

Ecclesiastical Latin

EL-II.12: Gerund, Gerundive, Supine, and Passive Periphrastic

Distinguish verbal nouns and adjectives, convert object-taking gerunds to gerundives, and analyze purpose and obligation constructions

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.12
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.11 mastery: control commands, prohibitions, wishes, and fear-clause polarity
Observable outcome	Distinguish verbal nouns and adjectives, convert object-taking gerunds to gerundives, and analyze purpose and obligation constructions
Printed practice	Worksheets II.45 (guided Variant A) and II.48 (independent Variant D), with terminal keys
Extension bank	Worksheets II.46 and II.47 remain optional remediation or delayed-recall variants
Next dependency	EL-II.13, Place, Time, Means, Manner, and Cause

1.1 Two focused sessions

Session 1 — guided acquisition. Build the gerund-to-gerundive and purpose-form ladder, then complete Worksheet II.45 as the guided application.

Session 2 — transfer and gate. Distinguish future participle, gerundive, and supines in context; map personal and impersonal obligation with dative agent; then complete Worksheet II.48 independently.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Identify at least eleven of twelve mixed gerunds, gerundives, future participles, and supines; convert four object-taking gerunds with exact agreement; and compose personal and impersonal passive periphrastics with correct dative agent.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- gerund as neuter singular verbal noun in its surviving oblique cases;
- gerundive as a declining verbal adjective agreeing with a noun;
- preferred gerund-to-gerundive conversion when a direct object is present;
- accusative and ablative supines; and
- passive periphrastic obligation with personal or impersonal construction and dative agent.

2.2 High-risk contrast

A gerund is a verbal noun; a gerundive agrees as a verbal adjective. A future active participle expresses prospective active action, while a gerundive can contribute passive necessity; similar-looking stems do not make them interchangeable.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Gerund, gerundive, supine, and passive periphrastic

On completing this unit, you can:

- decline the gerund and distinguish it from a gerundive agreeing with a noun;
- convert an object-taking gerund phrase to the preferred gerundive construction;
- recognize the two surviving supines;
- translate obligation and identify the dative of agent in a passive periphrastic.

1.1 Verbal nouns and adjectives

Gerund

The gerund is a neuter singular verbal noun made from the present stem plus *-nd-*: first and second conjugations show *-and-*/*-end-*, third *-end-*, and third--*io*/fourth normally *-iend-*. It has no nominative; the infinitive serves there.

	Genitive	Dative (rare)	Accusative	Ablative
<i>amo</i>	<i>amandi</i>	<i>amando</i>	<i>ad amandum</i>	<i>amando</i>
<i>rego</i>	<i>regendi</i>	<i>regendo</i>	<i>ad regendum</i>	<i>regendo</i>
<i>audio</i>	<i>audiendi</i>	<i>audiendo</i>	<i>ad audiendum</i>	<i>audiendo</i>

The genitive depends on a noun/adjective (*tempus orandi*); accusative normally follows *ad* for purpose; ablative expresses means or follows a preposition. A gerund can govern an object, but Latin normally avoids it by putting that object into the gerund's case and making a gerundive agree: *ad offerendum hostiam* becomes the preferred *ad hostiam offerendam*.

Gerundive and passive periphrastic

The gerundive is a first/second-declension verbal adjective: *amandus*, *monendus*, *regendus*, *capiendus*, *audiendus*. It agrees with its noun and has passive force. In an attributive purpose phrase, translate idiomatically: *ad hostiam offerendam*, “for offering the victim.”

Gerundive + a form of *sum* is the passive periphrastic of necessity: *hostia offerenda est*, “the victim must be offered.” The person obliged is normally dative: *sacerdoti hostia offerenda est*, “the priest must offer the victim” (more literally, “the victim is to-be-offered for the priest”). With an intransitive verb the construction is impersonal and neuter singular: *nobis orandum est*, “we must pray.”

Supine

The supine is a fourth-declension verbal noun with only two live forms. Accusative *-um* may express purpose after motion (*venit oratum*, “he came to pray”). Ablative *-u* gives respect after certain adjectives (*mirabile dictu*, “wonderful to say”). It takes an object as a verb can. The construction is rare in the Missal and Vulgate, which prefer an infinitive, *ad* + gerund(ive), or a purpose clause; the reader's goal is recognition, not imitation everywhere.

1.2 Reading the forms in context

Worked example: genitive gerund (Ecclesiastes 3:2)

Worked passage ID: W.II.49; exact source and collation state are recorded in the passage inventory.

Tempus nascendi, et tempus moriendi.

Analysis. *Nascendi* and *moriendi* are genitive gerunds depending on *tempus*. Their deponent dictionary forms do not make these gerunds passive.

Translation. “A time for being born and a time for dying.”

Worked example: purpose gerund with an object (Psalm 91:3)

Worked passage ID: W.II.50; exact source and collation state are recorded in the passage inventory.

