

Ecclesiastical Latin

EL-GATE-IV: Advanced Reading and Composition Assessment Sequence

Portfolio defenses A-A and delayed A-B after modules EL-A1 through EL-A8

A detachable assessment sequence with learner forms, scoring protocol, and terminal solutions. It is not a two-session learning module and must not be used as a substitute for the prerequisite modules.

Corpus 1962 *Missale Romanum*; Vulgate and ecclesiastical prose as supporting readers

Method Print, annotate, parse, copy, transform, translate, and compose by hand

Pacing A multi-sitting assessment sequence; follow the local delay and aid rules

Document Stage assessment; learner and terminal-key edition

Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Assessment Protocol

CHAPTER 1

Use, timing, and decision

Complete A-A with the logged primary and reference tools permitted by the form. Score each advanced rubric category separately: source control, grammatical analysis, register and rhetoric, collation or allusion evidence, composition, and revision defense. Every required category must reach at least 3/4; an unsupported source claim is not rescued by fluent prose. Revise the portfolio after feedback and delay, then complete A-B on a second unfamiliar proper from a different category.

CHAPTER 2

Common assessment protocol

The Foundations, Core Grammar, and Advanced gates have two parallel forms. Take Form A after the teaching volume and selected worksheets, and Form B only after a delay, on a different day, as confirmation. At the Missal-reading stage, Forms M-A and M-B are designated-formulary diagnostics: they test sustained work but deliberately revisit material used in instruction. M-C is the terminal transfer gate and requires two genuinely unfamiliar formularies.

Use ink and no solution manual. Unless a form says otherwise, use no parser, facing translation, or dictionary. Correct every error, write its rule in the ledger, and remediate by worksheet family.

For composition, the supplied answer is a model rather than the only possible Latin. Score an alternate answer by morphology, government, intended sense, and whether its construction can be defended from a grammar or credible ecclesiastical model.

For a definition item, a memorized label without a deciding feature is incomplete. A passing response states what the term includes, distinguishes its nearest confusable neighbor where requested, and attaches the definition to a defensible Latin example or reading decision.

For a percentage, establish the denominator before beginning. Each requested form or parse feature is one point. Each connected-reading or analytical item has four points: forms, syntax/evidence, sense, and completeness. Each composition has four points: morphology/agreement, government/syntax, propositional accuracy, and defensible idiom. Add earned and available points within the named category; do not average an omitted item away or award one indivisible point to a many-part answer. The scoring sheet remains with the error ledger.

CHAPTER 3

Scoring and remediation map

Gate	Minimum evidence	If the floor is missed	Worksheet route
F	90% morphology; 85% reading; controlled composition without repeated error	Return to the specific paradigm and reproduce it from memory; then use a mixed passage	F unit form, parse, and transformation variants
C	85% clause analysis and comprehension; defensible multi-clause composition	Reclassify every clause before translating; isolate sequence or non-finite errors	C unit syntax map plus reconstruction/composition variant
M	Two complete unfamiliar Masses read without facing translation; grammar spot checks sound	Return to genre workflow; reduce translation and increase Latin summary; log lookups	M genre family and a parallel full-formulary sheet
A	Every advanced rubric category at least 3/4; source claims documented	Revise the failed category; obtain an informed reader for persistent free composition errors	A register/allusion/rhetoric or staged-composition family

Passing a gate does not require finishing all worksheets. Failing a gate does not require restarting a volume. The error pattern chooses the work.

Part II

Learner Forms

CHAPTER 4

Gate IV: Advanced Reading and Composition

A-A. Advanced portfolio defense, Form A

Assessment ID: A-A

Level: End of Volume IV

Conditions: Select an unfamiliar universal-calendar proper by a blind method. No facing translation. Dictionary, concordance, grammar, and primary texts are allowed and must be logged.

1. *Item ID: A-A.1*

Define and distinguish **quotation**, **adaptation**, **formula**, **echo**, and **parallel**; name the evidence that warrants each label.

2. *Item ID: A-A.2*

Prepare a diplomatic transcription of one prayer from the 1962 page image and collate it against two transcriptions.

3. *Item ID: A-A.3*

Write six-line grammatical notes on five difficult forms.

4. *Item ID: A-A.4*

Prepare two allusion dossiers, one secure and one downgraded/rejected.

