

Ecclesiastical Latin

EL-III.4: Secrets and Postcommunions: Gift and Effect

Distinguish offering, sign, reception, present effect, and promised fruition through syntax and lexical families

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-III.4
Course stage	Stage III — Independent Missal Reading
Prerequisites	EL-III.3 and reliable Collect architecture
Observable outcome	Distinguish offering, sign, reception, present effect, and promised fruition through syntax and lexical families
Printed practice	Worksheets III.13 (gift, sign, and antecedent, Variant A) and III.16 (genre discrimination, Variant D), with terminal keys
Extension bank	Worksheets III.14 and III.15 remain optional reception/fruition and solemnity practice
Next dependency	EL-III.5, Lessons and Epistles

1.1 Two focused sessions

Session 1 — guided acquisition. Build the gift-and-sign role grid and complete Worksheet III.13.

Session 2 — transfer and gate. Compare genre expectations, complete Worksheet III.16, and justify reference and semantic-role decisions from the Latin.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: On an unseen Secret or Postcommunion, map the petition and its effects, resolve pronouns from morphology, and distinguish what the prayer offers, receives, signifies, or seeks without replacing grammar with theological inference.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- offered gift, sign, reception, present effect, and future fruition;
- antecedent tracking through gender and number;
- perfect, present, and future orientation in prayer prose; and
- sacrificial and reception vocabulary recorded by construction.

2.2 High-risk contrast

Genre supplies a hypothesis about a prayer's movement; only printed forms, dependencies, and local vocabulary establish the actual analysis.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 3

Secrets and Postcommunions: Gift and Effect

On completing this unit, you can:

- recognize the ritual vocabulary and demonstratives of the Secret;
- follow sacramental cause and desired effect in the Postcommunion;
- distinguish the grammatical referents of *quæ*, *hæc*, and *quam*.

The Secret often moves from gifts presently offered to the unity, cleansing, or salvation they signify. The Postcommunion moves from reception to continuing effect. Both genres favor passive infinitives, optative subjunctives, abstract nouns, and pronouns whose antecedents must be found by gender and number rather than proximity.

In the 1962 books, the **Secret** is the proper oration said silently over the offerings before the Preface; the **Postcommunion** is the proper oration after Communion that asks for the received sacrament's continuing effect. These names identify liturgical position and function, not a particular sentence pattern. A **referent** is the person, thing, or idea to which an expression points; its **antecedent** is the earlier wording that supplies that referent. Antecedent matching begins with gender, number, and syntactic possibility, then tests whether the resulting sense fits the prayer.

An **abstract noun** names a quality, act, or state—such as unity, reception, or cleansing—rather than a concrete bearer. A **sacramental effect** is the reality the prayer asks the received or offered sacrament to bring about; it must be distinguished from the ritual gift, sign, or act that the sentence makes its grammatical cause or occasion.

3.1 The offered sign

Ecclesiæ tuæ, quæsumus, Domine, unitatis et pacis propitius dona concede: quæ sub oblatis muneribus mystice designantur.

Source: *Missale Romanum* (1962), In festo Sanctissimi Corporis Christi, Secreta.

The main object is *dona*; *unitatis et pacis* specifies the gifts, and *Ecclesiæ tuæ* is dative of recipient. Read *propitius* with the subject implicit in *concede*. Neuter plural *quæ* refers to *dona*, not to feminine *Ecclesiæ* or the singular genitives. *sub oblatis muneribus* presents the gifts under the outward offered elements; *designantur* is passive.

3.2 Reception as a sign of future fruition

Fac nos, quæsumus, Domine, divinitatis tuæ sempiterna fruitione repleti: quam pretiosi Corporis et Sanguinis tui temporalis perceptio præfiguratur.

Source: *Missale Romanum* (1962), In festo Sanctissimi Corporis Christi, Postcommunio.

fac takes accusative *nos* and passive infinitive *repleti*. The ablative *fruitione* expresses that with which the recipient is filled; *divinitatis tuæ* is its objective genitive. Feminine singular *quam* refers to *fruitionem* understood from *fruitione*. The subject of *præfiguratur* is *temporalis perceptio*; the genitives *pretiosi Corporis*

et Sanguinis tui specify what is received.

3.3 A future feast approached now

Suscipiamus, Domine, misericordiam tuam in medio templi tui: ut reparationis nostræ ventura solemnia congruis honoribus præcedamus.

Source: *Missale Romanum* (1962), Dominica I Adventus, Postcommunio.

suscipiamus is hortatory or petitionary subjunctive. In the result or purpose clause, *ventura solemnia* is the accusative object of *præcedamus*: the worshippers go before the coming solemnities with fitting honors. *reparationis nostræ* defines those solemnities and *congruis honoribus* is ablative of means or manner. Do not make *solemnia* the subject merely because its form could be nominative.

