

Ecclesiastical Latin

EL-II.11: Commands, Prohibitions, Wishes, and Fearing

Map speaker, addressee, person, negation, time, and reality across imperatives, jussives, prohibitions, wishes, and fear clauses

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.11
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.10 mastery: distinguish factual, characteristic, and related relative uses
Observable outcome	Map speaker, addressee, person, negation, time, and reality across imperatives, jussives, prohibitions, wishes, and fear clauses
Printed practice	Worksheets II.41 (guided Variant A) and II.44 (independent Variant D), with terminal keys
Extension bank	Worksheets II.42 and II.43 remain optional remediation or delayed-recall variants
Next dependency	EL-II.12, Gerund, Gerundive, Supine, and Passive Periphrastic

1.1 Two focused sessions

Session 1 — guided acquisition. Build the speaker/addressee/negation map for direct commands, jussives, hortatory forms, and prohibitions, then complete Worksheet II.41 as the guided application.

Session 2 — transfer and gate. Classify fulfilled, possible, and unfulfilled wishes and preserve the reversed logic of fear-clause markers, then complete Worksheet II.44 independently.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Form fifteen commands or prohibitions with no more than one error, identify the time and reality of all six wish samples, and translate four fear clauses without reversing the feared event.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- present and future imperatives and the lesson's common irregular commands;
- jussive and hortatory subjunctives for first and third persons;
- ordinary negative-command patterns; and
- wishes by time/reality and fear clauses whose *ne/ut* logic differs from purpose.

2.2 High-risk contrast

Command form depends on speaker, addressee, and grammatical person. In fear clauses, *ne* ordinarily marks the event feared will happen, while *ut* marks the event feared will not happen; purpose-clause negation cannot be imported mechanically.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Commands, prohibitions, wishes, and fearing

On completing this unit, you can:

- form present and future imperatives, including common irregulars;
- use jussive and hortatory subjunctives for first and third persons;
- distinguish the ordinary prohibition patterns;
- read fulfilled, possible, and unfulfilled wishes and the reversed negatives of fear.

1.1 Direct volition

An **imperative** directly issues a command, most commonly to a second person. A **jussive subjunctive** expresses a third-person command; a **hortatory subjunctive** urges first-person plural action (“let us”). A **prohibition** is a negative command. An **optative subjunctive** expresses a wish, while a **fear clause** names the event whose occurrence or nonoccurrence is feared. These labels identify distinct uses even when English renders several with “may” or “let.”

Imperatives and jussives

	<i>amo</i>	<i>moneo</i>	<i>rego</i>	<i>capio</i>	<i>audio</i>
2 sg. active	ama	mone	rege	cape	audi
2 pl. active	amate	monete	regite	capite	audite
2 sg. passive	amare	monere	regere	capere	audire
2 pl. passive	amamini	monemini	regimini	capimini	audimini

Four frequent singular active forms drop *-e*: *dic*, *duc*, *fac*, *fer*; plurals are *dicite*, *ducite*, *facite*, *ferite*. Present subjunctive supplies first- and third-person commands: *oremus*, “let us pray” (hortatory); *veniat*, “let him come” (jussive). Future imperatives, common in law and rubrics, use *-to/-tote/-nto*; the essential forms of *sum* are *esto*, *estote*, *sunto*.

Prohibition, wish, and fear

A direct second-person prohibition normally uses *noli/nolite* + infinitive: *nolite timere*. *Ne* + perfect subjunctive can give a sharp prohibition (*ne timueris*); present subjunctive with *ne* is common in prayers and third persons (*ne respicias*).

A possible or fulfilled wish uses present/perfect subjunctive, often with *utinam*; an unfulfilled present wish uses imperfect, and an unfulfilled past wish pluperfect: *utinam adsit*; *utinam adesset*; *utinam adfuisset*. Liturgical *fiat*, *sit*, *requiescat* is frequently optative or jussive without *utinam*.

After a verb of fearing, *ne* introduces what one fears will happen; *ut* or *ne non* introduces what one fears will not happen. Translate the fear, not the marker word mechanically: *timeo ne veniat*, “I fear that he may come”; *timeo ut veniat*, “I fear that he may not come.”

1.2 Reading the forms in context

Worked example: institution commands in the Canon

Worked passage ID: W.II.44; exact source and collation state are recorded in the passage inventory.

Accipite et manducate ex hoc omnes: hoc est enim Corpus meum.

Analysis. *Accipite* and *manducate* are second-person plural present active imperatives. *Omnes* is a substantival nominative vocative-like address; the prepositional phrase *ex hoc* refers to what is received.

Translation. “All of you, take and eat of this, for this is my Body.”