Ad annuntiandum mane misericordiam tuam, et veritatem tuam per noctem.

Analysis. Accusative gerund *annuntiandum* follows *ad* and governs objects *misericordiam* and *veritatem*. Regularized gerundive Latin would be *ad misericordiam tuam et veritatem tuam annuntiandas*.

Translation. “To proclaim your mercy in the morning and your truth through the night.”

Worked example: ablative gerund (Romans 15:13)

Worked passage ID: W.II.51; exact source and collation state are recorded in the passage inventory.

Deus autem spei repleat vos omni gaudio et pace in credendo.

Analysis. *Credendo* is ablative gerund after *in*, “in believing.” Present subjunctive *repleat* is an independent prayer; *vos* is its object.

Translation. “May the God of hope fill you with all joy and peace in believing.”

Worked example: necessity without a gerundive (1 Corinthians 9:16)

Worked passage ID: W.II.52; exact source and collation state are recorded in the passage inventory.

Necessitas enim mihi incumbit; vae enim mihi est, si non evangelizavero.

Analysis. Dative *mihi* marks the person under necessity, the same role a dative of agent has in *mihi evangelizandum est*. This authentic phrasing therefore provides a safe transformation model without pretending the Vulgate used a periphrastic here.

Translation. “For necessity lies upon me; indeed, woe is me if I do not preach the Gospel.”

Worked example: the Missal’s preferred purpose infinitive in the Creed

Worked passage ID: W.II.53; exact source and collation state are recorded in the passage inventory.

Et iterum venturus est cum gloria, iudicare vivos et mortuos.

Analysis. *Venturus est* is the future active periphrastic, “is going to come,” not a gerundive of obligation. Present infinitive *iudicare* expresses purpose where earlier Latin might use a supine after motion.

Translation. “And he will come again with glory to judge the living and the dead.”

1.3 Writing laboratory

Write the gerund paradigm for all five conjugations. Beside every form write a gerundive phrase in the same case: *orandi / orationis faciendæ; ad offerendum / ad hostiam offerendam*. Circle the noun that forces gerundive agreement.

Convert *ad laudandum Deum* to *ad Deum laudandum*; write “The gifts must be blessed by the priest” with dative agent; write “We must pray” impersonally; change *venit oratum* into an infinitive and then a purpose clause. Explain why *venturus* is not *veniendus*.

Advance when: you identify gerund, gerundive, future participle, and supine in twelve mixed forms with at least 11 correct, convert four gerund phrases with objects to exact gerundive agreement, and compose personal and impersonal passive periphrastics with the correct dative.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 Verbal nouns and adjectives — enrichment and transfer

Connection. A gerund-to-gerundive ladder separates the unchanged proposition from the new agreement structure.

Transfer task. Write the lesson's object-taking gerund phrase on the first rung. On the second, move the object into the gerundive's agreeing noun phrase; label case, number, gender, and unchanged verbal relation. Add a third rung showing a passive-periphrastic obligation.

Retrieval check. Define gerund and gerundive by part of speech and agreement behavior.

1.2 Reading the forms in context — enrichment and transfer

Connection. Form, attachment, and governor distinguish gerund, gerundive, future participle, and supine.

Transfer task. For the lesson's mixed examples, fill four fields: morphological form, agreeing controller if any, governing construction, and active/passive or obligation contribution.

Retrieval check. State the decisive difference between a future active participle and a gerundive.

1.3 Writing laboratory — enrichment and transfer

Connection. An obligation ladder makes subject and agent visible in personal and impersonal periphrastics.

Transfer task. Complete the lesson's personal and impersonal obligation prompts. Draw an arrow from gerundive to grammatical subject and another from the dative agent to the responsible person; mark where no personal subject is expressed.

Retrieval check. Explain why the dative agent is not the grammatical subject of the passive periphrastic.

Part IV

Selected Practice

CHAPTER 1

Gerund, gerundive, supine, and periphrastics: parallel forms

V2.12A — Verbal nouns A**Worksheet ID:** II.45**Focus:** gerund cases, gerundive agreement, necessity, supine**Use:** Distinguish form before choosing an idiomatic English construction.

1. Give the gerund of *amo* in genitive, dative, accusative with *ad*, and ablative.

-
2. Convert *ad laudandum Deum* to the preferred gerundive construction.

-
3. Write “The priest must offer the victim.”

-
4. Distinguish *oratum* and *oratu*.

-
5. **Text:** *Tempus nascendi, et tempus moriendi.*

Passage ID: II.45.1; exact source and collation state are recorded in the passage inventory.

Parse both verbal forms; translate.

-
6. Write in Latin: “We must pray, and the gifts must be blessed by the priest.”

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

V2.12D — Verbal nouns D**Worksheet ID:** II.48**Focus:** gerund cases, gerundive agreement, necessity, supine**Use:** Distinguish form before choosing an idiomatic English construction.

