

Ecclesiastical Latin

EL-II.14: Word Order, Ellipsis, Attraction, and Liturgical Compression

Recover dependency networks in compressed liturgical periods, label supplies by evidentiary status, and produce lossless prose-order Latin

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.14
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.13 mastery: distinguish adverbial case uses through morphology, governor, and meaning
Observable outcome	Recover dependency networks in compressed liturgical periods, label supplies by evidentiary status, and produce lossless prose-order Latin
Printed practice	Worksheets II.53 (guided Variant A) and II.56 (independent Variant D), with terminal keys
Extension bank	Worksheets II.54 and II.55 remain optional remediation or delayed-recall variants
Next dependency	EL-GATE-II, Core Grammar Assessment Sequence (C-A and delayed C-B); after passage, EL-III.1, The Independent Reader Workflow

1.1 Two focused sessions

Session 1 — guided acquisition. Recover relations from endings, agreement, and government; introduce G/P/I supply labels and a period diagram; then complete Worksheet II.53 as the guided application.

Session 2 — transfer and gate. Diagram one unseen compressed period from address through petition, defend every ellipsis or attraction, complete Worksheet II.56 independently, and make the Volume II cumulative-gate decision.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Within twenty minutes, attach at least 90 percent of the words in an unseen eight-line period, produce complete prose-order Latin without additions or omissions, and defend every supply or attraction; then meet the Volume II thresholds of 90 percent morphology, 85 percent syntax, no structural reversal, and composition without government or sequence errors.

Stage edge. Do not enter Stage III until the local compression standard is met and the separate EL-GATE-II sequence is passed. A construction family below 80 percent requires a fresh parallel pair and retest.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- printed order versus the dependency network established by endings, agreement, and government;
- hyperbaton, licensed ellipsis, incorporated antecedent, and case or modal attraction;
- supply labels G (grammatically required), P (strict parallel), and I (interpretive); and
- period diagram: address, grounds or expansions, governing petition, subordinate dependencies, and prose-order reconstruction.

2.2 High-risk contrast

Reordering can expose syntax but may not add or omit content. Attraction is considered only after ordinary agreement and government fail; an interpretive supply may aid commentary but is not inserted into the Latin as though printed.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 3

Word order, ellipsis, attraction, and liturgical compression

On completing this unit, you can:

- reconstruct clause structure when related words are separated;
- supply only ellipses licensed by grammar and parallelism;
- recognize incorporated antecedents and mood/case attraction;
- unpack the address–ground–petition architecture of compressed liturgical prose.

3.1 Reading what endings connect

Word order is the sequence in which words appear; **syntax** is the network of grammatical relations among them. Latin can separate words that belong together, so changing the order need not change the syntax. Always use endings, agreement, and government to recover that network before relying on position.

Order and emphasis

Latin commonly places subject–object–verb, modifier near noun, and governing word after its dependents, but none is an inviolable rule. Initial and final positions carry emphasis; pronouns and particles often come early; verbs can be delayed to close a period. Hyperbaton separates agreeing words around material they frame: *sanctas . . . manus suas*. Chiasmus arranges ABBA; asyndeton omits conjunctions; anaphora repeats a word. Recover syntax from endings and government before rearranging into English.

Licensed ellipsis

Ellipsis is the omission of a word that grammar and context make recoverable. Latin readily omits a form of *sum*, a repeated verb, an antecedent recoverable from a relative, or a noun recoverable from an adjective/participle. Supply the smallest element that makes the attested syntax complete: *Sanctus Dominus* can imply *est*; *viventes Deo* can share prior *esse*. Do not insert an agent, causal relation, or theological interpretation that the grammar leaves open.

Attraction and incorporation

Attraction is the adjustment of a form or mood under the influence of a nearby construction rather than its simplest independent syntax. A relative's normal case comes from its own clause, but Latin sometimes attracts it into the case of its antecedent, especially when the antecedent itself is omitted or incorporated: *in qua mensura*, "in the measure in which." A relative or subordinate clause inside subjunctive discourse may itself take subjunctive by **modal attraction**, especially when it belongs to the thought rather than the narrator's assertion. Attraction is a diagnosis after ordinary agreement and government fail, not a shortcut around parsing.

The compressed collect and Canon period

Use this recovery order:

1. circle every finite verb and conjunction;
2. locate vocative address and nominative subject;
3. attach each accusative/dative to a governing verb;
4. match separated adjectives, participles, and relatives by endings;
5. bracket subordinate clauses from marker to finite verb;
6. supply parallel ellipses, then make a literal prose-order version;
7. only then produce readable English.

Liturgical prose often has one finite petition supporting many vocatives, appositions, participles, genitives, and prepositional phrases. Punctuation is a guide, not a substitute for these steps.

