

Ecclesiastical Latin

EL-III.10: The Sanctoral Cycle and the Commons

Follow a Proper-to-Common assignment trail, expand placeholders in the demanded case, and maintain name, title, pronoun, and agreement reference

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-III.10
Course stage	Stage III — Independent Missal Reading
Prerequisites	EL-III.9 and accurate use of Missal headings
Observable outcome	Follow a Proper-to-Common assignment trail, expand placeholders in the demanded case, and maintain name, title, pronoun, and agreement reference
Printed practice	Worksheets III.37 (martyr-bishop placeholder, Variant A) and III.40 (Marian Common, Variant D), with terminal keys
Extension bank	Worksheets III.38 and III.39 remain optional Common-Gospel and Confessor-Common practice
Next dependency	EL-III.11, Requiem and Holy Week

1.1 Two focused sessions

Session 1 — guided acquisition. Build the assignment trail and placeholder ledger and complete Worksheet III.37.

Session 2 — transfer and gate. Transfer the method to Marian and other Common patterns in Worksheet III.40 and audit every antecedent and inserted form.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: For a feast assigned partly to a Common, cite the heading trail, distinguish Proper and Common texts, insert every name and title in its required form, and resolve pronouns and agreement without relying on capitalization.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- Proper, Common, assignment trail, and grammatical placeholder;
- nominative and genitive name forms used to derive inserted cases;
- title, reflexive, possessive, and antecedent reference; and
- a source inventory that distinguishes recognition from printed direction.

2.2 High-risk contrast

Recognizing a familiar Common is not evidence that the selected feast uses it. The physical heading and direction establish the assignment; grammar establishes every inserted form.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

The Sanctoral Cycle and the Commons

On completing this unit, you can:

- distinguish a saint's Proper from a supplied Common;
- adapt placeholder formulas without losing agreement;
- recognize recurrent martyr, confessor, virgin, and Marian vocabulary;
- avoid mistaking remembered formulas for the text actually assigned.

The *Proprium Sanctorum* may provide a complete formulary or direct the reader to a *Commune*. A Common is not a single generic Mass: it is a set of formularies and options classified by saint and office. Before reading, write the assignment exactly: one martyr or several, pontiff or non-pontiff, confessor, doctor, virgin, holy woman, dedication, or the Blessed Virgin Mary. Then verify which elements remain proper.

The **Sanctoral cycle** is the calendar sequence of saints' feasts and other fixed-date observances. A saint's **Proper** supplies text particular to that observance; a **Common** supplies one or more reusable formularies for a classified kind of saint. A **placeholder** such as *N.* marks a slot to be filled from the assignment. Filling it is a grammatical operation: the supplied name must take the case required by the surrounding formula.

1.1 The grammatical placeholder

Deus, qui nos beati N. Martyris tui atque Pontificis annua solemnitate lætificas: concede propitius; ut, cuius natalitia colimus, de eiusdem etiam protectione gaudeamus.

Source: *Missale Romanum* (1962), Commune unius Martyris extra tempus paschale, Pro Martyre Pontifice, Altera Missa, Oratio.

beati N. Martyris tui atque Pontificis is a genitive phrase depending on *solemnitate*. The abbreviation *N.* must be expanded with the saint's name in the case demanded by the formula, not copied mechanically in nominative. Causative *lætificas* takes *nos*. Correlative *cuius ... eiusdem* refers to the martyr: the feast day is celebrated and protection from the same person is enjoyed. *de ... protectione* belongs with *gaudeamus*.

1.2 A Common Gospel command

Si quis vult post me venire, abneget semetipsum, et tollat crucem suam, et sequatur me.

Source: *Missale Romanum* (1962), Commune unius Martyris extra tempus paschale, Pro Martyre Pontifice, Altera Missa, Evangelium (Mt. 16:24–27).

Indefinite *si quis* introduces a present open condition. Complementary *venire* depends on *vult*; *post me* expresses following. The apodosis has three coordinated jussive subjunctives. Intensive reflexive *semetipsum* is the object of *abneget*; *suam* refers to the same individual subject, while *me* refers to the speaker.

1.3 Wisdom on the lips

Os iusti meditabitur sapientiam, et lingua eius loquetur iudicium: lex Dei eius in corde ipsius.

Source: Missale Romanum (1962), Commune Confessoris non Pontificis, Introitus (Ps. 36:30–31).

os and *lingua* are subjects of future deponent *meditabitur* and future *loquetur*. The Psalm's verbs take accusatives *sapientiam* and *iudicium*. The final clause is verbless; a bracketed [*est*] is an interpretive dependency or English paraphrase, not an expressed or grammatically required copula. Distinguish possessive *eius* from intensive/genitive *ipsius*; both refer to the just person, while *Dei* identifies the law.

