

Ecclesiastical Latin

EL-II.6: Purpose, Result, and Indirect Command

Classify outwardly similar *ut*-clauses from governor, signals, negation, sequence, and discourse force

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.6
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.5 mastery: identify subjunctive morphology and sequence before assigning use
Observable outcome	Classify outwardly similar <i>ut</i> -clauses from governor, signals, negation, sequence, and discourse force
Printed practice	Worksheets II.21 (guided Variant A) and II.24 (independent Variant D), with terminal keys
Extension bank	Worksheets II.22 and II.23 remain optional remediation or delayed-recall variants
Next dependency	EL-II.7, Substantive Clauses

1.1 Two focused sessions

Session 1 — guided acquisition. Build the purpose/result/indirect-command evidence matrix, including *ut/ne* and *ut non*, then complete Worksheet II.21 as the guided application.

Session 2 — transfer and gate. Classify contextual clauses and transform positive and negative members of each family with preserved sequence, then complete Worksheet II.24 independently.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Classify at least eleven of twelve mixed clauses with a stated reason, select the correct negative marker in all eight test items, and compose one positive and one negative example of each family with correct sequence.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- purpose: intended end, *ut/ne*, and relative-purpose alternatives;
- result: actual or represented outcome, result signals, and *ut/ut non*;
- indirect command: a commanding, asking, warning, or persuading governor plus *ut/ne*; and
- sequence of tenses after primary and historic governors.

2.2 High-risk contrast

Negative purpose and indirect command ordinarily use *ne*; negative result uses *ut non*. Because positive clauses can all begin with *ut*, the governor, internal signals, and discourse relation must decide the family.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 3

Purpose, result, and indirect command

On completing this unit, you can:

- distinguish three outwardly similar *ut*-clause families by meaning and signal;
- use *ne* for negative purpose or command but *ut non* for negative result;
- recognize relative purpose;
- preserve sequence when transforming phrases into clauses.

3.1 Three clause patterns

A **purpose clause** states the intended end of an action. A **result clause** states the consequence that follows from a degree or circumstance. An **indirect command** reports what someone asks, orders, urges, permits, or prevents another person from doing. Because all three may contain *ut* and a subjunctive, identify the clause's job before translating the marker.

Purpose

Purpose answers “for what end?” and uses *ut* + subjunctive, negative *ne*: *venit ut oret*; *tacet ne turbet*. A relative pronoun may replace *ut* is: *misit sacerdotem qui oraret*, “he sent a priest to pray.” The relative then has a case-role within its own clause. Purpose is necessarily simultaneous with or subsequent to the governing action, so primary sequence uses present and historic sequence uses imperfect.

Result

Result states what actually or characteristically follows. It uses *ut*; its negative is *ut non*, *ut nemo*, or *ut nihil*—not purpose *ne*. Typical signals are *tam*, *ita*, *sic*, *tantus*, *talis*, *tot*, *adeo* or a comparative. Perfect subjunctive may emphasize a completed result even after a historic verb.

Indirect command

Verbs of asking, commanding, urging, permitting, persuading, and taking care introduce the content of a command with *ut/ne* + subjunctive: *rogat ut veniat*; *præcipit ne discedant*. Ask whether the clause tells what someone is requested to do (indirect command) or why an action is done (purpose). Some command verbs instead take an accusative plus infinitive: *iube eum venire*; do not force both constructions together.

3.2 Reading the forms in context

Worked example: purpose (John 1:7)

Worked passage ID: W.II.21; exact source and collation state are recorded in the passage inventory.

Hic venit in testimonium, ut testimonium perhiberet de lumine, ut omnes crederent per illum.

Analysis. Both *ut*-clauses express purpose after historic *venit*. Imperfect subjunctives *perhiberet* and *crederent* follow historic sequence; *per illum* identifies the human instrument.

Translation. “He came as a witness, to bear witness concerning the light, so that all might believe through him.”

Worked example: negative purpose (Matthew 26:41)

Worked passage ID: W.II.22; exact source and collation state are recorded in the passage inventory.

Vigilate et orate, ut non intretis in tentationem.

Analysis. The Vulgate here has *ut non*; context makes the clause the intended end of watching and praying. It therefore shows that the semantic test outranks a mechanical claim that every *ut non* must be result. Present *intretis* follows imperatives.

Translation. “Keep watch and pray, so that you may not enter into temptation.”

Worked example: result (John 3:16)

Worked passage ID: W.II.23; exact source and collation state are recorded in the passage inventory.