3.4 Semantic families

Gift:

munus emphasizes a gift or duty; *donum* a gift; *oblatio* the offering; *hostia* the sacrificial victim.

Reception:

percipio/perceptio is full reception or taking; *sumo/sumptio* taking up; *suscipio* receiving or sustaining.

Effect:

purgo, mundo, emundo; reficio; reparo; proficiat; medela, remedium, fructus.

Sign:

significo; designo; præfiguro; mysterium; sacramentum.

Advance when: given two unseen Secrets and two Postcommunions, you identify the offered or received reality, every requested effect, and every pronominal antecedent with at least 90% accuracy; you may use a Latin dictionary after a complete first-pass clause map but no facing translation.

Part III

Enrichment by Submodule

CHAPTER 4

Connections, transfer, and retrieval

4.1 The offered sign — enrichment and transfer

Connection. The noun that signifies and the reality signified may occupy different syntactic slots.

Transfer task. On the lesson example, label finite verb, subject, objects, antecedents, and every term assigned to gift, sign, or reality.

Retrieval check. State which link is grammatical and which is a semantic classification.

4.2 Reception as a sign of future fruition — enrichment and transfer

Connection. Postcommunion prose often relates reception now to a sought effect without collapsing their time or role.

Transfer task. Make a two-line now/future map for the lesson's Postcommunion: put each finite or non-finite form on the line supported by its morphology and governor.

Retrieval check. Identify one English tense choice that could blur the Latin relation.

4.3 A future feast approached now — enrichment and transfer

Connection. An ambiguous neuter form must be resolved by government and clause structure before symbolism is discussed.

Transfer task. List every formal possibility for the lesson's ambiguous form, cross out those excluded by its governor, and explain the surviving relation.

Retrieval check. Why is thematic expectation weaker evidence than government?

4.4 Semantic families — enrichment and transfer

Connection. A family ledger prevents one English gloss from flattening distinct acts of offering, receiving, cleansing, and enjoying.

Transfer task. Create four family entries from the lesson with lemma, printed form, construction, agent or participant, and local sense.

Retrieval check. Give one pair that should remain separate despite overlapping English translations.

Part IV

Selected Practice

CHAPTER 5

Unit III.4: Secrets and Postcommunions

Worksheet III.13 — Variant A

Worksheet ID: III.13

Focus: Gift, sign, and antecedent

Use: Follow gender and number, not proximity.

1. **Text:** *Ecclesiae tuæ, quæsumus, Domine, unitatis et pacis propitius dona concede: quæ sub oblatiis muneribus mystice designantur.*

Passage ID: III.13.1; exact source and collation state are recorded in the passage inventory.

Map the petition and identify the antecedent of *quæ*.

-
2. Why can *quæ* refer neither to *Ecclesiae* nor to *pacis*?

-
3. Change the petition to singular *donum* and adjust the relative clause.

-
4. Parse *oblatiis* and give its head and verbal family.

-
5. Answer in Latin: *Quæ dona Ecclesiae concedi petuntur?*

-
6. Write a two-clause Latin imitation asking that the gift of faith be granted and manifested in good works.
-

Worksheet III.16 — Variant D**Worksheet ID:** III.16**Focus:** Genre discrimination**Use:** Decide whether each clause looks toward offering or received effect.

1. Classify and justify: *dona concede, quæ sub muneribus designantur.*

-
2. Classify and justify: *Fac nos sempiterna fruitione repleti.*

-
3. For *Hæc nos communio, Domine, purget a crimine*, parse *hæc, communio, purget, crimine*.

-
4. Rewrite the preceding sentence for plural *mysteria* while preserving sense.

-
5. Create a four-column family for gift, offering, reception, and effect, with two Latin nouns in each.

-
6. **Text:** *Munera nostra, quæsumus, Domine, propitius suscipe: ut corda nostra tua gratia renoventur.*

Passage ID: III.16.1; exact source and collation state are recorded in the passage inventory.

State whether this is authentic quotation or controlled imitation, then parse it fully.

Part V**Mastery Decision****CHAPTER 6**

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 7

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 8

Enrichment models and rubrics

The offered sign — model and rubric

Connection. The noun that signifies and the reality signified may occupy different syntactic slots.

Model / acceptable evidence. The model proves the parse from endings, agreement, and government, then adds semantic-role labels. A semantic association alone may not supply an antecedent or case.

Reception as a sign of future fruition — model and rubric

Connection. Postcommunion prose often relates reception now to a sought effect without collapsing their time or role.

