

Ecclesiastical Latin

EL-II.13: Place, Time, Means, Manner, and Cause

Rank morphological and semantic evidence to distinguish spatial, temporal, instrumental, agentive, associative, manner, source, and causal case uses

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-II.13
Course stage	Stage II — Core Grammar
Prerequisites	EL-II.12 mastery: distinguish verbal nouns/adjectives and obligation structures
Observable outcome	Rank morphological and semantic evidence to distinguish spatial, temporal, instrumental, agentive, associative, manner, source, and causal case uses
Printed practice	Worksheets II.49 (guided Variant A) and II.52 (independent Variant D), with terminal keys
Extension bank	Worksheets II.50 and II.51 remain optional remediation or delayed-recall variants
Next dependency	EL-II.14, Word Order, Ellipsis, Attraction, and Liturgical Compression

1.1 Two focused sessions

Session 1 — guided acquisition. Build the ranked ablative and spatial-case protocol, including exceptional place forms, then complete Worksheet II.49 as the guided application.

Session 2 — transfer and gate. Apply the protocol to paired place, time, agent/means, accompaniment/manner, and source/cause contrasts, then complete Worksheet II.52 independently.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: Label and translate at least 18 of 20 mixed adverbial phrases, produce all six taught exceptional place forms, and compose the ten contrasts without confusing agent, means, location, or direction.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- place where, motion to, motion from, and route by which;
- time when, time within which, and duration;
- means/instrument, personal agent, accompaniment, and manner; and
- source, cause, and motive, including their prepositions and semantic tests.

2.2 High-risk contrast

The ablative form narrows possibilities but does not name its own semantic use. Personal agent, instrument, accompaniment, manner, source, and cause require their governing verb, preposition, noun type, and clause meaning.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Place, time, means, manner, and cause

On completing this unit, you can:

- distinguish place where, motion to, motion from, and route by which;
- distinguish time when, time within which, and duration;
- separate instrument, personal agent, accompaniment, and manner;
- identify source, cause, and motive from both case and meaning.

1.1 The adverbial cases

An **adverbial case use** is a noun phrase that modifies the circumstances of an action—where, when, how, why, or by what means—rather than serving as subject or direct object. The case narrows the possibilities, but the verb, preposition, and meaning determine the exact relation.

Place and time

Relation	Normal construction	Example
place where	<i>in</i> + ablative	<i>in terra</i> ; towns, small islands, <i>domus</i> , and <i>rus</i> may use locative: <i>Romæ, domi, ruri</i>
motion to	<i>in/ad</i> + accusative	<i>ad altare, in cælum</i> ; towns and <i>domum/rus</i> normally omit preposition: <i>Romam, domum</i>
motion from	<i>a/ab, e/ex, de</i> + ablative	<i>de cælis, ex altari</i> ; towns and <i>domus/rus</i> may use bare ablative: <i>Roma, domo</i>
route by which	ablative, often <i>per</i> + accusative	<i>eadem via</i> ; <i>per viam</i> emphasizes passage through
time when/within	ablative without preposition	<i>tertia die; tribus diebus</i> , “within three days,” when context requires
duration/extent	accusative, often <i>per</i>	<i>tres dies; per omnia sæcula</i>

Means, agent, manner, and cause

Means or **instrument** is the nonpersonal thing by which an action is accomplished and normally uses the bare ablative: *verbo sanat*, “he heals by a word.” A personal agent with a passive verb uses *a/ab*: *a sacerdote offertur*. **Accompaniment** identifies who or what is together with the subject; **manner** describes how the action is performed. Accompaniment uses *cum*; manner uses *cum* + ablative, but may omit *cum* when an adjective makes the manner clear: *magna voce, pura mente*.

Bare ablative may express cause (*timore tremat*) or source; *propter/ob* + accusative normally gives motive, *causa/gratia* + preceding genitive gives purpose, and *de/ex* + ablative marks source. Do not infer a label from the preposition alone: the governing verb and sense decide.

1.2 Reading the forms in context

Worked example: direction and location at the opening prayers

Worked passage ID: W.II.54; exact source and collation state are recorded in the passage inventory.

Introibo ad altare Dei, ad Deum qui lætificat iuventutem meam.

Analysis. Both instances of *ad* govern accusative and mark direction toward, not location at. The second phrase appositionally interprets the altar's goal as God.

Translation. "I will go in to the altar of God, to God who gives joy to my youth."

Worked example: two locations in the Gloria

Worked passage ID: W.II.55; exact source and collation state are recorded in the passage inventory.

Gloria in excelsis Deo. Et in terra pax hominibus bonæ voluntatis.

