

Ecclesiastical Latin

EL-I.12: A Repeatable Method for Reading the Missal

Apply a seven-pass, evidence-first process to short unfamiliar Missal selections and produce close and natural translations

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-I.12
Course stage	Stage I — Foundations
Prerequisites	EL-I.11 mastery: resolve foundational pronouns and preposition government
Observable outcome	Apply a seven-pass, evidence-first process to short unfamiliar Missal selections and produce close and natural translations
Printed practice	Worksheets I.45 (guided Variant A) and I.48 (independent Variant D), with terminal keys
Extension bank	Worksheets I.46 and I.47 remain optional remediation or delayed-recall variants
Next dependency	EL-GATE-I, Foundations Assessment Sequence (F-A and delayed F-B); after passage, EL-II.1, Relative, Interrogative, and Indefinite Pronouns

1.1 Two focused sessions

Session 1 — guided acquisition. Complete one guided seven-pass reading with a fully annotated scaffold, then complete Worksheet I.45 as the guided cumulative application.

Session 2 — transfer and gate. Repeat the method with a faded scaffold and disciplined lookup/error records, complete Worksheet I.48 independently, and make the Stage I advancement decision from evidence.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Within the stated gate conditions, reach at least 90 percent morphological and 85 percent syntactic accuracy, translate every clause without omission, meet the cumulative transformation threshold, and write the requiring rule beside every correction.

Stage edge. Advance to Stage II only after the complete Volume I standard is met and the separate EL-GATE-I sequence is passed; elapsed sessions do not waive any threshold.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- seven passes: boundaries, finite verbs, nominal forms, agreement, government/reference, close sense, and natural rendering;
- printed versus supplied words and visibly bracketed ellipsis;
- dictionary use limited to lexical meaning and principal parts after an unaided hypothesis; and
- an error ledger that records form, failed decision, corrected rule, and delayed retest.

2.2 High-risk contrast

A close translation exposes grammatical relations; natural English communicates the proposition. Neither replaces the morphological and syntactic map, and neither may silently omit a printed word.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Unit 12: A Repeatable Method for Reading the Missal

On completing this unit, you can:

- move from printed text to a complete morphological and syntactic map;
- account for flexible word order, ellipsis, and fixed acclamations;
- produce both a close translation and natural English; and
- read short unseen selections from the Ordinary with controlled use of a dictionary.

1.1 The seven-pass reading method

Morphology is the analysis of word forms and the grammatical information their parts express. **Syntax** is the way those forms combine into phrases and clauses. A reliable reading needs both: morphology proposes what a form can be, while syntax selects its contextual function.

Read a Missal sentence in seven deliberate passes.

1. Mark punctuation and conjunctions; bracket each likely clause.
2. Underline every finite verb and parse person, number, tense, voice, and mood. Supply an omitted form only in square brackets.
3. Find each verb's explicit or understood nominative subject.
4. For every noun, write dictionary form, gender, case, number, and clause function. List ambiguity before resolving it.
5. Draw agreement arrows from adjectives, participles, and pronouns.
6. Box every preposition with its governed phrase and identify every genitive or dative relation.
7. Write a close translation that preserves the grammar, then a natural translation that preserves the sense. Record any departure.

Latin word order signals emphasis more often than grammatical function. Endings, government, and agreement carry the structure. A prayer may omit a copula, repeat no noun after a clear antecedent, or retain an indeclinable Hebrew acclamation. Such recoverable omission is **ellipsis**; supply the smallest missing element in brackets. An **indeclinable** word does not change form to mark case, number, or gender. Do not invent morphology for *Amen*, *Alleluia*, *Hosanna*, or *Sabaoth*; identify each as indeclinable and continue.

1.2 Guided Missal readings

Worked example: The opening of the Gloria

Worked passage ID: W.I.52; exact source and collation state are recorded in the passage inventory.

Gloria in excelsis Deo, et in terra pax hominibus bonæ voluntatis. Laudamus te, benedicimus te, adoramus te, glorificamus te.

The first sentence is a coordinated verbless acclamation conventionally read as a wish; an analytic paraphrase may supply interpretive *[sit]* twice, but no finite verb is printed. Nominatives *gloria* and *pax* are the wished-for terms. *Deo* and *hominibus* are dative recipients; *in excelsis* uses substantival neuter plural ablative, “in the highest places”; *in terra* is *in* + ablative of place where; *bonæ voluntatis* is genitive. The four following verbs are first-person plural present active and each takes accusative *te*. Close translation: “Glory [be] to God in the highest places, and on earth peace [be] to people of good will. We praise you, bless you, adore you, glorify you.”

