and later usage, a reflexive may instead follow the sentence's logical point of view. Label this an **indirect reflexive** only when the wider syntax and source identify that center; do not use the exception merely to evade the ordinary subject rule.

1.2 *Is, ea, id* and *hic, hæc, hoc*

A **demonstrative** points out or identifies a referent (“this,” “that,” or sometimes “he/she/it”). An **emphatic pronoun** adds identity or emphasis (“self,” “the very one”) rather than reflexively directing the action back upon the subject.

	<i>is, ea, id</i> singular			plural		
	m.	f.	n.	m.	f.	n.
Nom.	is	ea	id	ii/ei	eæ	ea
Gen.	eius	eius	eius	eorum	earum	eorum
Dat.	ei	ei	ei	eis/iis	eis/iis	eis/iis
Acc.	eum	eam	id	eos	eas	ea
Abl.	eo	ea	eo	eis/iis	eis/iis	eis/iis

Emphatic *ipse, ipsa, ipsum*, “self, very one”, mostly follows first/second-declension adjective endings but has genitive singular *ipsius* and dative singular *ipsi* for all genders. The doxology especially requires masculine accusative *ipsum* and ablative *ipso*.

	<i>hic, hæc, hoc</i> singular			plural		
	m.	f.	n.	m.	f.	n.
Nom.	hic	hæc	hoc	hi	hæ	hæc
Gen.	huius	huius	huius	horum	harum	horum
Dat.	huic	huic	huic	his	his	his
Acc.	hunc	hanc	hoc	hos	has	hæc
Abl.	hoc	hac	hoc	his	his	his

1.3 The relative pronoun

A **relative pronoun** introduces a subordinate clause that describes or identifies an **antecedent**, the noun or noun-equivalent to which the pronoun refers. The antecedent supplies gender and number; the pronoun’s own job inside its clause supplies case.

	<i>qui, quæ, quod</i> singular			plural		
	m.	f.	n.	m.	f.	n.
Nom.	qui	quæ	quod	qui	quæ	quæ
Gen.	cuius	cuius	cuius	quorum	quarum	quorum
Dat.	cui	cui	cui	quibus	quibus	quibus
Acc.	quem	quam	quod	quos	quas	quæ
Abl.	quo	qua	quo	quibus	quibus	quibus

A relative pronoun takes gender and number from its antecedent but case from its own job inside the relative clause. In *Agnus qui tollis*, *qui* is masculine singular because of *Agnus* and nominative because it is the subject of *tollis*. In *dies quam fecit Dominus*, *quam* is singular and feminine in its context because of *dies*, but accusative because it is the object of *fecit*.

1.4 Core preposition government

Learn prepositions together with their case. Core accusative governors are *ad* (to), *ante* (before), *apud* (with, in the presence of), *contra* (against), *inter* (among), *ob* (on account of), *per* (through), *post* (after), *propter* (because of), *secundum* (according to), and *trans* (across). Core ablative governors are *a/ab* (from, by), *cum* (with), *de* (down from, concerning), *e/ex* (out of), *pro* (for, on behalf of), and *sine* (without). *In* and *sub* normally take the accusative for motion toward and the ablative for location: *in ecclesiam*, “into the church”; *in ecclesia*, “in the church”.

Worked example: *Dominus vobiscum*

Worked passage ID: W.I.47; exact source and collation state are recorded in the passage inventory.

vobiscum is *cum* plus ablative plural *vobis* in its required postpositive order. The conventional optative construal may be shown with interpretive *[sit]*: “The Lord be with you.”

Worked example: *Propter nos homines et propter nostram salutem descendit de cælis*

Worked passage ID: W.I.48; exact source and collation state are recorded in the passage inventory.

Both *nos* and *nostram salutem* are accusative after *propter*; *nostram* agrees with *salutem*, not with *nos*. *de* governs ablative plural *cælis*. Translation: “For us men and for our salvation he came down from heaven.”

Worked example: *Per ipsum, et cum ipso, et in ipso*

Worked passage ID: W.I.49; exact source and collation state are recorded in the passage inventory.

The same masculine singular pronoun changes case: *ipsum* is accusative after *per*; both instances of *ipso* are ablative after *cum* and after *in* denoting location or state. Translation: “Through him, and with him, and in him.”

Worked example: *Hoc est enim Corpus meum*

Worked passage ID: W.I.50; exact source and collation state are recorded in the passage inventory.

Neuter singular *hoc* is nominative subject; *Corpus* is the nominative predicate noun, and possessive *meum* agrees with it. Translation: “For this is my Body.”

Worked example: *Pater noster, qui es in cælis, dimitte nobis debita nostra*

Worked passage ID: W.I.51; exact source and collation state are recorded in the passage inventory.

noster is vocative masculine singular with *Pater*; relative *qui* is nominative subject of *es*. *in* governs ablative plural *cælis*; *nobis* is dative recipient; *debita nostra* is neuter plural accusative object. Translation: “Our Father, who are in heaven, forgive us our debts.”

