Course Handbook

CHAPTER 1

Using This Modular Curriculum

This curriculum is organized as a course guide, a complete reference grammar, 46 independently printable learning modules, and four stage-assessment sequences. The four stages retain the original prerequisite order, while each learning module now puts its local reference decisions, lesson, enrichment, selected practice, work record, and matching key in one packet.

Begin with this guide. Keep the Reference Grammar available for wider lookup, then work through module IDs EL-I.1 through EL-A8 in order. A normal module is planned as two focused sessions and prints two contrasting worksheet variants. Correct them in another color and use the two omitted variants only when the error record identifies a persistent family or a delayed-recall need.

Every module's solutions are in its terminal *Answer Key* part. Do not consult that part until the corresponding work and mastery decision are complete. Open composition answers are models or rubrics, not claims that only one Latin sentence can be correct. Stage assessments are separate multi-sitting sequences and are not included in a module's two-session workload promise.

The course distinguishes source passages from teaching examples by citation and inventory: an excerpt named as Missal, Vulgate, scriptural, or historical wording is received material; worksheet readings carry stable passage IDs that map to the repository passage inventory; uncited short drills and model compositions are project-composed unless a local note says otherwise. Each packet's terminal Scope and Qualifications appendix explains its boundary; the course-wide research records govern editions, normalization, rights, and review.

The first decision

If the entry assumptions below are true, read *The destination* and begin the six-pass study loop. If formal English grammar or the structure of the 1962 Mass is unfamiliar, acquire that prerequisite first; the course uses both but does not teach either from the beginning.

CHAPTER 2

The destination

This curriculum treats Latin as a language to be read and written, not as a code in which each word is mechanically replaced by an English word. Its governing practical test is the *Missale Romanum* (1962). A graduate should be able to open the book at an unfamiliar Mass, identify the grammatical spine of each text, follow the argument or prayer directly in Latin, and consult a dictionary only for genuinely unfamiliar vocabulary or names. A facing translation should no longer be the medium through which the Latin is understood.

The course assumes complete knowledge of the shape of the Mass. It therefore does not explain when the Introit occurs, what a Collect does liturgically, or how a Common is selected. It asks instead why an Introit may omit a verb, why a Collect so often moves from a relative clause through a petition to a purpose clause, and how a participle or subjunctive controls the sense.

2.1 What “complete” means

The linguistic range includes:

- the Ordinary, including the prayers spoken quietly by the celebrant;
- the Roman Canon, prefaces, and the recurring ceremonial formulas;
- the Proper of Time, Proper of Saints, Commons, votive formularies, Requiem texts, and the principal Holy Week texts found in the 1962 book;
- scriptural lessons and chant texts, treated as Latin prose or poetry;
- rubrical Latin as a specialized reading register; and
- selected Vulgate and historical reading that introduces sources, echoes, and inherited habits of liturgical Latin.

No finite course can pre-teach every rare word in every local feast. Completion therefore means grammatical and lexical independence with the universal 1962 corpus, plus the ability to approach an unfamiliar local proper in the same way an advanced reader approaches any new author. It does not mean memorizing an English rendering of every page.

2.2 What is deliberately absent

Pronunciation, singing, chant notation, ceremonial instruction, and historical arguments about liturgical reform are outside scope. Accent marks and vowel quantity appear only where they help distinguish forms or use a dictionary. The course is descriptive of the Latin encountered in the chosen corpus.

CHAPTER 3

How to study without a calendar

There are no weeks, daily quotas, or completion dates. Learning modules use two focused sessions as a planning envelope, but a learner may finish a transparent module quickly and repeat a difficult one over several sittings. Prerequisites, practice evidence, and gates—not elapsed time—govern advancement.

3.1 Definition and restatement policy

This course does not assume Latin grammatical terminology. A term is taught as part of the material, not used as a password that the learner is expected to know already. Boxed entries headed **Definition** give the course’s working meaning. The reference volume gathers the essential definitions in one place, while each teaching volume defines a term again where it first becomes necessary.

Important definitions are deliberately restated when a term has not appeared for some time, when a familiar word acquires a more exact grammatical meaning, or when two constructions are easy to confuse. A restatement may be shorter than the first definition, but it must still say what the thing *is*, not merely list its endings or provide an example. Repetition here is retrieval practice, not an editorial accident.