1. Explain why the infinitive supplies the gerund's missing nominative.

2. Parse *audiendi* in *ures audiendi*.

3. Write impersonal obligation with intransitive *eundum*.

4. Distinguish *venturus est* and *veniendus est*.

5. **Text:** *Necessitas enim mihi incumbit; vae enim mihi est, si non evangelizavero.*

Passage ID: II.48.1; exact source and collation state are recorded in the passage inventory.

Relate the dative to a periphrastic rewrite; translate.

6. Write a purpose three ways: "He came to pray."

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction's rule.

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

Verbal nouns and adjectives — model and rubric

Connection. A gerund-to-gerundive ladder separates the unchanged proposition from the new agreement structure.

Model / acceptable evidence. The gerund is a neuter singular verbal noun; the gerundive is a declining verbal adjective. The conversion must preserve the governing preposition or case function and the proposition while making the gerundive agree exactly with its noun.

Reading the forms in context — model and rubric

Connection. Form, attachment, and governor distinguish gerund, gerundive, future participle, and supine.

Model / acceptable evidence. A future active participle agrees with its controller and presents prospective active action; a gerundive is a passive verbal adjective and can participate in obligation. Supines and gerunds occupy their limited noun-like cases and do not agree with a controller.

Writing laboratory — model and rubric

Connection. An obligation ladder makes subject and agent visible in personal and impersonal periphrastics.

Model / acceptable evidence. The gerundive agrees with the grammatical subject in the personal construction; the dative names the person upon whom the obligation rests. In the impersonal construction the verbal adjective is neuter singular and no personal nominative subject is supplied.

CHAPTER 3

Selected worksheet solutions

CHAPTER 4

Gerund, gerundive, supine, and periphrastics: parallel forms

V2.12A — Verbal nouns A

Worksheet ID: II.45

Focus: gerund cases, gerundive agreement, necessity, supine**Use:** Distinguish form before choosing an idiomatic English construction.

1. Give the gerund of *amo* in genitive, dative, accusative with *ad*, and ablative.
Answer / model: *amandi, amando, ad amandum, amando*.
2. Convert *ad laudandum Deum* to the preferred gerundive construction.
Answer / model: *ad Deum laudandum*. Accusative *Deum* remains the logical object but *laudandum* now agrees with it.
3. Write “The priest must offer the victim.”
Answer / model: *Sacerdoti hostia offerenda est*. *Sacerdoti* is dative of agent; *hostia offerenda est* is passive periphrastic.
4. Distinguish *oratum* and *oratu*.
Answer / model: Accusative supine *oratum* expresses purpose after motion; ablative *oratu* expresses respect after a suitable adjective.
5. **Text:** *Tempus nascendi, et tempus moriendi*.
Passage ID: II.45.1; exact source and collation state are recorded in the passage inventory.
Parse both verbal forms; translate.
Answer / notes: *Nascendi* and *moriendi* are genitive gerunds depending on *tempus*. “A time for being born and a time for dying.”
6. Write in Latin: “We must pray, and the gifts must be blessed by the priest.”
Answer / model: *Nobis orandum est, et sacerdoti dona benedicenda sunt*. First is impersonal neuter singular; second agrees with neuter plural *dona*.

V2.12D — Verbal nouns D

Worksheet ID: II.48

Focus: gerund cases, gerundive agreement, necessity, supine**Use:** Distinguish form before choosing an idiomatic English construction.

1. Explain why the infinitive supplies the gerund’s missing nominative.
Answer / model: A verbal action as subject uses *orare*: *orare bonum est*. Latin does not use a nominative gerund **orandum* for that purpose.
2. Parse *audiendi* in *aures audiendi*.
Answer / model: Genitive gerund depending on *aures*: “ears for hearing.”
3. Write impersonal obligation with intransitive *eundum*.
Answer / model: *Nobis eundum est*, “we must go.” Neuter singular gerundive is impersonal; *nobis* dative agent.
4. Distinguish *venturus est* and *veniendus est*.
Answer / model: First future active periphrastic, “he will/is going to come”; second gerundive passive/impersonal and normally unsuitable with intransitive *venio*; use *veniendum est* impersonally if necessity is intended.

5. **Text:** *Necessitas enim mihi incumbit; vae enim mihi est, si non evangelizavero.*

Passage ID: II.48.1; exact source and collation state are recorded in the passage inventory.

Relate the dative to a periphrastic rewrite; translate.

Answer / notes: *Mihi* is the person under necessity, comparable to dative agent in *mihi evangelizandum est*.

“Necessity lies upon me; indeed, woe is me if I do not preach the Gospel.”

6. Write a purpose three ways: “He came to pray.”

Answer / model: *Venit oratum* (supine, rare); *venit orare* (infinitive); *venit ut oret* (purpose clause).

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-II.12, *Gerund, Gerundive, Supine, and Passive Periphrastic*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet teaches the surviving forms and central prose uses required by the curriculum; lexical restrictions on individual supines remain source-specific.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source

roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
