

Ecclesiastical Latin

EL-II.7: Substantive Clauses

Identify the noun slot filled by a clause and classify volitive, fact/result, factual, hindrance, doubt, and indirect-question dependencies

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.7
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.6 mastery: distinguish purpose, result, and indirect command from converging evidence
Observable outcome	Identify the noun slot filled by a clause and classify volitive, fact/result, factual, hindrance, doubt, and indirect-question dependencies
Printed practice	Worksheets II.25 (guided Variant A) and II.28 (independent Variant D), with terminal keys
Extension bank	Worksheets II.26 and II.27 remain optional remediation or delayed-recall variants
Next dependency	EL-II.8, Temporal, Causal, and Concessive Clauses

1.1 Two focused sessions

Session 1 — guided acquisition. Build the governor-to-noun-slot dependency diagram and classify the principal substantive-clause families, then complete Worksheet II.25 as the guided application.

Session 2 — transfer and gate. Resolve mixed *ut/ne*, factual, *quin/quominus*, and indirect-question clauses in context, complete Worksheet II.28 independently, and compose the five controlled models.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Identify the noun slot and clause family in ten mixed examples with at least 90 percent accuracy, analyze one unseen collect from address through petition, and write all five controlled models with correct marker, mood, and sequence.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- clause as subject, object, apposition, or predicate complement;
- volitive *ut/ne*, fact/result *ut/ut non*, and factual *quod/quia/quoniam*;
- *quin* and *quominus* after appropriate negative hindrance or doubt; and
- indirect questions with an interrogative signal, subjunctive, and sequence.

2.2 High-risk contrast

A substantive clause is defined by the noun slot it fills, not merely by its marker. The same *ut*-shape may be volitive or fact/result according to its governor and dependency.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Substantive clauses: a clause acting as a noun

On completing this unit, you can:

- identify a clause serving as subject, object, apposition, or complement;
- distinguish volitive *ut/ne*, fact/result *ut/ut non*, and factual *quod/quia/quoniam*;
- recognize *quin* and *quominus* after negative hindrance or doubt;
- form indirect questions with an interrogative word, subjunctive, and proper sequence;
- analyze the conventional request structure of collects and the Canon.

1.1 Clause families

Volitive and result/content clauses

A **substantive clause** fills a noun slot as subject, object, apposition, or predicate complement; it does not merely modify a verb adverbially. A **volitive clause** communicates an act of will. Volitive clauses follow verbs and expressions of wishing, asking, causing, permitting, or deciding and use *ut/ne* + subjunctive. Indirect command is the most concrete subtype. A **result/content clause** states the fact or outcome that completes an impersonal expression. Such clauses use *ut/ut non* + subjunctive and occur after *fit*, *accidit*, *efficitur*, *restat* and expressions such as *dignum est*. No degree word is required when the clause itself completes the idea.

The question test is useful: in *rogamus ut venias*, “what do we ask?”—the clause is object/content. In *venimus ut oremus*, “why do we come?”—the clause is purpose.

Facts, doubt, and prevention

Quod, *quia*, and *quoniam* + indicative may introduce a fact (“the fact that”) or a stated reason. A subjunctive can distance the author from a reason attributed to someone else. After a negative expression of doubt, *quin* + subjunctive means “that”: *non dubito quin audiat*, “I do not doubt that he hears.” After prevention or refusal, *quominus* or *ne* + subjunctive means “from doing”: *nihil impedit quominus oremus*. These last patterns are less frequent in the Ordinary but prevent misreading in lessons and rubrics.

Indirect questions

A direct question becomes a substantive clause after asking, knowing, seeing, considering, or doubting: *Quid facit?* becomes *scio quid faciat*; after a historic verb, *sciebam quid faceret*. The interrogative keeps the case demanded inside its clause, but the finite verb is subjunctive and follows sequence. Yes/no questions use *num*; alternatives use *utrum* ... *an* or simply *-ne* ... *an*. Do not confuse interrogative *quid faciat*, “what he does,” with headless relative *quod facit*, “what/the thing that he does.”