Definition — working definition. A concise statement of the features needed to recognize and use a concept at the present stage. Later units may refine it, but may not silently contradict it.

Definition — mastery gate. An unseen task that tests whether the learner can retrieve and apply a unit's knowledge without following its worked example. A gate measures stable control; it is not a quota of pages completed.

Definition — worksheet variant. One of several interchangeable practice sets for the same target. Variants permit selective repetition; they are not a sequence that every learner must finish.

When a definition still feels abstract, use a four-part notebook entry:

1. copy the definition exactly;
2. underline the feature that distinguishes the term from its nearest rival;
3. supply one Latin example and label the decisive evidence; and
4. write one non-example or contrast and explain why it does not qualify.

Knowing a label is never enough. To demonstrate knowledge of a term, the learner must be able to identify it in an unseen sentence, cite the evidence, and use it accurately in controlled composition when the construction permits.

3.2 The six-pass study loop

1. Read the lesson once without taking notes.
2. Copy every paradigm and worked Latin example by hand.
3. Close the lesson and retrieve the new definitions and forms from memory; for each definition, state the decisive feature and add an example or contrast before checking it.
4. Complete two contrasting worksheet variants in ink.
5. Check in a different color, explain each correction in writing, and choose more practice only where the error pattern persists.
6. Attempt the unit gate on an unseen text before advancing.

The loop is intentionally physical. Handwriting slows recognition just enough to reveal endings, forces a choice rather than a click, and leaves an artifact that can be compared with later work. Typed work may supplement but should not replace the first handwritten attempt.

3.3 The error ledger

Keep one bound notebook divided into five recurring families:

1. form identification;
2. agreement and government;
3. clause boundaries and syntax;
4. vocabulary or idiom; and
5. composition and word choice.

For every corrected error, record the original decision, the corrected form or analysis, the rule that decides between them, and one new example of your own. “Careless” is not a rule. “I read *gratia* as nominative although *cum* governs the ablative” is useful evidence.

3.4 How many worksheets?

Every unit has four variants because learners need different amounts and kinds of repetition. Its normal module prints two deliberately contrasting sheets; the local plan identifies them. Use the two unprinted variants only for remediation or delayed retrieval, then attempt the gate.

Result	Meaning	Next action
At least 90% forms and 85% reading, with no repeated structural error	The unit is available under mild pressure	Advance; revisit by cumulative retrieval later.
Correct meaning but unstable parsing	Recognition is outrunning control	Choose a parsing or reconstruction variant and write the governing rule.
Correct forms but weak connected reading	Paradigms are isolated facts	Choose a passage and clause-mapping variant.
Reading is sound but composition breaks agreement	Comprehension is ahead of production	Choose controlled transformation before another free task.
The same error appears three times	The rule has not become operational	Return to the named lesson, copy the worked example, and choose two targeted variants.

No student is expected to complete every variant. Doing so before every gate would turn a diagnostic bank into busywork and delay the mixed, cumulative reading that produces fluency.

CHAPTER 4

The four-volume course

4.1 Volume I: Foundations

Volume I builds reliable control of ordinary morphology and simple clauses. It begins with Latin sentence architecture and dictionary forms, then develops the noun, adjective, pronoun, and verb systems through recurring Missal phrases. Controlled composition starts immediately: changing number, replacing a noun, turning active into passive, and producing short governed phrases.

Unit	Center	Observable result
I.1	English grammar to Latin forms	Mark subjects, predicates, objects, modifiers, and clauses; read dictionary entries and course orthography.
I.2	Case, number, gender, agreement	Explain a nominal form by its function, agreement, or governing word.
I.3	First and second declensions	Produce complete paradigms, including neuters and vocatives, and use them in governed phrases.
I.4	Third declension	Recover stems and distinguish consonant, i-stem, and neuter patterns in connected reading.
I.5	Fourth and fifth declensions	Complete the noun system and discriminate ambiguous endings by syntax.
I.6	Adjectives and agreement	Make modifiers agree without assuming that linked endings must look identical.

