

Ecclesiastical Latin

EL-III.5: Lessons and Epistles: Argument on the Page

Recover a connected reading's argument, quotation levels, temporal relations, and exhortative movement directly from its Latin connectors and clauses

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-III.5
Course stage	Stage III — Independent Missal Reading
Prerequisites	EL-III.4 and reliable analysis of multi-clause prose
Observable outcome	Recover a connected reading's argument, quotation levels, temporal relations, and exhortative movement directly from its Latin connectors and clauses
Printed practice	Worksheets III.17 (Advent argument map, Variant A) and III.20 (prophetic unseen logic, Variant D), with terminal keys
Extension bank	Worksheets III.18 and III.19 remain optional tradition-narrative and indirect-statement practice
Next dependency	EL-III.6, Gospels

1.1 Two focused sessions

Session 1 — guided acquisition. Build a complete connector-and-claim map and complete Worksheet III.17.

Session 2 — transfer and gate. Apply the map to a new prophetic or epistolary passage in Worksheet III.20 and write a direct summary that cites Latin evidence.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Map a fresh connected reading into claims, grounds, contrasts, inferences, quotations, and exhortations; account for every finite and non-finite form; and summarize the argument without following a published translation.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- discourse connector, claim, reason, contrast, inference, and exhortation;
- perfect event, present consequence, and future or hortatory response;
- quotation, reported content, and authorial comment; and
- argument-map notation tied to exact Latin forms.

2.2 High-risk contrast

A clause map records grammatical dependence; an argument map records what each clause does in the reasoning. A sound reading needs both and may not infer logic from paragraph position alone.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 3

Lessons and Epistles: Argument on the Page

On completing this unit, you can:

- map argument markers and pronoun reference in Vulgate prose;
- construe indirect statement, participial chains, and biblical idiom;
- summarize a lesson's logical movement before translating individual words.

The liturgical heading *Lectio Epistolæ beati Pauli Apostoli* is not part of Paul's sentence. Likewise *Fratres* is a liturgical vocative added or retained at the reading's opening. Mark such frames before tracing an argument. Then circle *enim*, *autem*, *ergo*, *itaque*, *igitur*, *quoniam*, *sicut*, and *sed*. These small words reveal the skeleton that freer word order hides.

A **Lesson** is a proclaimed scriptural reading; an **Epistle** is a Lesson presented under an epistolary heading or drawn from an apostolic letter. The label does not change the quoted passage's grammar. An **argument** is an ordered movement from grounds through relations such as contrast or inference to a claim or exhortation. An **argument connector** is a word that signals one of those relations: a reason supports a claim, a contrast sets opposed members against each other, and an inference presents a conclusion as following from what precedes.

3.1 Exhortation built on time

Fratres: Scientes quia hora est iam nos de somno surgere. Nunc enim propior est nostra salus, quam cum credidimus. Nox præcessit, dies autem appropinquavit. Abiciamus ergo opera tenebrarum, et induamur arma lucis.

Source: *Missale Romanum* (1962), Dominica I Adventus, Epistola (Rom. 13:11–12).

scientes agrees with the implied plural addressees and introduces the reason for the exhortation. After *hora est*, the accusative-infinitive phrase *nos ... surgere* states what it is time for. Comparative *propior* agrees with *salus*; *quam cum credidimus* compares the present with the time when belief began. The paired perfects establish the new situation; *abiciamus* and passive *induamur* are hortatory subjunctives. *opera tenebrarum* and *arma lucis* make the ethical contrast concrete.

3.2 Tradition received and handed on

A **participial phrase** consists of a participle with its complements and modifiers. Because a participle is verbal but agrees adjectivally with a noun or pronoun, its agreement identifies its participant while its tense normally expresses time relative to the governing verb, not an independent absolute date.

Ego enim accepi a Domino quod et tradidi vobis: quoniam Dominus Iesus, in qua nocte tradebatur, accepit panem, et gratias agens fregit.

Source: *Missale Romanum* (1962), In Cena Domini and In festo Sanctissimi Corporis Christi, Epistola (1 Cor. 11:23–24).

The neuter relative *quod* is simultaneously what Paul received and what he handed on. The dative *vobis*

belongs to *tradidi*. In *in qua nocte*, *qua* is a relative adjective agreeing with *nocte*; no separate antecedent is printed: “on which night.” Imperfect passive *tradebatur* and perfect active *accepit* deliberately place betrayal and gift together. *gratias agens* is a present participial phrase whose action accompanies and precedes *fregit*.

3.3 A difficult indirect statement

An **indirect statement** reports a thought, perception, or assertion as a dependent accusative-and-infinitive construction: the reported subject is accusative and its verb infinitive. A predicate noun or adjective within that construction normally agrees with the accusative subject. Do not confuse this with direct quotation, which preserves the speaker’s finite wording.

Hoc enim sentite in vobis, quod et in Christo Iesu: qui cum in forma Dei esset, non rapinam arbitratus est esse se æqualem Deo: sed semetipsum exinanivit, formam servi accipiens.