Sic enim Deus dilexit mundum, ut Filium suum unigenitum daret.

Analysis. Correlative *sic ... ut* measures the extent and consequence of God’s love. Imperfect subjunctive *daret* follows historic *dilexit*.

Translation. “For God so loved the world that he gave his only-begotten Son.”

Worked example: indirect command (Matthew 14:28)

Worked passage ID: W.II.24; exact source and collation state are recorded in the passage inventory.

Domine, si tu es, iube me ad te venire super aquas.

Analysis. *Iube* selects the alternative accusative-plus-infinitive command: *me* is subject of *venire*. Recasting with a verb such as *præcipe* would give *præcipe ut ad te veniam*. The purpose is to recognize, not blend, the two patterns.

Translation. “Lord, if it is you, command me to come to you over the waters.”

Worked example: relative purpose (Numbers 31:4)

Worked passage ID: W.II.25; exact source and collation state are recorded in the passage inventory.

Mille viri de singulis tribubus eligantur ex Israël qui mittantur ad bellum.

Analysis. Jussive *eligantur* orders the selection. Relative *qui* is nominative masculine plural, referring to *viri*, and present passive subjunctive *mittantur* states the purpose for which they are chosen.

Translation. “Let a thousand men from each tribe be chosen out of Israel to be sent to war.”

3.3 Writing laboratory

Copy the headings PURPOSE / RESULT / INDIRECT COMMAND. Under each, write its question, positive marker, negative marker, and two typical signals. Then bracket and label every clause in the five worked examples.

Transform *sacerdos venit; sacrificium offert* into a purpose clause; expand *tam sanctus est* with a result; report *Venite ad altare* after *Sacerdos monuit fratres*. Make each negative, paying special attention to *ne* versus *ut non*.

Advance when: you classify twelve mixed clauses with at least 11 correct and a stated reason, choose the correct negative marker in eight of eight items, and compose one positive and one negative example of each clause family with correct sequence.

Part III

Enrichment by Submodule

CHAPTER 4

Connections, transfer, and retrieval

4.1 Three clause patterns — enrichment and transfer

Connection. An evidence matrix prevents *ut* from being treated as a one-word clause label.

Transfer task. Create purpose, result, and indirect-command columns with rows for governor, discourse question, common signal, positive marker, negative marker, and sequence. Fill the matrix from the lesson before checking.

Retrieval check. Recite the negative marker for each family and one additional deciding feature.

4.2 Reading the forms in context — enrichment and transfer

Connection. Classification strength increases as independent evidence converges.

Transfer task. For each mixed lesson clause, assign one point each for a diagnostic governor, internal signal, expected negation, sequence, and discourse fit. Choose the narrowest family supported and mark any unresolved tie.

Retrieval check. Explain why *ut* plus subjunctive earns only partial evidence.

4.3 Writing laboratory — enrichment and transfer

Connection. Positive-to-negative transformations test the clause family because the negative marker must change by family.

Transfer task. Perform the lesson's three transformations. On each positive/negative pair, underline the governor, box the marker, and label sequence; do not change the intended relation.

Retrieval check. State which features remain constant when only polarity changes.

Part IV

Selected Practice

CHAPTER 5

Purpose, result, and indirect command: parallel forms

Worksheet II.21 — Clause families A

Worksheet ID: II.21

Focus: purpose, result, command, negative markers, sequence**Use:** Give the semantic test, not only the conjunction.

1. Classify *Venit ut oret*.

-
2. Write “He comes so that he may not disturb” as negative purpose.

-
3. Complete a result: *Tam clare cantat* _____ *omnes audiant*.

-
4. Report *Venite ad altare* after *Sacerdos fratres monet*.

-
5. **Text:** *Hic venit in testimonium, ut testimonium perhiberet de lumine, ut omnes crederent per illum*.

Passage ID: II.21.1; exact source and collation state are recorded in the passage inventory.

Classify both clauses and translate.

-
6. Write one negative example of each: purpose, result, indirect command.
-

Worksheet II.24 — Clause families D**Worksheet ID:** II.24**Focus:** purpose, result, command, negative markers, sequence**Use:** Give the semantic test, not only the conjunction.

1. Classify *Monuit eos ne timerent*.
-

2. Classify *Abscondit dona ne quis ea auferat*.
-

3. Classify *Adeo infirmus erat ut ambulare non posset*.
-

4. Transform purpose phrase *ad orandum venit* into a clause.
-

5. **Text:** *Misit servum suum hora cenæ dicere invitatis ut venirent, quia iam parata sunt omnia.*

Passage ID: II.24.1; exact source and collation state are recorded in the passage inventory.