Unit	Center	Observable result
I.7	<i>sum</i> and <i>possum</i>	Control all six indicative tenses, predicate constructions, ellipsis, and complementary infinitives.
I.8	Present active system	Parse and produce present, imperfect, and future active forms in all conjugations.
I.9	Perfect active system	Relate perfect, pluperfect, and future perfect to principal parts and narrative time.
I.10	Passive and deponent verbs	Form both passive systems, track agreement and agency, and read deponents by form and sense.
I.11	Pronouns and prepositions	Follow government, agreement, and reference through recurring liturgical phrases.
I.12	Consolidated Missal reading	Apply the seven-pass method to connected texts and produce controlled sentences.

Advance when: on a fresh paragraph containing ordinary indicative verbs and nouns from all five declensions, identify at least 90% of forms, justify the case of each noun, give an accurate direct reading, and compose six controlled sentences with no repeated agreement error.

4.2 Volume II: Core grammar

Volume II supplies the clause structures that make mature liturgical prose compact. It completes pronouns and comparison, then treats infinitives, participles, the full subjunctive system, subordinate clauses, conditions, commands, verbal nouns, periphrastics, and marked word order.

Unit	Center	Observable result
II.1	Pronoun systems	Track reference through relative and demonstrative chains.
II.2	Comparison, adverbs, numerals	Read degree and measure without forcing English syntax onto Latin.
II.3	Infinitives and indirect statement	Locate the controlling verb, accusative subject, and relative time.
II.4	Participles and ablative absolute	Expand compressed modifiers into explicit clauses and recompress them accurately.
II.5	Subjunctive forms and sequence	Produce every tense and distinguish time from aspect and sequence.
II.6	Purpose, result, indirect command	Classify <i>ut/ne</i> clauses from governing context and internal signals.
II.7	Substantive clauses	Explain how a complete clause fills a nominal role required by its governing expression.
II.8	Temporal, causal, concessive clauses	Distinguish indicative facts from circumstantial or speaker-framed relations.
II.9	Conditions	Read protasis and apodosis as one system and identify the speaker's stance.

Unit	Center	Observable result
II.10	Relative clauses of characteristic	Distinguish an identifying fact from a characteristic, result-like, or causal relative use.
II.11	Commands, wishes, and fearing	Control imperatives, independent subjunctives, prohibitions, and fear clauses.
II.12	Gerund, gerundive, supine, periphrastics	Recognize obligation, purpose, and verbal-noun functions.
II.13	Case syntax	Control place, time, means, manner, cause, and special government.
II.14	Word order, ellipsis, attraction	Reconstruct the grammatical spine of compressed liturgical sentences.

Advance when: on an unseen Collect and a connected Vulgate paragraph, map every clause, parse every finite and non-finite verb, justify the principal case uses, and write a literal structural version before a natural English version; then compose a controlled six-clause prayer from supplied vocabulary.

4.3 Volume III: Independent Missal reading

Volume III reorganizes knowledge by genre. The question is no longer “Which chapter taught this construction?” but “What does this kind of text normally omit, foreground, repeat, or inherit?” The learner reads complete units and then whole formularies with English progressively removed.

Unit	Genre	Reading problem
III.1	Independent-reader workflow	Map clauses, propose lemmas, control lookups, reconstruct order, and record uncertainty.
III.2	Ordinary	Formula, coordination, embedded confession and petition.
III.3	Collects	Relative openings, imperative petitions, purpose clauses, and mediated conclusions.
III.4	Secrets and Postcommunions	Dense sacrificial and sacramental lexicon.
III.5	Lessons and Epistles	Long argument, anaphora, quotation, and Pauline periods.
III.6	Gospels	Narrative tense, direct speech, historical present, and Semitic coordination.
III.7	Chants and sequences	Ellipsis, poetic order, parallelism, and scriptural fragments.
III.8	Prefaces and Canon	Long periodic syntax, relative chains, and solemn formula.
III.9	Temporal cycle	The recurring vocabulary and images of seasons.
III.10	Sanctoral and Commons	Genre transfer, specialized vocabulary, and reusable formulary patterns.
III.11	Requiem and Holy Week	Poetic, prophetic, and ceremonial compression across distinctive complete corpora.
III.12	Whole-Mass capstones	Sustained direct reading without a facing translation.