1.5 Handwritten study and controlled composition

Copy the four pronoun charts and color-code antecedent agreement separately from clause function. Write every personal pronoun with *cum*. Sort the core prepositions into accusative, ablative, and two-case columns; then add one noun phrase to each. Transform *per eum*, *cum eo*, *in eo* to feminine and plural. Compose “for our souls”, *pro animabus nostris*; “through this word”, *per hoc verbum*; and “the Lord guards his own Church”, *Dominus Ecclesiam suam custodit*.

Advance when: Write at least 90 percent of the displayed pronoun forms from memory; govern the correct case after 18 of 20 prepositions; and resolve each relative pronoun’s antecedent, gender, number, case, and clause function in 9 of 10 unseen sentences.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 Personal and reflexive pronouns — enrichment and transfer

Connection. A reference chain separates the grammatical person of a pronoun from the discourse person to whom it points.

Transfer task. For each personal or reflexive example in the lesson, draw an arrow to its referent and label person, number, case, and direct or indirect reflexive status.

Retrieval check. State why third-person reflexive *sui/sibi/se* does not by itself name gender.

1.2 *Is, ea, id* and *hic, hæc, hoc* — enrichment and transfer

Connection. Demonstrative morphology and discourse distance are different questions that must both be answered.

Transfer task. Build parallel nominative and accusative cards for the two lesson paradigms, then annotate one lesson example with morphology, antecedent, and discourse role.

Retrieval check. Explain why matching gender and number does not yet prove the antecedent.

1.3 The relative pronoun — enrichment and transfer

Connection. A two-link antecedent chain prevents antecedent agreement from being confused with internal case.

Transfer task. For every relative example in the lesson, draw one arrow from antecedent to gender/number and a second from the relative clause's verb or governor to case/function.

Retrieval check. Recite the two-axis rule and give one reason the antecedent's case need not match the relative's case.

1.4 Core preposition government — enrichment and transfer

Connection. A two-case preposition map joins spatial relation to the exact case selected in the lesson.

Transfer task. Place each core preposition into accusative, ablative, or two-case columns. For each two-case item, add one motion-oriented and one location-oriented lesson use without inventing a universal English shortcut.

Retrieval check. State the government of *in* and *sub* in the two ordinary spatial patterns.

1.5 Handwritten study and controlled composition — enrichment and transfer

Connection. A cumulative transformation reveals whether reference, agreement, and government remain coherent together.

Transfer task. Perform the lesson's gender-and-number transformations for *per eum*, *cum eo*, *in eo*, then add arrows from every pronoun to its referent and from every preposition to its governed case.

Retrieval check. Name one change caused by reference agreement and one caused by preposition government.

Part IV

Selected Practice

CHAPTER 1

Unit 11: Pronouns and Prepositions

Worksheet I.41 — Variant A

Worksheet ID: I.41

Focus: Personal/reflexive pronouns and preposition government**Use:** For each pronoun, give case, number, and antecedent where applicable.

1. Write nominative, genitive, dative, accusative, and ablative of first- and second-person singular pronouns.

-
2. Write the four personal pronouns with *cum*, singular then plural.

-
3. Distinguish *Petrus matrem suam amat* from *Petrus matrem eius amat*.

-
4. Choose the correct case and form: *pro (nos)*, *sine (tu)*, *ad (ego)*, *cum (vos)*.

-
5. Correct *Dominus cum vobis* to the conventional pronoun-preposition order.

-
6. **Text:** *Dominus vobiscum. Et cum spiritu tuo.*

Passage ID: I.41.1; exact source and collation state are recorded in the passage inventory.

Parse both prepositional expressions, state the conventional optative construal, and translate.

Worksheet I.44 — Variant D**Worksheet ID:** I.44**Focus:** Core prepositions and cumulative pronoun parsing**Use:** State the governing word for every oblique case.

1. Sort by government: *ad, a/ab, apud, contra, cum, de, e/ex, inter, ob, per, post, pro, propter, secundum, sine, trans*.
-

2. Give the correct phrase: “through us”; “for her”; “without them” masculine; “from this altar”; “toward those churches”.
-

3. Parse the repeated pronoun in *per ipsum, cum ipso, in ipso*; explain each case.
-

4. Explain why *nostram* in *propter nostram salutem* is not a form of personal pronoun *nos*.
-

5. Correct *de cælos, propter nobis, cum eos*.
-

6. **Text:** *Propter nos homines et propter nostram salutem descendit de cælis.*

Passage ID: I.44.1; exact source and collation state are recorded in the passage inventory.

Parse both accusative phrases and the source phrase; identify the finite verb and translate.

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

Personal and reflexive pronouns — model and rubric

Connection. A reference chain separates the grammatical person of a pronoun from the discourse person to whom it points.

Model / acceptable evidence. Each arrow must identify the clause's controlling subject or other referent and the pronoun's case function. The third-person reflexive paradigm refers back to the relevant subject without distinct gender forms; context supplies the referent.

Is, ea, id and *hic, hæc, hoc* — model and rubric

Connection. Demonstrative morphology and discourse distance are different questions that must both be answered.