Worked example: The Sanctus and Benedictus

Worked passage ID: W.I.53; exact source and collation state are recorded in the passage inventory.

Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth. Pleni sunt cæli et terra gloria tua. Hosanna in excelsis. Benedictus qui venit in nomine Domini. Hosanna in excelsis.

Three predicate or acclamatory *Sanctus* forms agree with nominative *Dominus*; *Deus* is appositional and *Sabaoth* is indeclinable. Compound subject *cæli et terra* governs plural *sunt*; predicate *pleni* is plural, while *gloria tua* is ablative after *pleni*. *Benedictus* is a substantival masculine singular nominative in a verbless acclamation; conventional English supplies a copula, but none is printed. Relative *qui* identifies the blessed one and is the subject of present *venit*; *in nomine Domini* contains an ablative prepositional phrase plus a genitive. Translation: “Holy, Holy, Holy Lord God of hosts. Heaven and earth are full of your glory. Hosanna in the highest. Blessed is he who comes in the name of the Lord. Hosanna in the highest.”

Worked example: The Agnus Dei

Worked passage ID: W.I.54; exact source and collation state are recorded in the passage inventory.

Agnus Dei, qui tollis peccata mundi, miserere nobis. Agnus Dei, qui tollis peccata mundi, dona nobis pacem.

Nominative *Agnus* is used as a direct address in this formula and is modified by genitive *Dei*; the regular standalone vocative would be *Agne*. Relative *qui* is nominative subject of second-person singular *tollis* because the Lamb is addressed directly. Neuter plural *peccata* is the object, and *mundi* is genitive. Deponent imperative *miserere* has active sense and here takes *nobis*; active imperative *dona* takes dative recipient *nobis* and accusative object *pacem*. Translation: “Lamb of God, who take away the sins of the world, have mercy on us. Lamb of God, who take away the sins of the world, grant us peace.”

Worked example: The prayer before Communion

Worked passage ID: W.I.55; exact source and collation state are recorded in the passage inventory.

Domine, non sum dignus ut intres sub tectum meum: sed tantum dic verbo, et sanabitur anima mea.

Domine is vocative. *sum* links its implicit first-person subject to nominative predicate *dignus*. *intres* is second-person singular present active subjunctive in an *ut*-clause completing *dignus*; *sub* takes accusative *tectum* because entry is envisioned, and *meum* agrees. With irregular singular

imperative *dic, verbo* is ablative of means; *sanabitur* is third-person singular future passive with nominative subject *anima mea*. Translation: “Lord, I am not worthy that you should enter under my roof; but only say the word, and my soul shall be healed.”

Worked example: The Johannine Last Gospel

Worked passage ID: W.I.56; exact source and collation state are recorded in the passage inventory.

In principio erat Verbum, et Verbum erat apud Deum, et Deus erat Verbum. Hoc erat in principio apud Deum. Omnia per ipsum facta sunt.

Each *erat* is third-person singular imperfect of *sum*. *Verbum* is subject in the first two clauses. In *Deus erat Verbum*, both nouns are nominative; word order and context, not an accusative ending, distinguish subject *Verbum* from predicate *Deus*. *apud* governs accusative *Deum*. Demonstrative *Hoc* is neuter singular nominative. In the final sentence, *omnia* is neuter plural subject, *per ipsum* is accusative after *per*, and *facta sunt* agrees in neuter plural. Translation: “In the beginning was the Word, and the Word was with God, and the Word was God. He was in the beginning with God. All things were made through him.”

Worked example: A Psalm sentence used at the altar

Worked passage ID: W.I.57; exact source and collation state are recorded in the passage inventory.

Emitte lucem tuam et veritatem tuam: ipsa me deduxerunt et adduxerunt in montem sanctum tuum, et in tabernacula tua (Ps 42:3).

emitte is second-person singular present active imperative. *lucem tuam et veritatem tuam* are coordinated objects. Neuter plural *ipsa* refers to the pair collectively and is the subject of perfect *deduxerunt et adduxerunt*; *me* is their object. Both final instances of *in* govern accusative because motion toward is expressed. *sanctum tuum* agrees with *montem*; neuter plural *tua* agrees with *tabernacula*. Translation: “Send forth your light and your truth; they have led me and brought me unto your holy mountain and into your tabernacles.”

1.3 Handwritten synthesis and controlled composition

Choose one four-line section of the Ordinary in each of six study sessions. Copy it by hand, leaving three blank lines between printed lines. On the second line record morphology and agreement arrows; on the third write a close translation; on the fourth write natural English. In a seventh session, reconstruct one selection from its supplied English sense alone and compare every ending with the source.