The liturgical request frame

A collect often has this architecture:

Deus [address], *qui* ... [relative ground], *concede/quæsumus* [request], *ut* ... [content or desired result].

The colon or semicolon does not create the syntax. Find the finite request, then attach the *ut*-clause as what is requested. Vocatives, appositions, and a long relative clause may stand between them.

1.2 Reading the forms in context

Worked example: the Canon's substantive request

Worked passage ID: W.II.26; exact source and collation state are recorded in the passage inventory.

Te igitur, clementissime Pater, supplices rogamus ac petimus, uti accepta habeas et benedicas hæc dona, hæc munera, hæc sancta sacrificia illibata.

Analysis. Archaic *uti* equals *ut*. Its two present subjunctives *habeas* and *benedicas* give the content of *rogamus ac petimus*. Fronted *te* is object of the asking verbs; *supplices* agrees with the implicit *nos*.

Translation. “Therefore, most merciful Father, we humbly ask and petition you to hold acceptable and bless these gifts, these offerings, these holy and unblemished sacrifices.”

Worked example: content after worthiness before Communion

Worked passage ID: W.II.27; exact source and collation state are recorded in the passage inventory.

Domine, non sum dignus ut intres sub tectum meum.

Analysis. *Ut intres* completes the respect in which the speaker is not worthy; it is a substantive clause of content, not the purpose for being unworthy. Present subjunctive *intres* follows present *sum*.

Translation. “Lord, I am not worthy that you should enter beneath my roof.”

Worked example: subject/content after happening (Luke 10:31)

Worked passage ID: W.II.28; exact source and collation state are recorded in the passage inventory.

Accidit autem ut sacerdos quidam descenderet eadem via.

Analysis. The *ut*-clause supplies what happened and is the logical subject of impersonal *accidit*. Imperfect *descenderet* follows the historical perfect.

Translation. “It happened that a certain priest was going down by the same road.”

Worked example: a stated fact (Galatians 4:6)

Worked passage ID: W.II.29; exact source and collation state are recorded in the passage inventory.

Quoniam autem estis filii, misit Deus Spiritum Filii sui in corda vestra.

Analysis. *Quoniam* introduces as fact the ground for *misit*; *estis* is indicative, not subjunctive. The clause is causal in relation to the main sentence, while its proposition is asserted as true.

Translation. “And because you are sons, God sent the Spirit of his Son into your hearts.”

Worked example: an indirect question (John 6:6)

Worked passage ID: W.II.30; exact source and collation state are recorded in the passage inventory.

Hoc autem dicebat tentans eum: ipse enim sciebat quid esset facturus.

Analysis. Interrogative *quid* is the neuter accusative object of the action in *facturus*. Imperfect subjunctive *esset*, governed by historic *sciebat*, combines with the future active participle to make that action subsequent to the knowing.

Translation. “He said this to test him, for he himself knew what he was going to do.”

1.3 Writing laboratory

Copy a collect from the Missal. Box the address, underline the relative ground once, the request twice, and bracket its substantive clause. Rewrite the sentence in prose order without deleting a word.

Compose: “We ask that you bless these gifts”; “We ask that you not abandon us”; “It happened that the priest came”; “I do not doubt that God hears”; “Nothing prevents us from praying.” Use *rogare*, *benedicere*, *derelinquere*, *accidere*, *dubitare*, *impedire* and state why each marker is *ut*, *ne*, *quin*, or *quominus*.

Advance when: in ten mixed examples you identify the noun slot and clause family with at least 90% accuracy, analyze one unseen collect from address through petition, and write all five controlled models with correct marker, mood, and sequence.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 Clause families — enrichment and transfer

Connection. A governor dependency diagram shows both the clause's noun slot and the construction licensed by its governor.