3.2 Reading the forms in context

Worked example: fronting and delayed government in the Canon

Worked passage ID: W.II.59; exact source and collation state are recorded in the passage inventory.

Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.

Analysis. Accusative *te* is fronted far before its governing *rogamus ac petimus*. Vocative *Pater* is expanded by *clementissime*; *Filium* and *Dominum* are appositions to *Iesum Christum*. Nominative *supplices* describes the implicit subject *nos*.

Translation. “Therefore, most merciful Father, through Jesus Christ your Son our Lord, we humbly ask and petition you.”

Worked example: an adjective chain and final verb in the Canon

Worked passage ID: W.II.60; exact source and collation state are recorded in the passage inventory.

Quam oblationem tu, Deus, in omnibus, quæsumus, benedictam, adscriptam, ratam, rationabilem, acceptabilemque facere digneris.

Analysis. Accusative *quam oblationem* is the object of *facere*; five accusative feminine adjectives are its object complements. Deponent *digneris* governs *facere* and comes last; parenthetic *quæsumus* carries the plea. Enclitic *-que* joins the final adjective to the series.

Translation. “Be pleased, O God, we ask, to make this offering blessed in every respect, enrolled, ratified, rational/reasonable, and acceptable.” The conventional liturgical rendering “spiritual” is theological and idiomatic rather than the closest lexical gloss.

Worked example: ellipsis and acclamation in the Sanctus

Worked passage ID: W.II.61; exact source and collation state are recorded in the passage inventory.

Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth. Pleni sunt cæli et terra gloria tua.

Analysis. The triple nominative adjectives form a verbless nominal acclamation. One may supply *[est]* in an analytic translation, but the Latin does not require that as its sole parse. They are predicative or acclamatory adjectives focused on *Dominus Deus*, not predicate nominatives. In the second, *pleni* agrees with the compound subject *cæli et terra*; ablative *gloria tua* expresses fullness in ecclesiastical usage.

Translation. “Holy, holy, holy is the Lord God of hosts. Heaven and earth are full of your glory.”

Worked example: incorporated antecedent (Matthew 7:2)

Worked passage ID: W.II.62; exact source and collation state are recorded in the passage inventory.

In quo enim iudicio iudicaveritis, iudicabimini; et in qua mensura mensi fueritis, remetietur vobis.

Analysis. *Quo iudicio* and *qua mensura* incorporate the standards into their relative clauses: “with the judgment with which,” “in the measure in which.” Future perfect *iudicaveritis* and *mensi fueritis* precede the main futures. *iudicabimini* is second-person plural future passive of *iudico*; *remetietur* is formally third-person singular future indicative of deponent *remetior*, *remetiri*, *remensus sum*, exceptionally used with passive sense here, “will be measured back”.

Translation. “For with the judgment with which you judge, you will be judged; and in the measure in which you have measured, it will be measured back to you.”

Worked example: nested compression in the Canon

Worked passage ID: W.II.63; exact source and collation state are recorded in the passage inventory.

Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias.

Analysis. Fronted *hanc oblationem* is the object of *accipias*; its two genitives identify those whose offering it is. Parenthetical *quæsumus* introduces the substantive *ut*-request. Predicate participle *placatus* agrees with the implicit subject *tu*: “being appeased/gracious.”

Translation. “Therefore we ask you, Lord, graciously to accept this offering of our service and also of your whole household.”

3.3 Writing laboratory

Copy the *Quam oblationem* sentence on alternate lines. Connect every adjective to *oblationem*, draw an arrow from *facere* to the object, and another from *digneris* to *facere*. Beneath it write a prose-order Latin version, retaining every word.

Do the same with a collect chosen at random: (1) diplomatic copy, (2) marked syntax, (3) prose-order Latin, (4) close English, (5) idiomatic English. Then compress the composed sentence *Rogamus te, Pater clementissime, ut dona quæ offerimus benedicas* by fronting *te*, inserting *supplices*, and delaying the two governing verbs.

Advance when: in twenty minutes you mark every finite verb and correctly attach at least 90% of the words in one unseen eight-line Missal period, produce a complete prose-order Latin version without additions or omissions, and defend each supplied ellipsis or claimed attraction by a specific ending or construction.

Volume II cumulative gate

Choose an unseen collect, an unseen lesson paragraph of six to ten lines, and one Canon period not used in a worked example. Without a facing translation:

1. copy each text accurately by hand;
2. parse every verb and verbal noun, every pronoun, and every comparative or numeral;
3. bracket and name every subordinate clause;
4. mark the function of each ablative and all expressions of place and time;
5. write prose-order Latin, a close translation, and then idiomatic English;
6. compose a four-sentence prayer using one relative, one participle or absolute, one substantive request, and one other subjunctive construction from this volume.