Model / acceptable evidence. A passing model distinguishes completed or present reception from the petition's desired fruition and cites the decisive forms. Natural English may vary, but it may not reverse that relation.

A future feast approached now — model and rubric

Connection. An ambiguous neuter form must be resolved by government and clause structure before symbolism is discussed.

Model / acceptable evidence. The model begins with morphology, then identifies the governing word and required case or function. Theme can confirm a grammatical result but cannot override it.

Semantic families — model and rubric

Connection. A family ledger prevents one English gloss from flattening distinct acts of offering, receiving, cleansing, and enjoying.

Model / acceptable evidence. Every accepted entry cites a form and construction. The contrast must explain a difference in agency, object, temporal orientation, or genre role rather than merely list synonyms.

CHAPTER 9

Unit III.4: Secrets and Postcommunions

Solution III.13 — Variant A

Worksheet ID: III.13

Focus: Gift, sign, and antecedent

Use: Follow gender and number, not proximity.

1. **Text:** *Ecclesiae tuæ, quæsumus, Domine, unitatis et pacis propitius dona concede: quæ sub oblatis muneribus mystice designantur.*

Passage ID: III.13.1; exact source and collation state are recorded in the passage inventory.

Map the petition and identify the antecedent of *quæ*.

Answer / notes: Imperative *concede*, object *dona*, defining genitives *unitatis et pacis*, recipient *Ecclesiae tuæ*; *propitius* predicative with implicit divine subject. Neuter plural *quæ* refers to *dona*; they are mystically signified under the offered gifts, *sub oblatis muneribus*.

2. Why can *quæ* refer neither to *Ecclesiae* nor to *pacis*?

Answer / model: *quæ* is neuter plural nominative, matching *dona*; *Ecclesiae* is feminine singular genitive/dative and *pacis* feminine singular genitive.

3. Change the petition to singular *donum* and adjust the relative clause.

Answer / model: *unitatis et pacis propitius donum concede: quod sub oblato munere mystice designatur.*

4. Parse *oblatis* and give its head and verbal family.

Answer / model: Perfect passive participle ablative neuter plural agreeing with *muneribus*, from *offero*, *offerre*, *obtuli*, *oblatus*; related *oblatus*.

5. Answer in Latin: *Quæ dona Ecclesiae concedi petuntur?*

Answer / model: *Dona unitatis et pacis Ecclesiae concedi petuntur.*

6. Write a two-clause Latin imitation asking that the gift of faith be granted and manifested in good works.

Answer / model: Model: *Fidei donum nobis, Domine, concede: quod in bonis operibus manifestetur.*

Solution III.16 — Variant D**Worksheet ID:** III.16**Focus:** Genre discrimination**Use:** Decide whether each clause looks toward offering or received effect.

1. Classify and justify: *dona concede, quæ sub muneribus designantur*.

Answer / model: Secret-like: offered *munera* signify gifts being sought; the language moves from oblation/sign to grace.

2. Classify and justify: *Fac nos sempiterna fruitione repleti*.

Answer / model: Postcommunion-like: it asks for an enduring effect/fullness after reception.

3. For *Hæc nos communio, Domine, purget a crimine*, parse *hæc, communio, purget, crimine*.

Answer / model: *hæc* nominative feminine singular demonstrative agreeing with *communio*; subject of third singular present jussive subjunctive *purget*; *nos* object; *a crimine* separation. This is a constructed genre drill.

4. Rewrite the preceding sentence for plural *mysteria* while preserving sense.

Answer / model: *Hæc nos mysteria, Domine, purgent a crimine*.

5. Create a four-column family for gift, offering, reception, and effect, with two Latin nouns in each.

Answer / model: Model: gift *donum, munus*; offering *oblatio, hostia*; reception *perceptio, sumptio*; effect *fructus, medela* (other defensible families accepted).

6. **Text:** *Munera nostra, quæsumus, Domine, propitius suscipe: ut corda nostra tua gratia renoventur*.

Passage ID: III.16.1; exact source and collation state are recorded in the passage inventory.

State whether this is authentic quotation or controlled imitation, then parse it fully.

Answer / notes: It is controlled imitation, not cited Missal text. *suscipe* imperative with object *munera nostra*; *propitius* predicative; *quæsumus* parenthetical. Result/purpose *ut ... renoventur*, subject *corda nostra*, means/cause *tua gratia*.

Part VII

Scope and Sources

CHAPTER 10

Scope and Qualifications

10.1 Packet boundary

This is module EL-III.4, *Secrets and Postcommunions: Gift and Effect*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This is grammatical and lexical genre study, not a sacramental or theological exposition.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

10.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

10.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 11

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

11.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

11.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

11.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