Build a personal lexicon of fifty high-frequency forms. Each entry must give the printed form, dictionary form, morphology in context, and the phrase in which it occurred. For controlled composition, write these in Latin and then reverse-check every ending: “We praise the eternal Lord”; *Dominum æternum laudamus*. “The holy souls were guarded by God”; *Animæ sanctæ a Deo custoditæ sunt*. “Through him all things were made”; *Per ipsum omnia facta sunt*. “Grant peace to our souls”; *Da animabus nostris pacem*.

1.4 Volume I completion standard

Completion means independent analysis, not recognition by memory. Use an unmarked copy of three passages of 35–60 words: one familiar passage from the Ordinary and two unseen passages restricted to this volume's morphology. For each, mark clauses, parse every finite verb, account for every noun and adjective ending, resolve each pronoun, and give close and natural translations. A dictionary may be used only for lexical meaning and principal parts, not for a prepared translation.

Advance when: In 45 minutes, analyze the three completion passages with at least 90 percent morphological accuracy and 85 percent syntactic accuracy; translate every clause without omitting a stated word; score at least 80 percent on a 25-item cumulative composition and transformation check; and, after correcting errors by hand, write beside every correction the rule that requires it.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 The seven-pass reading method — enrichment and transfer

Connection. An annotated-to-faded scaffold makes the method retrievable without turning the scaffold into permanent dependence.

Transfer task. Apply all seven passes to the first guided lesson reading, writing the pass number beside every annotation. Then repeat on another lesson reading with only the seven pass names visible.

Retrieval check. List the passes from memory and identify the earliest pass at which an English translation may responsibly be drafted.

1.2 Guided Missal readings — enrichment and transfer

Connection. Fading help tests transfer while retaining the same evidence standard.

Transfer task. Choose one lesson reading whose worked analysis is complete. Cover one layer at a time—translation, syntax, then morphology—and reconstruct each layer before checking. Record the first layer that fails.

Retrieval check. Explain why remembering a familiar English text cannot count as a successful direct reading.

1.3 Handwritten synthesis and controlled composition — enrichment and transfer

Connection. A lookup/error record distinguishes lexical help from outsourcing the parse.

Transfer task. For the lesson synthesis passage, write an unaided lemma and parse hypothesis before each lookup. After checking, record whether the error was lexical identity, morphology, syntax, reference, or English expression and state the correcting rule.

Retrieval check. State the two kinds of information this module permits a dictionary to supply at the gate.

1.4 Volume I completion standard — enrichment and transfer

Connection. An independent gate must measure current transfer, not page completion or recognition of rehearsed answers.

Transfer task. Complete the lesson's three-passage protocol under its stated conditions. Score morphology, syntax, completeness, and transformations separately; then assign every error to a rule and choose advance or remediation.

Retrieval check. Without notes, state all threshold categories and explain why a high average cannot erase a repeated structural error.

Part IV

Selected Practice

CHAPTER 1

Unit 12: Consolidated Missal Reading

Worksheet I.45 — Variant A

Worksheet ID: I.45

Focus: A complete seven-pass analysis of the Ordinary**Use:** Work without a prepared translation; cite morphology for each conclusion.

1. Write the seven reading passes in operational form, one action per line.

-
2. **Text:** *Gloria in excelsis Deo, et in terra pax hominibus bonæ voluntatis.*

Passage ID: I.45.1; exact source and collation state are recorded in the passage inventory.

State the conventional construal, parse every nominal phrase, and give close English.

-
3. **Text:** *Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth. Pleni sunt cæli et terra gloria tua.*

Passage ID: I.45.2; exact source and collation state are recorded in the passage inventory.

Account for agreement, apposition, indeclinability, subject-verb number, and the ablative; translate.

4. Transform active *Deus animas custodivit* to passive, then make the passive subject singular; translate both results.
-

5. Find and correct every error: *Domine, non sumus dignum; sed dic verba, et animæ nostra sanabitur*. Assume one speaker and one soul.
-

6. **Text:** *Domine, non sum dignus ut intres sub tectum meum: sed tantum dic verbo, et sanabitur anima mea*.

Passage ID: I.45.3; exact source and collation state are recorded in the passage inventory.

Parse every finite form and explain the *ut*-clause and the cases in the *sub* phrase, with *dic*, and with the passive; translate.

Worksheet I.48 — Variant D**Worksheet ID:** I.48**Focus:** Independent final-gate rehearsal**Use:** Complete in one sitting, then correct every error by rule.