Pass only with at least 90% correct morphology, 85% correct syntax labels, no reversal of subject/object, agency, negation, time, or conditional reality, and a composition free of case-government and sequence errors. If one construction family falls below 80%, complete a new pair of its parallel worksheet variants and retake that portion with a fresh passage.

Part III

Enrichment by Submodule

CHAPTER 4

Connections, transfer, and retrieval

4.1 Reading what endings connect — enrichment and transfer

Connection. G/P/I labels separate grammatical necessity, strict parallel recovery, and interpretive help before a supply enters reconstruction.

Transfer task. Apply G, P, or I to every omitted element proposed in the lesson's ellipsis examples. For each G or P, cite the ending, government, or strict parallel that licenses it; keep every I outside the reconstructed Latin.

Retrieval check. Define G, P, and I and state which labels may enter a clause reconstruction.

4.2 Reading the forms in context — enrichment and transfer

Connection. A period diagram holds distant dependencies without mistaking punctuation or proximity for syntax.

Transfer task. Choose one worked period already printed in the lesson. Place finite governors on the center line, attach subjects and complements, branch subordinate clauses from their governors, and put address/apposition material in separate frames. Number the printed order around the diagram.

Retrieval check. Explain how the diagram can preserve emphasis even after a prose-order line is written.

4.3 Writing laboratory — enrichment and transfer

Connection. A five-version record prevents prose-order reconstruction and idiomatic translation from silently changing the source.

Transfer task. Complete the lesson sequence: diplomatic copy, marked syntax, prose-order Latin, close English, and idiomatic English. Add a period diagram and a G/P/I ledger between marked syntax and prose order.

Retrieval check. State the invariant that all five versions must preserve.

Part IV

Selected Practice

CHAPTER 5

Word order and liturgical compression: parallel forms

Worksheet II.53 — Compression A

Worksheet ID: II.53

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture**Use:** First circle finite verbs; then reconnect words by endings.

1. Put in prose order: *Te, Pater, supplices rogamus.*

-
2. Reconnect *sanctas in manus suas accepit.*
-

3. Analyze the nominal acclamation *Sanctus, Sanctus, Sanctus Dominus*; state whether *[est]* is a possible expansion.
-

4. Unpack *in qua mensura mensi fueritis*.
-

5. **Text:** *Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.*

Passage ID: II.53.1; exact source and collation state are recorded in the passage inventory.

Mark object, address, apposition, subject description, and verbs.

6. Compress *Nos supplices te rogamus, Pater clementissime, ut dona benedicas*.
-

Worksheet II.56 — Compression D

Worksheet ID: II.56

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture

Use: First circle finite verbs; then reconnect words by endings.

1. Unpack the genitives in *oblationem servitutis nostræ et cunctæ familiæ tuæ*.

2. Explain *placatus* in *ut placatus accipias*.

3. Identify anaphora and asyndeton: *hæc dona, hæc munera, hæc sancta sacrificia illibata*.

4. Reconstruct *in quo iudicio iudicaveritis, iudicabimini*.

5. **Text:** *Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias.*

Passage ID: II.56.1; exact source and collation state are recorded in the passage inventory.

Mark the one main requested action and translate.

6. Produce five stages for any unseen two-line collect: copy, marked syntax, prose-order Latin, close English, idiomatic English.

Cumulative retention forms

Use one unused worksheet from every unit after a delay of at least several study sessions. Then select an unseen collect and lesson paragraph. Score morphology, clause classification, and translation separately. The Volume II gate in the teaching volume governs advancement; these worksheets diagnose the precise family to revisit.

Part V**Mastery Decision****CHAPTER 6**

Mastery and error record

Complete this page before opening the answer part.

Evidence	Session 1	Session 2 / delayed check
Date and elapsed focused time		
Worksheet ID and score

One recurring error family		
Correction stated as a rule		
Unseen or delayed item used		

Advance / remediate decision: _____ **Next review date:**

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 7

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 8

Enrichment models and rubrics

Reading what endings connect — model and rubric

Connection. G/P/I labels separate grammatical necessity, strict parallel recovery, and interpretive help before a supply enters reconstruction.

Model / acceptable evidence. G is grammatically required, such as an implicit subject contained in a finite verb; P is recoverable from a strict parallel member; I is interpretive help. Only justified G and P supplies enter reconstruction, and no label licenses an invented agent, cause, or theological proposition.

Reading the forms in context — model and rubric

Connection. A period diagram holds distant dependencies without mistaking punctuation or proximity for syntax.

Model / acceptable evidence. Every printed word must appear exactly once in the diagram and attach by morphology or government. The numbered original positions preserve fronting and delay as rhetorical facts; the prose-order line exposes dependencies without pretending the original order was accidental.