1.4 The Marian Common

Salve, sancta Parens, enixa puerpera Regem: qui cælum terramque regit in sæcula sæculorum.

Source: Missale Romanum (1962), Commune Festorum Beatæ Mariæ Virginis, Introitus (Sedulius).

Parens and *puerpera* are vocative in function; participle *enixa* agrees with the addressed mother and governs accusative *Regem*. Relative *qui* refers to the King, not to the mother, as masculine gender and *regit* confirm. Enclitic *-que* joins *cælum* and *terram*; *in sæcula sæculorum* is biblical genitive intensification, a formula of unbounded duration.

1.5 Name and agreement ledger

For each saint write the nominative and the genitive actually used by the Missal. Then write titles in the required gender and number: *Martyris, Confessoris, Pontificis, Virginis, Viduæ*. When a Common changes from one saint to several, check every pronoun, participle, relative, and verb; do not merely pluralize the name.

Advance when: given four unseen sanctoral assignments, you correctly locate Proper and Common components, expand every N. in the demanded case, adapt a singular formula to a supplied plural subject without agreement errors, and read each complete formulary with at least 90% sampled parsing accuracy and no facing translation.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 The grammatical placeholder — enrichment and transfer

Connection. A printed placeholder inherits its case from its local construction, not from the saint's citation form.

Transfer task. For three placeholder contexts already described in the lesson, write the required case question, derive the form from a supplied nominative/genitive pair, and audit adjacent titles.

Retrieval check. Why is a nominative name unsafe as a universal substitution?

1.2 A Common Gospel command — enrichment and transfer

Connection. Speaker, addressee, reflexive, and object may shift through a command sequence.

Transfer task. Make a participant grid for the lesson's Common Gospel example and assign every personal or reflexive form to a participant with morphological evidence.

Retrieval check. State the difference between reflexive reference and simple person agreement.

1.3 Wisdom on the lips — enrichment and transfer

Connection. A verbless or compressed clause still requires heads, modifiers, and predicative relations to be distinguished.

Transfer task. On the lesson phrase, mark head noun, dependent genitives or adjectives, and any interpretive copula in brackets.

Retrieval check. Identify which supplied element is not printed.

1.4 The Marian Common — enrichment and transfer

Connection. Agreement can exclude a tempting nearby antecedent and identify the relative's referent.

Transfer task. Trace the lesson's Marian relative through gender, number, internal case, and finite verb; list and reject the nearest incompatible antecedent.

Retrieval check. Which feature excludes that antecedent first?

1.5 Name and agreement ledger — enrichment and transfer

Connection. A reusable ledger must record forms actually required by a feast rather than a generic list of saintly titles.

Transfer task. Create a blank-to-filled audit with heading, source location, name citation forms, inserted form, title, pronoun, and agreement controller.

Retrieval check. Mark one form that still requires checking in the physical Missal.

Part IV

Selected Practice

CHAPTER 1

Unit III.10: Sanctoral Cycle and Commons

Worksheet III.37 — Variant A

Worksheet ID: III.37

Focus: One martyr-bishop and the placeholder

Use: Expand names in the demanded case.

1. **Text:** *Deus, qui nos beati N. Martyris tui atque Pontificis annua solemnitate lætificas: concede propitius; ut, cuius natalitia colimus, de eiusdem etiam protectione gaudeamus.*

Passage ID: III.37.1; exact source and collation state are recorded in the passage inventory.

Map the collect and every reference to the saint.

-
2. Insert *Polycarpus*, *Polycarpi* for N. and write the complete genitive title.

-
3. Why must a learner record a saint's genitive rather than merely copy a nominative name into N.?

-
4. Parse *natalitia*.

-
5. Answer in Latin: *De cuius protectione gaudere petimus?*

-
6. Change the prayer mechanically to several martyrs only where necessary in the cited phrases.
-

Worksheet III.40 — Variant D**Worksheet ID:** III.40**Focus:** Marian Common and antecedent gender**Use:** Let agreement select the relative antecedent.

1. **Text:** *Salve, sancta Parens, enixa puerpera Regem: qui cælum terramque regit in sæcula sæculorum.*

Passage ID: III.40.1; exact source and collation state are recorded in the passage inventory.

Parse the address, participle, object, and relative.

-
2. Give the lemma and morphology of *enixa*.

-
3. Why can *qui* not refer to *Parens*?

-
4. Explain enclitic *-que*.

-
5. Answer in Latin: *Quem sancta Parens enixa est?*

-
6. Inventory a feast directed partly to a Marian Common: list what must be checked before reading.
-

Part V**Mastery Decision****CHAPTER 1**

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

The grammatical placeholder — model and rubric

Connection. A printed placeholder inherits its case from its local construction, not from the saint's citation form.

Model / acceptable evidence. Each model form answers the local governor or function and retains the name's declension. A nominative is correct only where that context demands nominative.