1. **Text:** *Laudamus te, benedicimus te, adoramus te, glorificamus te, gratias agimus tibi propter magnam gloriam tuam.*

Passage ID: I.48.1; exact source and collation state are recorded in the passage inventory.

Parse all verbs, pronouns, objects, recipient, and prepositional phrase; translate.

-
2. **Text:** *Benedictus qui venit in nomine Domini.*

Passage ID: I.48.2; exact source and collation state are recorded in the passage inventory.

Explain the verbless acclamation, resolve the relative, parse the phrase, and translate.

-
3. Transform *Verbum a Domino auditur* into imperfect passive, future passive, perfect passive, and active present.
-

4. Compose “All holy names will have been praised by the faithful”; parse your finite group.

-
5. Diagnose and correct all errors: *Pater nostra, qui est in cælos, dona nos pacis.*

-
6. **Text:** *Requiem æternam dona eis, Domine, et lux perpetua luceat eis.*

Passage ID: I.48.3; exact source and collation state are recorded in the passage inventory.

Provide a complete morphological map, identify the two petitions, and translate.

Part V**Mastery Decision****CHAPTER 1**

Mastery and error record

Advance / remediate decision: _____ **Next review date:**

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

The seven-pass reading method — model and rubric

Connection. An annotated-to-faded scaffold makes the method retrievable without turning the scaffold into permanent dependence.

Model / acceptable evidence. The first analysis must account for boundaries, finite verbs, nominal morphology, agreement, government/reference, close sense, and natural rendering. Translation follows the formal map rather than preceding it; wording may be drafted at the close-sense pass and refined only after every earlier decision is explicit.

Guided Missal readings — model and rubric

Connection. Fading help tests transfer while retaining the same evidence standard.

Model / acceptable evidence. A successful reconstruction supplies morphology and syntax from the Latin and then produces a complete close sense. The error record must name the first failed decision. Familiar English may check sense after analysis, but cannot establish forms or relations.

Handwritten synthesis and controlled composition — model and rubric

Connection. A lookup/error record distinguishes lexical help from outsourcing the parse.

Model / acceptable evidence. The record must preserve the pre-lookup hypothesis and classify each correction. At the gate, the dictionary supplies lexical meaning and principal parts; it does not supply a prepared translation or replace contextual parsing.

Volume I completion standard — model and rubric

Connection. An independent gate must measure current transfer, not page completion or recognition of rehearsed answers.

Model / acceptable evidence. Advance requires at least 90 percent morphology, 85 percent syntax, complete clause translation, and the stated cumulative transformation score, followed by rule-based correction. A repeated structural error remains evidence that its dependency is unstable even if other categories raise the average.

CHAPTER 3

Unit 12: Consolidated Missal Reading

Solution I.45 — Variant A

Worksheet ID: I.45

Focus: A complete seven-pass analysis of the Ordinary

Use: Work without a prepared translation; cite morphology for each conclusion.

1. Write the seven reading passes in operational form, one action per line.

Answer / model: (1) Mark punctuation/conjunctions and bracket clauses. (2) Underline and parse finite verbs; bracket only supplied words. (3) Find stated or understood subjects. (4) Give dictionary form, gender, case, number, and function for nouns. (5) Draw agreement/antecedent links. (6) Box prepositional phrases and identify genitive/dative relations. (7) Write close, then natural, English and record departures.

2. **Text:** *Gloria in excelsis Deo, et in terra pax hominibus bonæ voluntatis.*

Passage ID: I.45.1; exact source and collation state are recorded in the passage inventory.

State the conventional construal, parse every nominal phrase, and give close English.

Answer / notes: This is a coordinated verbless acclamation conventionally read as a wish; an analytic paraphrase may add interpretive [*sit*] with *gloria* and *pax*. Both are feminine singular nominative; *in excelsis* is neuter plural ablative substantival; *Deo* dative recipient; *in terra* ablative; *hominibus* dative plural; *bonæ voluntatis* feminine singular genitive. “Glory [be] to God in the highest, and on earth peace [be] to people of good will.”

3. **Text:** *Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth. Pleni sunt cæli et terra gloria tua.*

Passage ID: I.45.2; exact source and collation state are recorded in the passage inventory.

Account for agreement, apposition, indeclinability, subject-verb number, and the ablative; translate.

Answer / notes: *Sanctus* is masculine singular nominative in repeated acclamatory/predicate relation to *Dominus*; *Deus* is appositional; *Sabaoth* indeclinable. *cæli et terra* is compound subject of plural *sunt*; predicate *pleni* is masculine plural; *gloria tua* ablative after *pleni*. “Holy, Holy, Holy Lord God of hosts. Heaven and earth are full of your glory.”