Worked example: prayerful prohibition before the Peace

Worked passage ID: W.II.45; exact source and collation state are recorded in the passage inventory.

Ne respicias peccata mea, sed fidem Ecclesiae tuæ; eamque secundum voluntatem tuam pacificare et coadunare digneris.

Analysis. Present subjunctives *respicias* and *digneris* express negative and positive petitions. *Ne* negates the first; *sed* supplies the contrast. Deponent *digneris* governs infinitives *pacificare et coadunare*.

Translation. “Look not upon my sins, but upon the faith of your Church; and be pleased to give her peace and unity according to your will.”

Worked example: jussive prayer in the Pater noster

Worked passage ID: W.II.46; exact source and collation state are recorded in the passage inventory.

Fiat voluntas tua, sicut in cælo et in terra.

Analysis. *Fiat* is third-person singular present subjunctive of *fi*, used independently as a jussive/optative. Nominative *voluntas tua* is its subject.

Translation. “May your will be done, as in heaven and on earth.”

Worked example: unfulfilled wish (Apocalypse 3:15)

Worked passage ID: W.II.47; exact source and collation state are recorded in the passage inventory.

Utinam frigidus esses aut calidus!

Analysis. *Utinam* marks a wish. Imperfect subjunctive *esses* shows that the desired present state is contrary to fact.

Translation. “Would that you were cold or hot!”

Worked example: fear of a completed possibility (Galatians 4:11)

Worked passage ID: W.II.48; exact source and collation state are recorded in the passage inventory.

Timeo vos, ne forte sine causa laboraverim in vobis.

Analysis. *Ne* introduces what Paul fears may be true. Perfect subjunctive *laboraverim* is prior to present *timeo*; *forte* softens the feared possibility.

Translation. “I fear for you, lest perhaps I have labored among you in vain.”

1.3 Writing laboratory

Write the active and passive imperative grid, then add *dic, duc, fac, fer*. Copy *Accipite et manducate* and *Fiat voluntas tua*; label person and command type.

Give Latin for “Let us pray,” “Let him receive,” “Do not fear” (two patterns), “May they rest in peace,” “Would that he were here,” and “I fear that he will not come.” For the last item write both *ut* and *ne non* versions.

Advance when: you form fifteen direct commands/prohibitions with no more than one error, identify the time and reality of six wishes, and translate four fear clauses without reversing the feared event.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 Direct volition — enrichment and transfer

Connection. A speaker/addressee/person map selects imperative, jussive, or hortatory form before polarity is added.

Transfer task. Make rows for second-person command, first-person plural exhortation, and third-person jussive. Add positive and ordinary negative columns and fill them from the lesson.

Retrieval check. State which persons an ordinary imperative addresses and which mood supplies first- and third-person volition.

1.2 Reading the forms in context — enrichment and transfer

Connection. Wishes require both time and fulfillment status, while fear clauses require the feared proposition to be stated before translating the marker.

Transfer task. For each lesson wish, label present/past/future orientation and fulfilled, possible, or unfulfilled status. For each fear clause, write the feared event in neutral English before deciding how *ne*, *ut*, or *ne non* maps it.

Retrieval check. Recite the ordinary fear-clause marker logic.

1.3 Writing laboratory — enrichment and transfer

Connection. A controlled set tests whether person, polarity, wish reality, and feared event are chosen independently.

Transfer task. Complete the lesson's command, prohibition, wish, and fear prompts. Above each verb write speaker, addressee, person, mood, polarity, and time/reality where relevant.

Retrieval check. Explain why the same English “may” can represent more than one Latin use.

Part IV

Selected Practice

CHAPTER 1

Commands, wishes, and fear: parallel forms

V2.11A — Volition A**Worksheet ID:** II.41**Focus:** imperatives, jussives, prohibitions, wishes, fear**Use:** State person and why an independent subjunctive has its tense.

1. Give singular and plural imperatives of *amo*, *rego*, *audio*.
-

2. Give Latin: “Let us pray; let him come; let them receive.”
-

3. Prohibit “fear” in two regular ways.
-

4. Translate the reality: *utinam adsit* / *adesset* / *adfuisset*.
-

5. **Text:** *Accipite et manducate ex hoc omnes: hoc est enim Corpus meum.*

Passage ID: II.41.1; exact source and collation state are recorded in the passage inventory.

Parse commands and translate.

6. Write: “I fear that he may come; I fear that he may not come.”
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

V2.11D — Volition D**Worksheet ID:** II.44**Focus:** imperatives, jussives, prohibitions, wishes, fear**Use:** State person and why an independent subjunctive has its tense.