Analysis. *In excelsis* and *in terra* are place where with ablative. *Deo* and *hominibus* are datives of reference or recipient; forms must not be relabeled ablative merely because a nearby phrase is ablative.

Translation. "Glory to God in the highest places, and on earth peace to people of good will."

Worked example: source and motive in the Creed

Worked passage ID: W.II.56; exact source and collation state are recorded in the passage inventory.

Qui propter nos homines et propter nostram salutem descendit de cælis.

Analysis. Repeated *propter* + accusative marks beneficiary/motive; *de cælis* marks motion from a higher source. Nominative *qui* is subject of *descendit*.

Translation. "Who for us human beings and for our salvation came down from heaven."

Worked example: time when and motion into in the Creed

Worked passage ID: W.II.57; exact source and collation state are recorded in the passage inventory.

Et resurrexit tertia die secundum Scripturas, et ascendit in cælum.

Analysis. *Tertia die* is bare ablative of time when. *In cælum* is accusative of motion into; it does not mean that the ascension happened while already in heaven.

Translation. "And he rose on the third day according to the Scriptures, and ascended into heaven."

Worked example: means and manner in a Postcommunion

Worked passage ID: W.II.58; exact source and collation state are recorded in the passage inventory.

Quod ore sumpsimus, Domine, pura mente capiamus.

Analysis. Bare ablative *ore* is bodily means; adjective + ablative *pura mente* expresses manner without *cum*. The parallel English preposition "with" must not hide their different functions.

Translation. "Lord, may we receive with a pure mind what we have taken by mouth."

1.3 Writing laboratory

Draw four arrows labelled WHERE / TO / FROM / BY WAY OF and place *in ecclesia*, *ad ecclesiam*, *ex ecclesia*, *eadem via* beneath them. Add the exceptional series *Romæ*, *Romam*, *Roma* and *domi*, *domum*, *domo*.

Compose paired contrasts: “at the altar / to the altar”; “on the third day / for three days”; “by the priest / by a word”; “with the disciples / with great faith”; “from heaven / for our salvation.” Parse every noun before translating.

Advance when: you label and translate twenty mixed adverbial phrases with at least 18 correct, produce all six exceptional place forms from memory, and compose the ten contrasts without confusing agent, means, location, or direction.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 The adverbial cases — enrichment and transfer

Connection. A ranked protocol prevents the broad label “ablative” from standing in for a complete analysis.

Transfer task. For each lesson category, answer in order: exact form and case, governing preposition or verb, animate/personal versus thing distinction, spatial or temporal relation, and narrowest semantic label. Turn the order into a one-page decision card.

Retrieval check. Recite the protocol and identify the step that separates personal agent from means.

1.2 Reading the forms in context — enrichment and transfer

Connection. Minimal spatial and temporal pairs show how case and preposition alter relation without changing the noun’s lexical meaning.

Transfer task. Pair the lesson’s location/direction, time-when/duration, agent/means, accompaniment/manner, and source/cause examples. Underline the formal difference and state the semantic difference separately.

Retrieval check. Explain why English “with” does not prove accompaniment or manner.

1.3 Writing laboratory — enrichment and transfer

Connection. Composing contrasts tests whether the learner can select a construction before choosing an English preposition.

Transfer task. Complete all ten lesson contrasts. Above each phrase write its case, governor/preposition, and narrow label; then check the six exceptional place forms from memory.

Retrieval check. State one contrast where the same case serves two different semantic labels and name the deciding evidence.

Part IV

Selected Practice

CHAPTER 1

Place, time, means, manner, and cause: parallel forms

V2.13A — Adverbial cases A**Worksheet ID:** II.49**Focus:** place, time, means, agent, manner, cause**Use:** Parse the noun before assigning its semantic label.

1. Give “at Rome / to Rome / from Rome.”

-
2. Distinguish *tertia die* and *tres dies*.

-
3. Distinguish *verbo sanatur* and *a sacerdote benedicitur*.

-
4. Write “with the disciples / with great faith.”

-
5. **Text:** *Introibo ad altare Dei, ad Deum qui lætificat iuventutem meam.*

Passage ID: II.49.1; exact source and collation state are recorded in the passage inventory.

Identify both place phrases; translate.

-
6. Write: “On the third day he went from the house to the church.”
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

V2.13D — Adverbial cases D**Worksheet ID:** II.52**Focus:** place, time, means, agent, manner, cause**Use:** Parse the noun before assigning its semantic label.

1. Give the four place relations for *ecclesia*.

-
2. Classify *pridie*, *tertia die*, *per tres dies*.