Separate purpose and command.

6. Compose one sentence containing a purpose clause inside a result clause.
-

Part V**Mastery Decision****CHAPTER 6**

Mastery and error record

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 7

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 8

Enrichment models and rubrics

Three clause patterns — model and rubric

Connection. An evidence matrix prevents *ut* from being treated as a one-word clause label.

Model / acceptable evidence. Purpose and indirect command use *ne* when negative; result uses *ut non*. Purpose answers intended end, result presents an outcome and often has a degree/result signal, and indirect command depends on a volitional or communicative governor.

Reading the forms in context — model and rubric

Connection. Classification strength increases as independent evidence converges.

Model / acceptable evidence. The connective and mood establish a broad dependent pattern but are shared by multiple families. A defensible answer cites the governor and semantic relation, uses signals and negation as corroboration, and preserves ambiguity when the text does not distinguish purpose from result securely.

Writing laboratory — model and rubric

Connection. Positive-to-negative transformations test the clause family because the negative marker must change by family.

Model / acceptable evidence. The governor, clause family, relative time, and sequence remain constant; polarity and its marker change. Purpose and command pairs require *ne*; result requires *ut non*; all finite forms must retain correct sequence.

CHAPTER 9

Purpose, result, and indirect command: parallel forms

Solution II.21 — Clause families A

Worksheet ID: II.21

Focus: purpose, result, command, negative markers, sequence**Use:** Give the semantic test, not only the conjunction.

1. Classify *Venit ut oret*.

Answer / model: Purpose: it answers why he comes; present subjunctive *oret* follows primary *venit*.

2. Write “He comes so that he may not disturb” as negative purpose.

Answer / model: *Venit ne turbet*. *Ne*, rather than result-marker *ut non*, is the regular purpose negative.

3. Complete a result: *Tam clare cantat _____ omnes audiant*.

Answer / model: *ut*; “He sings so clearly that all hear.” Negative result would be *ut nemo audiat* or *ut non audiant*.

4. Report *Venite ad altare* after *Sacerdos fratres monet*.

Answer / model: *Sacerdos fratres monet ut ad altare veniant*. This is indirect command, present sequence.

5. **Text:** *Hic venit in testimonium, ut testimonium perhiberet de lumine, ut omnes crederent per illum*.

Passage ID: II.21.1; exact source and collation state are recorded in the passage inventory.

Classify both clauses and translate.

Answer / notes: Both are purpose clauses in historic sequence. “He came as a witness, to bear witness concerning the light, so that all might believe through him.”

6. Write one negative example of each: purpose, result, indirect command.

Answer / model: Models: *Tacet ne turbet*; *tam quiete loquitur ut non audiamus*; *monet nos ne discedamus*.

Solution II.24 — Clause families D

Worksheet ID: II.24

Focus: purpose, result, command, negative markers, sequence

Use: Give the semantic test, not only the conjunction.

1. Classify *Monuit eos ne timerent*.

Answer / model: Negative indirect command: it states what he warned/urged them not to do; historic sequence gives imperfect.

2. Classify *Abscondit dona ne quis ea auferat*.

Answer / model: Negative purpose: it answers why he hides the gifts. After *ne*, indefinite *quis* lacks *ali-*.

3. Classify *Adeo infirmus erat ut ambulare non posset*.

Answer / model: Result; *adeo* signals degree and *ut ... non* gives the negative consequence.

4. Transform purpose phrase *ad orandum venit* into a clause.

Answer / model: *Venit ut oret*.

5. **Text:** *Misit servum suum hora cenæ dicere invitatis ut venirent, quia iam parata sunt omnia*.

Passage ID: II.24.1; exact source and collation state are recorded in the passage inventory.

Separate purpose and command.

Answer / notes: Infinitive *dicere* expresses the purpose of sending; *ut venirent* is the commanded content spoken to the guests. “At supper time he sent his servant to tell the invited guests to come, because all things were ready.”

6. Compose one sentence containing a purpose clause inside a result clause.

Answer / model: Model: *Tam multi venerunt ut sacerdos ad altare ascenderet ut Missam celebraret*. First *ut* is result; the second is purpose.

Part VII

Scope and Sources

CHAPTER 10

Scope and Qualifications

10.1 Packet boundary

This is module EL-II.6, *Purpose, Result, and Indirect Command*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet teaches three central clause families without claiming that a connective alone supplies a complete parse.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

10.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

10.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 11

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

11.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

11.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

11.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