A Common Gospel command — model and rubric

Connection. Speaker, addressee, reflexive, and object may shift through a command sequence.

Model / acceptable evidence. The grid uses clause subject and discourse participant to resolve reflexives; finite person alone does not identify every pronoun's antecedent.

Wisdom on the lips — model and rubric

Connection. A verbless or compressed clause still requires heads, modifiers, and predicative relations to be distinguished.

Model / acceptable evidence. The model preserves the nominal syntax and brackets an English or Latin copular expansion as interpretive. It does not claim a finite form appears in the source.

The Marian Common — model and rubric

Connection. Agreement can exclude a tempting nearby antecedent and identify the relative's referent.

Model / acceptable evidence. The model uses gender and number to test referents, then internal case for function. The rejected antecedent fails the printed agreement before thematic sense is considered.

Name and agreement ledger — model and rubric

Connection. A reusable ledger must record forms actually required by a feast rather than a generic list of saintly titles.

Model / acceptable evidence. A complete ledger distinguishes observed wording from proposed insertion and preserves an unresolved status where the page or direction has not been checked.

CHAPTER 3

Unit III.10: Sanctoral Cycle and Commons

Solution III.37 — Variant A

Worksheet ID: III.37

Focus: One martyr-bishop and the placeholder

Use: Expand names in the demanded case.

1. **Text:** *Deus, qui nos beati N. Martyris tui atque Pontificis annua solemnitate lætificas: concede propitius; ut, cuius natalitia colimus, de eiusdem etiam protectione gaudeamus.*

Passage ID: III.37.1; exact source and collation state are recorded in the passage inventory.

Map the collect and every reference to the saint.

Answer / notes: Relative reason *qui ... lætificas*, object *nos*, means/cause *annua solemnitate*, with genitive *beati N. Martyris tui atque Pontificis*. Petition *concede propitius*; content *ut ... gaudeamus*. Correlative *cuius/eiusdem* refers to the same martyr; *natalitia* object of *colimus*; *de protectione* with *gaudeamus*.

2. Insert *Polycarpus, Polycarpi* for N. and write the complete genitive title.

Answer / model: *beati Polycarpi Martyris tui atque Pontificis*.

3. Why must a learner record a saint's genitive rather than merely copy a nominative name into N.?

Answer / model: N. occupies a syntactic slot; here it is genitive under *solemnitate*. Latin proper names have several declensions and some irregular/indeclinable forms.

4. Parse *natalitia*.

Answer / model: Substantival neuter plural accusative of *natalicium/natalitius*; object of *colimus*, referring to the anniversary/feast, traditionally the heavenly birthday.

5. Answer in Latin: *De cuius protectione gaudere petimus?*

Answer / model: *De eiusdem martyris protectione gaudere petimus*.

6. Change the prayer mechanically to several martyrs only where necessary in the cited phrases.

Answer / model: Model core changes: *beatorum N. et N. Martyrum tuorum atque Pontificum ... quorum natalitia colimus, de eorundem etiam protectione gaudeamus*. The exact plural formulary must still be checked in the Missal.

Solution III.40 — Variant D

Worksheet ID: III.40

Focus: Marian Common and antecedent gender

Use: Let agreement select the relative antecedent.

1. **Text:** *Salve, sancta Parens, enixa puerpera Regem: qui cælum terramque regit in sæcula sæculorum.*

Passage ID: III.40.1; exact source and collation state are recorded in the passage inventory.

Parse the address, participle, object, and relative.

Answer / notes: *Parens/puerpera* vocative in function; *sancta/enixa* feminine singular agreeing with the mother; *Regem* object of perfect deponent participle *enixa*. Masculine *qui* refers to *Regem*; *cælum terramque* objects of *regit*; duration *in sæcula sæculorum*.

2. Give the lemma and morphology of *enixa*.

Answer / model: From deponent *enitor, eniti, enixus sum*; *enixa* is the perfect participle, nominative/vocative feminine singular, “having brought forth.”

3. Why can *qui* not refer to *Parens*?

Answer / model: Its masculine singular gender matches *Regem*; the mother would require feminine *quæ*. Sense and agreement concur.

4. Explain enclitic *-que*.

Answer / model: It joins accusative *terram* to accusative *cælum*: heaven and earth.

5. Answer in Latin: *Quem sancta Parens enixa est?*

Answer / model: *Sancta Parens Regem, qui cælum terramque regit, enixa est.*

6. Inventory a feast directed partly to a Marian Common: list what must be checked before reading.

Answer / model: Exact Common rubric/formulary; which chants and prayers are proper; saint/feast title; assigned lesson and Gospel; any seasonal Alleluia/Tract change; name/case substitutions.

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-III.10, *The Sanctoral Cycle and the Commons*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet teaches assignment and grammatical adaptation, not calendar precedence or ceremonial assembly.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