1. Give active imperatives of *cipio* and *fero*, singular/plural.
-

2. Distinguish *oramus* and *oremus*.
-

3. Give both singular and plural *noli* prohibitions for *recipere*.
-

4. Complete fear of failure: *Timuit* _____ *illi venirent*.
-

5. **Text:** *Fiat voluntas tua, sicut in cælo et in terra.*

Passage ID: II.44.1; exact source and collation state are recorded in the passage inventory.

Parse *fiat*; translate.

6. Compose a two-sentence prayer using imperative, prohibition, and fulfilled wish.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction's rule.

Part V**Mastery Decision****CHAPTER 1**

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

Direct volition — model and rubric

Connection. A speaker/addressee/person map selects imperative, jussive, or hortatory form before polarity is added.

Model / acceptable evidence. Imperatives ordinarily address second person; first-person plural and third-person volition use the subjunctive in hortatory or jussive use. Negative forms must follow the distinct prohibition patterns printed in the lesson rather than simply adding *non*.

Reading the forms in context — model and rubric

Connection. Wishes require both time and fulfillment status, while fear clauses require the feared proposition to be stated before translating the marker.

Model / acceptable evidence. The wish label must follow its tense and context. After a verb of fearing, *ne* introduces what is feared may happen; *ut* introduces what is feared may fail to happen; *ne non* can make the negative proposition explicit. The final English must not reverse it.

Writing laboratory — model and rubric

Connection. A controlled set tests whether person, polarity, wish reality, and feared event are chosen independently.

Model / acceptable evidence. Each form must match its intended person and construction; both fear versions must preserve the same feared proposition. English “may” can render a wish, jussive, possibility, or dependent subjunctive, so the Latin governor and clause relation decide the use.

CHAPTER 3

Selected worksheet solutions

CHAPTER 4

Commands, wishes, and fear: parallel forms

V2.11A — Volition A

Worksheet ID: II.41

Focus: imperatives, jussives, prohibitions, wishes, fear**Use:** State person and why an independent subjunctive has its tense.

1. Give singular and plural imperatives of *amo*, *rego*, *audio*.
Answer / model: *ama/amate, rege/regite, audi/audite*.
2. Give Latin: "Let us pray; let him come; let them receive."
Answer / model: *Oremus; veniat; accipiant*. Present subjunctives are hortatory/jussive.
3. Prohibit "fear" in two regular ways.
Answer / model: *Noli timere* (singular) or *nolite timere* (plural); sharp singular *ne timueris*.
4. Translate the reality: *utinam adsit / adesset / adfuisset*.
Answer / model: "May he be present / would that he were present (but is not) / would that he had been present (but was not)."
5. **Text:** *Accipite et manducate ex hoc omnes: hoc est enim Corpus meum*.
Passage ID: II.41.1; exact source and collation state are recorded in the passage inventory.
Parse commands and translate.
Answer / notes: *Accipite, manducate*: second plural present active imperatives. "All of you, take and eat of this, for this is my Body."
6. Write: "I fear that he may come; I fear that he may not come."
Answer / model: *Timeo ne veniat; timeo ut veniat* or *timeo ne non veniat*. Fear reverses the expected force of *ne*.

V2.11D — Volition D

Worksheet ID: II.44

Focus: imperatives, jussives, prohibitions, wishes, fear**Use:** State person and why an independent subjunctive has its tense.

1. Give active imperatives of *capio* and *fero*, singular/plural.
Answer / model: *cape/capite; fer/ferte*.
2. Distinguish *oramus* and *oremus*.
Answer / model: *Oramus*: present indicative, "we pray." *Oremus*: present subjunctive hortatory, "let us pray."
3. Give both singular and plural *noli* prohibitions for *recipere*.
Answer / model: *Noli recipere; nolite recipere*.
4. Complete fear of failure: *Timuit _____ illi venirent*.
Answer / model: *ut*, "He feared that they might not come"; historic sequence gives *venirent*.
5. **Text:** *Fiat voluntas tua, sicut in caelo et in terra*.
Passage ID: II.44.1; exact source and collation state are recorded in the passage inventory.
Parse *fiat*; translate.
Answer / notes: Third singular present subjunctive of *fiō*, independent jussive/optative with subject *voluntas tua*. "May your will be done, as in heaven and on earth."

6. Compose a two-sentence prayer using imperative, prohibition, and fulfilled wish.

Answer / model: Model: *Domine, audi nos et ne nos derelinquas. Sit nomen tuum benedictum.*

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-II.11, *Commands, Prohibitions, Wishes, and Fearing*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet teaches the main volitional and fear patterns in the course; tone and pastoral force are not inferred from morphology alone.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source

roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