-
3. Write personal agent and source: “begotten by the Father / from heaven.”

-
4. Classify *una cum famulo tuo*.

-
5. **Text:** *Quod ore sumpsimus, Domine, pura mente capiamus.*

Passage ID: II.52.1; exact source and collation state are recorded in the passage inventory.

Distinguish the ablatives; translate.

-
6. Write five short phrases showing where, to, from, route, and motive.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

Part V**Mastery Decision****CHAPTER 1**

Mastery and error record

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

The adverbial cases — model and rubric

Connection. A ranked protocol prevents the broad label “ablative” from standing in for a complete analysis.

Model / acceptable evidence. The protocol begins with morphology, then governor/preposition, lexical type, and contextual relation before assigning the traditional label. Personal agent ordinarily involves a person with *a/ab* after a passive; means ordinarily uses an unprepositioned thing in the ablative.

Reading the forms in context — model and rubric

Connection. Minimal spatial and temporal pairs show how case and preposition alter relation without changing the noun's lexical meaning.

Model / acceptable evidence. Each pair must cite the Latin preposition or bare case and the governing context. English “with” can render instrument, accompaniment, or manner; the Latin construction and noun relation decide among them.

Writing laboratory — model and rubric

Connection. Composing contrasts tests whether the learner can select a construction before choosing an English preposition.

Model / acceptable evidence. All contrasts must preserve location versus direction, time point versus duration, agent versus means, accompaniment versus manner, and source versus cause. The chosen example must identify its different governor, preposition, lexical type, or context rather than claiming the case ending alone decides.

CHAPTER 3

Selected worksheet solutions

CHAPTER 4

Place, time, means, manner, and cause: parallel forms

V2.13A — Adverbial cases A

Worksheet ID: II.49

Focus: place, time, means, agent, manner, cause

Use: Parse the noun before assigning its semantic label.

1. Give “at Rome / to Rome / from Rome.”
Answer / model: *Romæ* (locative), *Romam* (accusative without preposition), *Roma* (ablative without preposition).
2. Distinguish *tertia die* and *tres dies*.
Answer / model: Ablative time when, “on the third day”; accusative duration, “for three days.”
3. Distinguish *verbo sanatur* and *a sacerdote benedicitur*.
Answer / model: *Verbo*: ablative means/instrument; *a sacerdote*: personal agent with passive.
4. Write “with the disciples / with great faith.”
Answer / model: *cum discipulis* (accompaniment); *magna fide* or *cum magna fide* (manner).
5. **Text:** *Introibo ad altare Dei, ad Deum qui lætificat iuventutem meam.*
Passage ID: II.49.1; exact source and collation state are recorded in the passage inventory.
Identify both place phrases; translate.
Answer / notes: Both *ad* + accusative phrases mark direction toward. “I will go in to the altar of God, to God who gives joy to my youth.”
6. Write: “On the third day he went from the house to the church.”
Answer / model: *Tertia die domo ad ecclesiam ivit.* *Domo* is exceptional place from without a preposition.

V2.13D — Adverbial cases D

Worksheet ID: II.52

Focus: place, time, means, agent, manner, cause

Use: Parse the noun before assigning its semantic label.

1. Give the four place relations for *ecclesia*.
Answer / model: *in ecclesia* where; *ad/in ecclesiam* to/toward or into; *ab/ex ecclesia* away/out from; *per ecclesiam* through.
2. Classify *pridie*, *tertia die*, *per tres dies*.
Answer / model: *Pridie* is temporal adverb (or governs an accusative before an event); *tertia die* ablative time when; *per tres dies* duration.
3. Write personal agent and source: “begotten by the Father / from heaven.”
Answer / model: *a Patre genitus*; *de cælo*. Theological texts may express generation with *ex Patre*; that phrase emphasizes source rather than ordinary personal agency.
4. Classify *una cum famulo tuo*.
Answer / model: *Cum* + ablative accompaniment; *una* is adverb “together.”
5. **Text:** *Quod ore sumpsimus, Domine, pura mente capiamus.*
Passage ID: II.52.1; exact source and collation state are recorded in the passage inventory.

Distinguish the ablatives; translate.

Answer / notes: *Ore* is means; *pura mente* manner. “Lord, may we receive with a pure mind what we have taken by mouth.”

6. Write five short phrases showing where, to, from, route, and motive.

Answer / model: Model: *in templo; ad altare; ex ecclesia; eadem via; propter salutem.*

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-II.13, *Place, Time, Means, Manner, and Cause*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet gives a ranked operational protocol, not permission to assign a traditional ablative label without syntactic and semantic evidence.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source

roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