Transfer task. For every family in the lesson, put the governing expression in a left box, the marker and mood in a center box, and the filled noun slot in a right box. Add a separate label for volitive, fact/result, factual, hindrance/doubt, or indirect question.

Retrieval check. Name the four noun slots a substantive clause can fill.

1.2 Reading the forms in context — enrichment and transfer

Connection. Near-identical surface clauses can fill different slots or express different dependencies.

Transfer task. Choose four contrasting lesson examples. For each, bracket the whole clause, draw its syntactic link to the governor, label the noun slot, then state the narrowest family and the evidence.

Retrieval check. Explain why factual *quod/quia/quoniam* is not automatically interchangeable with fact/result *ut*.

1.3 Writing laboratory — enrichment and transfer

Connection. Controlled composition checks whether governor, marker, mood, sequence, and noun slot work as one system.

Transfer task. Complete the lesson's five models. Above each clause write the governor, slot, family, marker, and sequence; then make one model negative without changing its family.

Retrieval check. State why a grammatically correct subjunctive is still insufficient when the governor does not license the intended construction.

Part IV

Selected Practice

CHAPTER 1

Substantive clauses: parallel forms

V2.7A — Substantive clauses A**Worksheet ID:** II.25**Focus:** noun slots, volitive content, fact clauses, *quin***Use:** Name the noun role: subject, object, apposition, or complement.

1. Identify the role of *ut venias* in *Rogamus ut venias*.
-

2. Identify the role in *Accidit ut sacerdos veniret*.
-

3. Negate *Petimus ut nos derelinquas*.
-

4. Complete *Non dubito _____ Deus audiat*.
-

5. Make *Quid facit?* indirect after *Scit*.
-

6. **Text:** *Te igitur, clementissime Pater, supplices rogamus ac petimus, uti accepta habeas et benedicas hæc dona.*

Passage ID: II.25.1; exact source and collation state are recorded in the passage inventory.

This controlled abridgment omits the Christological mediation phrase before *supplices*; find the governing verbs and substantive clause.

7. Write in Latin: “It remains that we receive what has been offered.”
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

V2.7D — Substantive clauses D**Worksheet ID:** II.28**Focus:** noun slots, volitive content, fact clauses, *quin***Use:** Name the noun role: subject, object, apposition, or complement.

1. Label the architecture: *Deus, qui nos amas, concede ut te amemus.*
-

2. Correct *Rogamus ut non discedas* to the regular volitive negative.
-

3. Distinguish *quod* pronoun and conjunction: *Accipimus quod das; gaudemus quod das.*
-

4. Complete *Fieri non potest _____ Deus mentiatur.*
-

5. Write an alternative indirect question: “He asks whether the priest or the servant is coming.”
-

6. **Text:** *Quoniam autem estis filii, misit Deus Spiritum Filii sui in corda vestra.*

Passage ID: II.28.1; exact source and collation state are recorded in the passage inventory.

Explain the force and mood of *quoniam*; translate.

7. Write a four-part miniature collect using address, relative ground, request, and substantive content.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

Part V**Mastery Decision****CHAPTER 1**

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

Clause families — model and rubric

Connection. A governor dependency diagram shows both the clause's noun slot and the construction licensed by its governor.

Model / acceptable evidence. The diagram must distinguish subject, object, apposition, and predicate complement. Each construction label must be supported by the governor and marker; the marker alone cannot substitute for the dependency.

Reading the forms in context — model and rubric

Connection. Near-identical surface clauses can fill different slots or express different dependencies.

Model / acceptable evidence. Each connective belongs to an attested construction and presents content differently. The answer must preserve the lesson's governor, mood, and dependency instead of treating English "that" as proof of interchangeability.

Writing laboratory — model and rubric

Connection. Controlled composition checks whether governor, marker, mood, sequence, and noun slot work as one system.