5. *Item ID: A-A.5*

Diagram the proper's longest prayer or lesson period and write a functional rhetorical analysis.

6. *Item ID: A-A.6*

Write a 150–250 word Latin commentary on one text.

7. *Item ID: A-A.7*

Compose a collect-shaped Latin exercise using a different architecture from the selected proper.

8. *Item ID: A-A.8*

Defend ten grammatical or lexical decisions from the two compositions.

9. *Item ID: A-A.9*

Write the final direct-reading report.

A-B. Advanced portfolio defense, Form B

Assessment ID: A-B

Level: End of Volume IV, delayed confirmation

Conditions: Choose a second unfamiliar proper from a different season and saint/temporal category. Same tools and documentation as A-A.

1. *Item ID: A-B.1*

Define **diplomatic transcription**, **normalization**, **collation**, and **register**; explain how silent normalization or silent import from a comparison witness can corrupt an analysis.

2. *Item ID: A-B.2*

Read the entire Mass in order before consulting any external aid; write a contemporaneous Latin outline.

3. *Item ID: A-B.3*

Build a register comparison between its Gospel/lesson, collect, chant, and rubric.

4. *Item ID: A-B.4*

Investigate three possible allusions, including one possible morphological adaptation and one possible broader contextual echo.

5. *Item ID: A-B.5*

Collate and comment on one variant that affects grammar or sense.

6. *Item ID: A-B.6*

Compose a 150–250 word Latin meditation in a declared register.

7. *Item ID: A-B.7*

Transform the meditation into a 100-word expository note with a different audience and syntax.

8. *Item ID: A-B.8*

Write a 200-word English self-audit comparing Forms A and B.

9. *Item ID: A-B.9*

State and defend graduation readiness.

Part III

Solutions and Rubrics

CHAPTER 5

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 6

Gate IV: Advanced Reading and Composition

A-A. Advanced portfolio defense, Form A

Assessment ID: A-A

Level: End of Volume IV

Conditions: Select an unfamiliar universal-calendar proper by a blind method. No facing translation. Dictionary, concordance, grammar, and primary texts are allowed and must be logged.

1. *Item ID: A-A.1*

Define and distinguish **quotation**, **adaptation**, **formula**, **echo**, and **parallel**; name the evidence that warrants each label.

Answer / model: A quotation securely reproduces sustained, distinctive wording; an adaptation recognizably alters such wording for a new setting; a formula is conventional language that need not point to one source; an echo is a plausible but less demonstrable activation of another text; a parallel is a useful resemblance without a dependence claim. Verbal density, rarity, morphology, context, transmission, and competing sources scale the label.

2. *Item ID: A-A.2*

Prepare a diplomatic transcription of one prayer from the 1962 page image and collate it against two transcriptions.

Answer / model: Key rubric: accurate base; witnesses named; orthographic/punctuation/substantive differences separated; uncertainty marked; no silent hybrid.

3. *Item ID: A-A.3*

Write six-line grammatical notes on five difficult forms.

Answer / model: Each note must include lemma/morphology, governor/function, clause relation, contextual sense, source/parallel, and genuine alternative or reason it fails.

4. *Item ID: A-A.4*

Prepare two allusion dossiers, one secure and one downgraded/rejected.

Answer / model: Use exact text and source context; mark overlap/adaptation; weigh rarity, density, context, formula, and alternative sources; claims no stronger than evidence.

5. *Item ID: A-A.5*

Diagram the proper's longest prayer or lesson period and write a functional rhetorical analysis.

Answer / model: All clauses and non-finite forms accounted for; rhetorical labels proved from Latin forms and connected to movement of thought.

6. *Item ID: A-A.6*

Write a 150–250 word Latin commentary on one text.

Answer / model: Score morphology, syntax, precise lexicon, cohesion, consistent ecclesiastical register, documentation, and principled revision. It must explain rather than translate the passage.

7. *Item ID: A-A.7*

Compose a collect-shaped Latin exercise using a different architecture from the selected proper.

Answer / model: Must be labeled composition exercise; include address, ground, petition, and end; all borrowed phrasing logged; no repeated form/government error.

8. *Item ID: A-A.8*

Defend ten grammatical or lexical decisions from the two compositions.