Source: Missale Romanum (1962), Dominica II Passionis seu in Palmis, Epistola (Phil. 2:5–7).

The imperative *sentite* asks for the disposition that is also in Christ; *quod* supplies the comparison’s content. Concessive or circumstantial *cum ... esset* frames the main contrast. With *arbitratus est*, the indirect statement is *se esse æqualem Deo*: *se* is its accusative subject, *æqualem* predicate accusative, and *Deo* dative after *æqualis*. *rapinam* is the predicate complement of what he did not judge equality to be. The adversative *sed* turns to *semetipsum exinanivit*; *formam* is the object of participle *accipiens*.

3.4 Argument-map notation

In the margin write **R** for reason, **C** for contrast, **I** for inference, and **E** for exhortation. A useful summary is not yet a translation: “R: the hour has arrived; C: night/day; I/E: discard/put on.” This prevents a long English sentence from concealing the Latin logic.

An **argument map** records relations among propositions without replacing their wording. A **proposition** is the content asserted, denied, commanded, or entertained by a clause; several clauses may cooperate in one step of an argument, and one sentence may contain several propositions.

Advance when: on an unseen 200–300-word Epistle, you mark at least 90% of finite clauses and argument connectors, correctly resolve all sampled pronouns and indirect statements, and produce a five-step argument map plus a literal sense without a facing translation and with no more than eight lookups.

Part III

Enrichment by Submodule

CHAPTER 4

Connections, transfer, and retrieval

4.1 Exhortation built on time — enrichment and transfer

Connection. Temporal forms often create the premise from which an exhortation follows.

Transfer task. On Worksheet III.17's reading, place every finite form on a past/present/future-or-response line and draw the connector that turns description into exhortation.

Retrieval check. Identify which mood, not an English helper verb, marks the communal response.

4.2 Tradition received and handed on — enrichment and transfer

Connection. A reported tradition contains nested speakers, actions, and time relations.

Transfer task. Using the lesson's already printed institution narrative, make a three-level ledger for narrator, reported speaker, and quoted or enacted content.

Retrieval check. For one infinitive or relative clause, name its controller and relative time.

4.3 A difficult indirect statement — enrichment and transfer

Connection. Accusative forms in indirect statement must be tested as subjects and predicates before they are called objects.

Transfer task. Take the lesson's difficult example, bracket the infinitive construction, and label controller, accusative subject, predicate or complement, and relative time.

Retrieval check. State why converting every accusative into a direct object destroys the construction.

4.4 Argument-map notation — enrichment and transfer

Connection. A compact notation is useful only when another reader can reconstruct the evidence behind every arrow.

Transfer task. Turn one selected worksheet paragraph into six numbered propositions joined by labeled arrows; cite the Latin connector or mood beside every arrow.

Retrieval check. Mark one relation that context supplies without a dedicated conjunction.

Part IV

Selected Practice

CHAPTER 5

Unit III.5: Lessons and Epistles

Worksheet III.17 — Variant A

Worksheet ID: III.17

Focus: Advent argument map

Use: Label reason, contrast, inference, exhortation.

1. **Text:** *Scientes quia hora est iam nos de somno surgere. Nunc enim propior est nostra salus, quam cum credidimus. Nox præcessit, dies autem appropinquavit. Abiciamus ergo opera tenebrarum, et induamur arma lucis.*

Passage ID: III.17.1; exact source and collation state are recorded in the passage inventory.

Map the argument and all non-indicative forms.

-
2. Explain *hora est nos surgere*.

-
3. Why is *propior* nominative feminine singular?

-
4. Contrast the voices of *abiciamus* and *induemur*; name each object/complement.

-
5. Answer in Latin: *Cur opera tenebrarum abicienda sunt?*

-
6. Write a four-line argument summary using only Latin nouns and infinitives.
-

Worksheet III.20 — Variant D**Worksheet ID:** III.20**Focus:** Prophetic lesson and unseen logic**Use:** Begin with the imperatives.

1. **Text:** *Surge, illuminare, Ierusalem: quia venit lumen tuum, et gloria Domini super te orta est. Quia ecce tenebrae operient terram, et caligo populos: super te autem orietur Dominus.*

Passage ID: III.20.1; exact source and collation state are recorded in the passage inventory.

Map commands, reasons, contrasts, and future forms.

-
2. Why is *illuminare* an imperative rather than infinitive?

-
3. Distinguish *orta est* from *orietur*.

-
4. Resolve the subjects and ellipsis around *operient*.

-
5. Answer in Latin: *Quid super Ierusalem ortum est, et quis orietur?*

-
6. Give a four-step logic map.
-

Part VI

Answer Key

CHAPTER 7

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 8

Enrichment models and rubrics

Exhortation built on time — model and rubric

Connection. Temporal forms often create the premise from which an exhortation follows.

Model / acceptable evidence. The model separates completed circumstance, present condition, and hortatory subjunctives, then cites the inference or transition marker. A timeline without clause force is incomplete.

Tradition received and handed on — model and rubric

Connection. A reported tradition contains nested speakers, actions, and time relations.