4. Transform active *Deus animas custodivit* to passive, then make the passive subject singular; translate both results.
Answer / model: Plural: *Animæ a Deo custoditæ sunt*, “The souls were guarded by God”. Singular: *Anima a Deo custodita est*, “The soul was guarded by God”.
5. Find and correct every error: *Domine, non sumus dignum; sed dic verba, et animæ nostra sanabitur*. Assume one speaker and one soul.
Answer / model: *Domine, non sum dignus; sed dic verbo, et anima nostra sanabitur*. First-person singular *sum*; nominative predicate *dignus*; ablative *verbo*; feminine singular nominative *anima nostra* with singular passive *sanabitur*.
6. **Text:** *Domine, non sum dignus ut intres sub tectum meum: sed tantum dic verbo, et sanabitur anima mea*.
Passage ID: I.45.3; exact source and collation state are recorded in the passage inventory.
Parse every finite form and explain the *ut*-clause and the cases in the *sub* phrase, with *dic*, and with the passive; translate.
Answer / notes: *sum*: 1 singular present active indicative; *intres*: 2 singular present active subjunctive in an *ut*-clause completing *dignus*; *dic*: 2 singular present active imperative; *sanabitur*: 3 singular future passive indicative. *sub tectum meum*: accusative motion; *verbo*: ablative means; *anima mea*: nominative subject. “Lord, I am not worthy that you should enter under my roof; but only say the word, and my soul shall be healed.”

Solution I.48 — Variant D

Worksheet ID: I.48

Focus: Independent final-gate rehearsal

Use: Complete in one sitting, then correct every error by rule.

1. **Text:** *Laudamus te, benedicimus te, adoramus te, glorificamus te, gratias agimus tibi propter magnam gloriam tuam.*

Passage ID: I.48.1; exact source and collation state are recorded in the passage inventory.

Parse all verbs, pronouns, objects, recipient, and prepositional phrase; translate.

Answer / notes: The first four verbs are 1 plural present active with accusative *te*. *agimus* is 1 plural present active; *gratias* its accusative plural object and *tibi* dative recipient. *propter* governs feminine singular accusative *magnam gloriam tuam*. “We praise you, bless you, adore you, glorify you; we give you thanks because of your great glory.”

2. **Text:** *Benedictus qui venit in nomine Domini.*

Passage ID: I.48.2; exact source and collation state are recorded in the passage inventory.

Explain the verbless acclamation, resolve the relative, parse the phrase, and translate.

Answer / notes: *Benedictus* is a substantival masculine singular nominative, and *qui venit* identifies the blessed one; conventional English supplies a copula, but none is printed. *Qui* is masculine singular nominative subject of 3 singular present *venit*; *in nomine* is ablative; *Domini* genitive. “Blessed is he who comes in the name of the Lord.”

3. Transform *Verbum a Domino auditur* into imperfect passive, future passive, perfect passive, and active present.

Answer / model: *Verbum a Domino audiebatur*; *Verbum a Domino audietur*; *Verbum a Domino auditum est*; active *Dominus Verbum audit*.

4. Compose “All holy names will have been praised by the faithful”; parse your finite group.

Answer / model: *Omnia nomina sancta a fidelibus laudata erunt*. *laudata erunt*: neuter plural future perfect passive indicative agreeing with *omnia nomina sancta*; *a fidelibus* personal agent.

5. Diagnose and correct all errors: *Pater nostra, qui est in cælos, dona nos pacis.*

Answer / model: *Pater noster, qui es in cælis, dona nobis pacem*. Masculine singular address takes *noster*; addressed Father requires 2 singular *es*; *in* denoting place where takes ablative plural *cælis*; recipient is dative *nobis*; object is accusative *pacem*.

6. **Text:** *Requiem æternam dona eis, Domine, et lux perpetua luceat eis.*

Passage ID: I.48.3; exact source and collation state are recorded in the passage inventory.

Provide a complete morphological map, identify the two petitions, and translate.

Answer / notes: First petition: 2 singular active imperative *dona*, object *requiem æternam* feminine singular accusative, recipient *eis*, address *Domine*. Second: *lux perpetua* feminine singular nominative subject; *luceat* 3 singular present active subjunctive of wish; *eis* dative. “Grant them eternal rest, O Lord, and may perpetual light shine upon them.”

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-I.12, *A Repeatable Method for Reading the Missal*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This Stage I capstone samples short connected reading; it does not yet establish independent reading of complete unfamiliar formularies.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