Answer / model: Each defense cites construction and evidence; a first dictionary gloss is not a defense.

9. *Item ID: A-A.9*

Write the final direct-reading report.

Answer / model: State what was understood directly, what was inferred, what required lookup, and how the Latin's source/rhetoric changed comprehension. Include residual uncertainties.

A-B. Advanced portfolio defense, Form B

Assessment ID: A-B

Level: End of Volume IV, delayed confirmation

Conditions: Choose a second unfamiliar proper from a different season and saint/temporal category. Same tools and documentation as A-A.

1. *Item ID: A-B.1*

Define **diplomatic transcription**, **normalization**, **collation**, and **register**; explain how silent normalization or silent import from a comparison witness can corrupt an analysis.

Answer / model: A diplomatic transcription reproduces the chosen witness's visible forms and conventions; normalization deliberately converts specified features to a declared house style. Collation is the systematic comparison of witnesses to record and classify differences; comparison itself does not create a hybrid, but silently importing a comparison reading into the base does. Register is a pattern of linguistic choices associated with a situation, purpose, and text kind, not a simple scale from bad to good Latin. Silent normalization destroys witness evidence; an unrecorded imported reading creates a hybrid text; an undefined register claim turns observation into impression.

2. *Item ID: A-B.2*

Read the entire Mass in order before consulting any external aid; write a contemporaneous Latin outline.

Answer / model: Outline must capture propositions of every proper text with sound simple Latin; later corrections remain visible in another color.

3. *Item ID: A-B.3*

Build a register comparison between its Gospel/lesson, collect, chant, and rubric.

Answer / model: Cite morphology shared across registers and features that genuinely distinguish biblical, prayer, poetic, and instructional discourse.

4. *Item ID: A-B.4*

Investigate three possible allusions, including one possible morphological adaptation and one possible broader contextual echo.

Answer / model: Use dossiers and evidence-scaled labels. A documented negative result is a complete finding when the evidence does not support an allusion.

5. *Item ID: A-B.5*

Collate and comment on one variant that affects grammar or sense.

Answer / model: If selected witnesses contain none, document that result and analyze the most significant punctuation/orthography difference without inflating it.

6. *Item ID: A-B.6*

Compose a 150–250 word Latin meditation in a declared register.

Answer / model: Plan by propositions; maintain source/idiom ledger; revise in skeleton, concord, and idiom passes; score at least 3 in every advanced-rubric category.

7. *Item ID: A-B.7*

Transform the meditation into a 100-word expository note with a different audience and syntax.

Answer / model: The second piece must reorganize rather than merely delete; document changes in clause architecture, connective logic, and lexicon.

8. *Item ID: A-B.8*

Write a 200-word English self-audit comparing Forms A and B.

Answer / model: Use evidence: lookup rate, false lemma hypotheses, morphology/syntax errors, direct Latin summary, source work, and composition revision. Name the next reading practice, not a completion date.

9. *Item ID: A-B.9*

State and defend graduation readiness.

Answer / model: Ready requires direct reading of several complete unfamiliar formularies selected across distinct temporal, sanctoral, and genre categories of the 1962 Missal, without facing translation; dictionary use limited to genuine vocabulary; reliable grammar explanation; and a composition portfolio meeting every rubric floor. This finite sample does not establish prior reading of every page or every category. Otherwise name exact remediation and retest evidence.

Part IV

Scope and Sources

CHAPTER 7

Scope and Qualifications

7.1 Companion role

This publication is EL-GATE-IV, *Advanced Reading and Composition Assessment Sequence*, in Triptych's print-first Ecclesiastical Latin curriculum. It contains the two advanced portfolio-defense forms and their rubrics. It does not imply that a mature portfolio or independent research dossier can be created within two days.

It supports the 46 learning modules but does not replace their prerequisite, practice, enrichment, and mastery sequence. Build and revise the portfolio over time; use A-B only after a delayed second unfamiliar selection.

7.2 Corpus, review, and rights

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. This is a language-study aid, not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment.

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; this leaf's companion map records its selection. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. This publication therefore remains a working build on hold, not an installed or released PDF.

CHAPTER 8

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

8.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather

than unsourced transcriptions, should decide doubtful punctuation or spelling.

- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

8.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

8.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