Advance when: select an unfamiliar Sunday and an unfamiliar feast. Without a facing translation, read every Latin text in order, annotate clause structure and only genuinely unknown words, summarize each text directly from the Latin, and explain five syntactic decisions chosen at random.

4.4 Volume IV: Advanced reading and composition

Volume IV asks what an already competent reader asks: why this word rather than its synonym; which scriptural context is activated; how an inherited phrase is adapted; what a rhetorical pattern does; and how to write new prose without merely calquing English.

Unit	Center	Production result
A1	Diachronic and ecclesiastical register	Distinguish inherited classical syntax, late usage, biblical idiom, and liturgical convention.
A2	Vulgate texture and Semitisms	Recognize coordination, cognate patterns, calques, and scriptural cadence.
A3	Allusion and typology	Trace a phrase to its broader source and explain what the liturgical reuse presupposes.
A4	Rhetoric and periodic prose	Analyze balance, anaphora, antithesis, hyperbaton, clausula, and sound pattern without reducing them to labels.
A5	Textual comparison and commentary	Collate variants and write a concise grammatical and literary note.
A6	Controlled imitation	Preserve a model's syntax while changing its vocabulary and theological proposition.
A7	Guided composition	Move from supplied frame through partial outline to a coherent paragraph or collect.
A8	Free composition and research	Write, revise, defend, and annotate original ecclesiastical prose.

Advance when: produce an independent commentary on an unseen proper that treats grammar, vocabulary, source, allusion, and rhetoric; then compose and revise a short Latin collect and a 150–250 word prose meditation whose syntax and word choices can be defended from credible models.

CHAPTER 5

From translation to direct reading

Translation is used early as a diagnostic because it exposes whether relations have been understood. It is then deliberately withdrawn.

1. **Volumes I–II:** write a structural English version that keeps Latin relations visible, followed by natural English.
2. **Early Volume III:** annotate in Latin symbols and give an English summary, not a line-by-line rendering.
3. **Late Volume III:** paraphrase simple clauses in easier Latin and answer comprehension questions in Latin.
4. **Volume IV:** use English chiefly for literary commentary. The text itself should be understood and discussed from its Latin form.

Never hide a grammatical uncertainty beneath elegant English. A clumsy literal version that reveals the syntax is more useful during training than polished prose built on a mistaken subject or clause relation.

CHAPTER 6

Tools and dictionary discipline

Look up a word only after recording a morphological hypothesis: lemma, part of speech, likely form, and likely function. Then choose the dictionary sense that fits the construction and context. Copying the first gloss is not reading.

For an unseen passage, mark words in three classes:

- **known directly**;
- **inferable** from form, family, or context; and
- **lookup required** because the word or idiom remains genuinely unknown.

The exit standard permits the third class for rare names and uncommon proper vocabulary. It does not permit a facing translation or a parser that makes the grammatical decisions for the learner.

CHAPTER 7

Assessment and records

The assessment volume contains parallel forms at four major gates. Take Form A closed-book except where the directions explicitly permit a dictionary. Mark it with the separate key, write an error analysis, and remediate by worksheet family. Form B is a later confirmation, not an immediate second guess.

Use one page of a notebook for each gate:

Date and assessment form

Conditions and aids used

Morphology score

Syntax and comprehension
score

Composition score

Repeated error families

Chosen remediation sheets

Delayed confirmation
date/result

Fluency is retained access. After every major gate, continue a small amount of cumulative copying, parsing, and direct reading while beginning the next stage.

Part II

Reusable Practice Forms

CHAPTER 1

Blank Forms for Repeated Work

Unit start and practice choice

State evidence, not a deadline. Choose two contrasting worksheet variants before adding more.

Name _____ Date _____

Unit/text _____ Form _____

Prerequisite evidence

What I can already do unaided

New observable skill

First worksheet
(forms/parsing)

Second worksheet
(reading/composition)

Gate text/form

What would trigger more
practice

Retrieval prediction: Before opening the lesson, write what you expect the new rule to connect to.

Blank noun paradigm

Fill from memory, then correct in another color and state every syncretic form.

Name _____ Date _____

Noun, adjective, and pronoun parsing

One row per printed form. Do not consult a parser.