Model / acceptable evidence. The cards must preserve the irregular pronominal genitive and dative where taught and the correct neuters. A possible antecedent must match gender and number, but syntax, discourse, and sense must also establish the actual reference.

The relative pronoun — model and rubric

Connection. A two-link antecedent chain prevents antecedent agreement from being confused with internal case.

Model / acceptable evidence. The first axis copies gender and number from the antecedent; the second assigns case from the relative pronoun's own clause. The clauses give the two words independent functions, so their cases may differ.

Core preposition government — model and rubric

Connection. A two-case preposition map joins spatial relation to the exact case selected in the lesson.

Model / acceptable evidence. The map must assign each one-case preposition correctly. In ordinary spatial uses, *in/sub* with accusative expresses motion toward or under, while the ablative expresses location; the actual construction and context remain controlling.

Handwritten study and controlled composition — model and rubric

Connection. A cumulative transformation reveals whether reference, agreement, and government remain coherent together.

Model / acceptable evidence. All transformed pronouns must match their intended referent in gender and number while taking the case required by their preposition. The explanation must keep those two sources of form distinct.

CHAPTER 3

Unit 11: Pronouns and Prepositions

Solution I.41 — Variant A

Worksheet ID: I.41

Focus: Personal/reflexive pronouns and preposition government

Use: For each pronoun, give case, number, and antecedent where applicable.

1. Write nominative, genitive, dative, accusative, and ablative of first- and second-person singular pronouns.

Answer / model: First: *ego, mei, mihi, me, me*. Second: *tu, tui, tibi, te, te*.

2. Write the four personal pronouns with *cum*, singular then plural.

Answer / model: *mecum, tecum, nobiscum, vobiscum*. The preposition follows and attaches to these pronouns.

3. Distinguish *Petrus matrem suam amat* from *Petrus matrem eius amat*.

Answer / model: First: “Peter loves his own mother”; reflexive possessive *sua* refers to subject Peter. Second: “Peter loves his/her [someone else’s] mother”; *eius* refers to a non-subject possessor.

4. Choose the correct case and form: *pro (nos)*, *sine (tu)*, *ad (ego)*, *cum (vos)*.

Answer / model: *pro nobis; sine te; ad me; vobiscum*.

5. Correct *Dominus cum vobis* to the conventional pronoun-preposition order.

Answer / model: *Dominus vobiscum*. With personal pronouns, *cum* is postpositive and attached.

6. **Text:** *Dominus vobiscum. Et cum spiritu tuo.*

Passage ID: I.41.1; exact source and collation state are recorded in the passage inventory.

Parse both prepositional expressions, state the conventional optative construal, and translate.

Answer / notes: *vobiscum*: second-person plural ablative plus postpositive *cum*; *cum spiritu tuo*: ablative noun phrase. An analytic paraphrase may add interpretive *[sit]* in the first formula, but no verb is printed. “The Lord be with you. And with your spirit.”

Solution I.44 — Variant D

Worksheet ID: I.44

Focus: Core prepositions and cumulative pronoun parsing

Use: State the governing word for every oblique case.

- Sort by government: *ad, a/ab, apud, contra, cum, de, e/ex, inter, ob, per, post, pro, propter, secundum, sine, trans.*
Answer / model: Accusative: *ad, apud, contra, inter, ob, per, post, propter, secundum, trans.* Ablative: *a/ab, cum, de, e/ex, pro, sine.*
- Give the correct phrase: “through us”; “for her”; “without them” masculine; “from this altar”; “toward those churches”.
Answer / model: *per nos; pro ea; sine eis; ab hoc altari; ad eas ecclesias.*
- Parse the repeated pronoun in *per ipsum, cum ipso, in ipso*; explain each case.
Answer / model: *ipsum*: masculine singular accusative after *per*; both *ipso* forms: masculine singular ablative after *cum* and after *in* denoting state or location. Antecedent is Christ.
- Explain why *nostram* in *propter nostram salutem* is not a form of personal pronoun *nos*.
Answer / model: It is the feminine singular accusative possessive adjective *noster, nostra, nostrum*, agreeing with *salutem*; *nos* itself is the indeclinable-looking accusative personal form in *propter nos*.
- Correct *de cælos, propter nobis, cum eos*.
Answer / model: *de cælis*, ablative after *de*; *propter nos*, accusative after *propter*; *cum eis*, ablative after *cum*.
- Text:** *Propter nos homines et propter nostram salutem descendit de cælis.*
Passage ID: I.44.1; exact source and collation state are recorded in the passage inventory.
 Parse both accusative phrases and the source phrase; identify the finite verb and translate.
Answer / notes: *propter nos homines*: accusative plural, with *homines* in apposition to *nos*; *propter nostram salutem*: feminine singular accusative; *de cælis*: masculine plural ablative; *descendit*: 3 singular perfect active in the Creed’s narrative. “For us men and for our salvation he came down from heaven.”

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-I.11, *Pronouns and Prepositions*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet supplies the foundation pronoun and preposition system; expanded interrogative and indefinite paradigms begin Stage II.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