Model / acceptable evidence. A passing ledger never assigns a reported action to the narrator merely because the nouns are nearby; every level cites a finite governor, quotation boundary, or relative antecedent.

A difficult indirect statement — model and rubric

Connection. Accusative forms in indirect statement must be tested as subjects and predicates before they are called objects.

Model / acceptable evidence. The model attaches the full accusative-infinitive unit to its governing verb and distinguishes its internal subject from any object. It gives the infinitive's time relative to the controller.

Argument-map notation — model and rubric

Connection. A compact notation is useful only when another reader can reconstruct the evidence behind every arrow.

Model / acceptable evidence. Each node states one proposition; arrows name relations such as reason, contrast, inference, or command. An implicit relation is accepted only when its sequence and clause force are explained rather than asserted.

CHAPTER 9

Unit III.5: Lessons and Epistles

Solution III.17 — Variant A

Worksheet ID: III.17

Focus: Advent argument map

Use: Label reason, contrast, inference, exhortation.

1. **Text:** *Scientes quia hora est iam nos de somno surgere. Nunc enim propior est nostra salus, quam cum credidimus. Nox præcessit, dies autem appropinquavit. Abiciamus ergo opera tenebrarum, et induamur arma lucis.*

Passage ID: III.17.1; exact source and collation state are recorded in the passage inventory.

Map the argument and all non-indicative forms.

Answer / notes: R: *scientes quia hora est ... surgere*; R introduced by *enim*: salvation nearer; C: night passed/day approached; I/E with *ergo*: hortatory *abiciamus, induamur*. *nos* is accusative subject of infinitive *surgere*; *cum credidimus* is temporal comparison.

2. Explain *hora est nos surgere*.

Answer / model: *hora est* introduces what it is time for; *nos* is accusative subject and *surgere* present active infinitive in an accusative-infinitive content phrase.

3. Why is *propior* nominative feminine singular?

Answer / model: It is a comparative adjective agreeing with feminine singular subject *salus*.

4. Contrast the voices of *abiciamus* and *induemur*; name each object/complement.

Answer / model: *abiciamus* active with object *opera tenebrarum*; *induemur* passive, with accusative of thing put on *arma lucis* in the biblical construction.

5. Answer in Latin: *Cur opera tenebrarum abicienda sunt?*

Answer / model: *Opera tenebrarum abicienda sunt quia nox præcessit et dies appropinquavit.*

6. Write a four-line argument summary using only Latin nouns and infinitives.

Answer / model: Model: *Hora surgendi. Salus propior. Nox præterita, dies appropinquans. Opera abicere et arma lucis induere.*

Solution III.20 — Variant D

Worksheet ID: III.20

Focus: Prophetic lesson and unseen logic

Use: Begin with the imperatives.

1. **Text:** *Surge, illuminare, Ierusalem: quia venit lumen tuum, et gloria Domini super te orta est. Quia ecce tenebræ operient terram, et caligo populos: super te autem orietur Dominus.*

Passage ID: III.20.1; exact source and collation state are recorded in the passage inventory.

Map commands, reasons, contrasts, and future forms.

Answer / notes: Commands *surge, illuminare*, vocative *Ierusalem*. First *quia*: perfect *venit* with subject *lumen*; *gloria ... orta est* perfect deponent. Second reason: future *operient* with subject *tenebræ* and object *terram*; strict parallel supplies *caligo [operiet] populos*. Adversative *autem*: future deponent *orietur*, subject *Dominus*. Source: In Epiphania Domini, Lectio (Is. 60:1–2).

2. Why is *illuminare* an imperative rather than infinitive?

Answer / model: It is the second singular present passive imperative of active *illumino, illuminare*, literally “be illumined,” coordinated with *surge*; the final *-re* is the regular present passive imperative ending.

3. Distinguish *orta est* from *orietur*.

Answer / model: Both from deponent *orior*: third singular perfect (has arisen) and third singular future (will arise).

4. Resolve the subjects and ellipsis around *operient*.

Answer / model: Plural *tenebræ* is the subject of plural *operient*, with object *terram*. In the balanced second member, singular *caligo* is subject and *populos* object; supply singular *[operiet]* from strict parallel rather than making *caligo* agree with the printed plural verb.

5. Answer in Latin: *Quid super Ierusalem ortum est, et quis orietur?*

Answer / model: *Gloria Domini super Ierusalem orta est, et Dominus super eam orietur.*

6. Give a four-step logic map.

Answer / model: E: arise/be illumined; R: light and glory have arisen; R/C: darkness will cover earth/peoples; C/promise: the Lord will arise over Jerusalem.

Part VII

Scope and Sources

CHAPTER 10

Scope and Qualifications

10.1 Packet boundary

This is module EL-III.5, *Lessons and Epistles: Argument on the Page*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. The two selected readings establish a reusable mapping process; they do not sample every scriptural author or lesson genre in the Missal.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

10.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

10.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 11

References

The following works are the course’s controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

11.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See’s Biblia Clerus project: <https://www.clerus.org/bibliacclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

11.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

11.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every

historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