Name _____ Date _____

Unit/text _____ Form _____

Form	Lemma	Morphology	Head/governor	Function/evidence
------	-------	------------	---------------	-------------------

Verb and clause parsing

Classify the clause before assigning a contextual subjunctive label.

Name _____ Date _____

Unit/text _____ Form _____

Form	Lemma	Morphology	Subject	Clause/use/complements
------	-------	------------	---------	------------------------

Copy the printed sentence first. Preserve every form when reconstructing. Put supplied words in brackets.

Unit/text _____ Form _____

[illegible]

Structural and natural reading

Use structural English to expose grammar, then rewrite naturally without changing the claim.

Name _____ Date _____

Unit/text _____ Form _____

Latin text/citation:

Structural version (retain clause and modifier relations):

[illegible]

Natural version:

[illegible]

One uncertainty the polished version could conceal:

Unseen-text lookup discipline

Write a morphology/function hypothesis before every dictionary lookup.

Name _____ Date _____

Unit/text _____ Form _____

Form	Lemma hypothesis	Form/function hypothesis	Confirmed entry/sense	Why it fits
------	---------------------	-----------------------------	--------------------------	-------------

False lookup that better morphology would have prevented: _____

A correction is incomplete until the deciding rule and a new example are written.

Unit/text _____ Form _____

Original decision	Correct analysis/form	Deciding rule/evidence	New example
-------------------	--------------------------	------------------------	-------------

19

Vocabulary family

Learn construction and semantic range, not an isolated gloss.

Name _____ Date _____

Unit/text _____ Form _____

Lemma/principal parts: _____

Word family and compounds:

Constructions/case government:

Three source contexts and precise senses:

Tempting but wrong first-gloss use:

Original controlled sentence:

Definition and contrast ledger

Turn a technical label into a rule that can decide a real analysis. Restate it here whenever a later unit gives it a narrower or more advanced use.

Name _____ Date _____

Unit/text _____ Form _____

Term and grammatical category: _____

Precise definition—the feature that makes an instance belong:

What the definition does *not* claim:

Nearest confusable term: _____

Deciding contrast between them:

Canonical Latin example, with the defining feature marked:

Fresh Latin example of my own:

Later context in which I needed this restatement:

Collect syntax map

Knowledge of liturgical function is assumed; analyze the language.

Name _____ Date _____

Unit/text _____ Form _____

Address: _____

Ground (relative/participial/appositional material):

Main petition and complements:

Purpose/result/content:

Conclusion and antecedents:

Ablatives, non-finite forms, and ellipsis:

One-sentence direct Latin summary:

Allusion dossier

Classify quotation, adaptation, formula, echo, or parallel only after inspecting context.

Name _____ Date _____

Unit/text _____ Form _____

Liturgical phrase and full parse:

Proposed source plus context window:

Exact overlap / morphological adaptation:

Evidence for:

Evidence against / alternative source:

Final classification and contribution to reading:

Rhetorical analysis

A figure earns a place only when exact Latin forms prove it and its work is explained.

Name _____ Date _____

Unit/text _____ Form _____

Sentence and grammatical spine:

Pattern/figure with exact corresponding forms:

Relation to word order and clause structure:

Effect on progression, contrast, emphasis, or closure:

Rejected overclaim:

Controlled imitation:

Keep a diplomatic base separate from a normalized reading.

Unit/text _____ Form _____

Part III

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Companion role

This publication is EL-GUIDE, *Course Guide and Reusable Practice Forms*, in Triptych's print-first Ecclesiastical Latin curriculum. It contains the course destination, study method, complete stage and module roadmap, advancement rules, and reusable blank forms. It contains no teaching module, worksheet answer bank, or assessment form.

It supports the 46 learning modules but does not replace their prerequisite, practice, enrichment, and mastery sequence. Read the guide before EL-I.1 and return to individual forms only when a module calls for them.

1.2 Corpus, review, and rights

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. This is a language-study aid, not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment.

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; this leaf's companion map records its selection. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. This publication therefore remains a working build on hold, not an installed or released PDF.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather

than unsourced transcriptions, should decide doubtful punctuation or spelling.

- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.

CHAPTER 3

Generation Metadata