Writing laboratory — model and rubric

Connection. A five-version record prevents prose-order reconstruction and idiomatic translation from silently changing the source.

Model / acceptable evidence. All printed words, grammatical relations, negation, agency, time, and propositional content must remain accounted for. Supplies require G/P/I labels; prose order may rearrange but not rewrite; idiomatic English may smooth expression but not reverse or omit a relation.

CHAPTER 9

Word order and liturgical compression: parallel forms

Solution II.53 — Compression A

Worksheet ID: II.53

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture**Use:** First circle finite verbs; then reconnect words by endings.

1. Put in prose order: *Te, Pater, supplices rogamus.*

Answer / model: *Supplices te rogamus, Pater.* *Te* remains object; *supplices* remains nominative with implicit *nos*.

2. Reconnect *sanctas in manus suas accepit.*

Answer / model: *sanctas* and *suas* both modify accusative plural *manus*; *in manus* marks motion into the hands.

3. Analyze the nominal acclamation *Sanctus, Sanctus, Sanctus Dominus*; state whether *[est]* is a possible expansion.

Answer / model: The triple nominative adjectives are predicative or acclamatory with *Dominus*. A pedagogical expansion may use *[est]*, but the Latin is a verbless nominal acclamation and does not uniquely require an omitted copula.

4. Unpack *in qua mensura mensi fueritis.*

Answer / model: “In the measure in which you have measured.” *Qua mensura* is an incorporated antecedent/relative phrase, ablative.

5. **Text:** *Te igitur, clementissime Pater, per Iesum Christum Filium tuum Dominum nostrum, supplices rogamus ac petimus.*

Passage ID: II.53.1; exact source and collation state are recorded in the passage inventory.

Mark object, address, apposition, subject description, and verbs.

Answer / notes: *Te*: fronted object; *Pater*: vocative; *Filium/Dominum*: apposition to *Iesum Christum*; *supplices*: implicit *nos*; *rogamus/petimus*: governing verbs. “Therefore, most merciful Father, through Jesus Christ your Son our Lord, we humbly ask and petition you.”

6. Compress *Nos supplices te rogamus, Pater clementissime, ut dona benedicas.*

Answer / model: Model: *Te, clementissime Pater, nos supplices rogamus ut dona benedicas.* Fronting preserves every supplied word and role; Latin may omit *nos*, but the exercise asks to retain it.

Solution II.56 — Compression D

Worksheet ID: II.56

Focus: fronting, hyperbaton, ellipsis, attraction, collect architecture

Use: First circle finite verbs; then reconnect words by endings.

1. Unpack the genitives in *oblationem servitutis nostræ et cunctæ familiæ tuæ*.

Answer / model: Both *servitutis nostræ* and *cunctæ familiæ tuæ* depend on *oblationem*: “the offering of our service and of your whole household.”

2. Explain *placatus* in *ut placatus accipias*.

Answer / model: Nominative masculine singular perfect passive participle used predicatively with implicit *tu*: “being appeased/graciously, may you accept.”

3. Identify anaphora and asyndeton: *hæc dona, hæc munera, hæc sancta sacrificia illibata*.

Answer / model: Repeated *hæc* is anaphora; absence of conjunctions between the three appositional objects is asyndeton.

4. Reconstruct *in quo iudicio iudicaveritis, iudicabimini*.

Answer / model: “With the judgment with which you have judged, you will be judged.” *quo iudicio* incorporates antecedent and relative standard; future perfect precedes future passive.

5. **Text:** *Hanc igitur oblationem servitutis nostræ, sed et cunctæ familiæ tuæ, quæsumus, Domine, ut placatus accipias*.

Passage ID: II.56.1; exact source and collation state are recorded in the passage inventory.

Mark the one main requested action and translate.

Answer / notes: *Quæsumus* introduces substantive *ut placatus accipias*; fronted *hanc oblationem* is object. “Therefore we ask you, Lord, graciously to accept this offering of our service and also of your whole household.”

6. Produce five stages for any unseen two-line collect: copy, marked syntax, prose-order Latin, close English, idiomatic English.

Answer / model: Model method: preserve every attested word; identify address–relative ground–petition–content; move only after parsing; make close English preserve grammar; then smooth idiom without changing agency, time, or negation.

Part VII

Scope and Sources

CHAPTER 10

Scope and Qualifications

10.1 Packet boundary

This is module EL-II.14, *Word Order, Ellipsis, Attraction, and Liturgical Compression*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This Stage II capstone teaches grammatical recovery of compressed prose; rhetorical or theological interpretation remains subordinate to the attested wording and syntax.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

10.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

10.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 11

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

11.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

11.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

11.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