Model / acceptable evidence. All five models must use the specified lexical governors and appropriate markers and mood. The negative transformation must choose the family-specific marker. A complete rubric requires a valid dependency, not only a well-formed isolated verb.

CHAPTER 3

Selected worksheet solutions

CHAPTER 4

Substantive clauses: parallel forms

V2.7A — Substantive clauses A

Worksheet ID: II.25

Focus: noun slots, volitive content, fact clauses, *quin***Use:** Name the noun role: subject, object, apposition, or complement.

1. Identify the role of *ut venias* in *Rogamus ut venias*.
Answer / model: It is the object/content of *rogamus*: what we ask. It is volitive substantive *ut*.
2. Identify the role in *Accidit ut sacerdos veniret*.
Answer / model: The *ut*-clause is logical subject/content of impersonal *accidit*: what happened.
3. Negate *Petimus ut nos derelinquas*.
Answer / model: *Petimus ne nos derelinquas*. Volitive content uses *ne*.
4. Complete *Non dubito _____ Deus audiat*.
Answer / model: *quin*; after negative doubt, “I do not doubt that God hears.”
5. Make *Quid facit?* indirect after *Scit*.
Answer / model: *Scit quid faciat*. *Quid* remains accusative object; present subjunctive follows primary sequence.
6. **Text:** *Te igitur, clementissime Pater, supplices rogamus ac petimus, uti accepta habeas et benedicas hæc dona.*
Passage ID: II.25.1; exact source and collation state are recorded in the passage inventory.
This controlled abridgment omits the Christological mediation phrase before *supplices*; find the governing verbs and substantive clause.
Answer / notes: *Rogamus ac petimus* govern archaic *uti*; *habeas* and *benedicas* give requested content. “Therefore, most merciful Father, we humbly ask and petition you to hold acceptable and bless these gifts.”
7. Write in Latin: “It remains that we receive what has been offered.”
Answer / model: *Restat ut quod oblatum est accipiamus*. The *ut*-clause is logical subject of *restat*; factual *quod oblatum est* is nested within it.

V2.7D — Substantive clauses D

Worksheet ID: II.28

Focus: noun slots, volitive content, fact clauses, *quin***Use:** Name the noun role: subject, object, apposition, or complement.

1. Label the architecture: *Deus, qui nos amas, concede ut te amemus*.
Answer / model: *Deus*: address; *qui nos amas*: relative ground; *concede*: request; *ut te amemus*: substantive content desired.
2. Correct *Rogamus ut non discedas* to the regular volitive negative.
Answer / model: *Rogamus ne discedas*.
3. Distinguish *quod* pronoun and conjunction: *Accipimus quod das; gaudemus quod das*.
Answer / model: First *quod* is accusative headless relative, object of *das*; second is conjunction “that/because,” introducing a fact.
4. Complete *Fieri non potest _____ Deus mentiatur*.

Answer / model: *ut*: a substantive result/content clause, “It cannot happen that God lie.”

5. Write an alternative indirect question: “He asks whether the priest or the servant is coming.”

Answer / model: *Rogat utrum sacerdos an servus veniat*. One subjunctive serves the two alternative subjects.

6. **Text:** *Quoniam autem estis filii, misit Deus Spiritum Filii sui in corda vestra*.

Passage ID: II.28.1; exact source and collation state are recorded in the passage inventory.

Explain the force and mood of *quoniam*; translate.

Answer / notes: It introduces an asserted factual cause and therefore has indicative *estis*. “And because you are sons, God sent the Spirit of his Son into your hearts.”

7. Write a four-part miniature collect using address, relative ground, request, and substantive content.

Answer / model: Model: *Deus, qui populum tuum custodis, concede, quæsumus, ut in pace tibi serviamus*.

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-II.7, *Substantive Clauses*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet presents the course's major substantive families; individual governors retain their attested constructions and lexical limits.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source

roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
