

Ecclesiastical Latin

EL-III.7: Graduals, Alleluias, Tracts, and Sequences

Recover syntax, voice, parallelism, and responsible ellipsis from poetic and psalmic liturgical texts

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-III.7
Course stage	Stage III — Independent Missal Reading
Prerequisites	EL-III.6 and reliable prose reconstruction
Observable outcome	Recover syntax, voice, parallelism, and responsible ellipsis from poetic and psalmic liturgical texts
Printed practice	Worksheets III.25 (psalmic parallelism, Variant A) and III.28 (unseen chant audit, Variant D), with terminal keys
Extension bank	Worksheets III.26 and III.27 remain optional Tract-voice and sequence-compression practice
Next dependency	EL-III.8, Prefaces and the Roman Canon

1.1 Two focused sessions

Session 1 — guided acquisition. Compare printed verse order with dependency order and complete Worksheet III.25.

Session 2 — transfer and gate. Apply the ellipsis ledger to an unfamiliar chant in Worksheet III.28 and return from prose scaffold to poetic effect.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: On an unfamiliar chant, account for every finite form, agreement link, voice, and proposed ellipsis; reconstruct dependencies without importing new content; and explain one effect of the printed parallel or displaced order.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- psalmic parallelism, poetic displacement, repetition, and speaker change;
- verse or performance mark versus grammatical punctuation;
- ellipsis labeled grammatical, parallel, or interpretive; and
- prose scaffold followed by a return to printed rhythm and emphasis.

2.2 High-risk contrast

Poetic order can separate dependencies, but it does not suspend morphology. A prose reconstruction exposes those dependencies; it does not authorize extra propositions or erase the source's arrangement.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

Graduals, Alleluias, Tracts, and Sequences

On completing this unit, you can:

- read psalmic parallelism without forcing every colon into prose syntax;
- restore only ellipses demanded by grammar;
- recognize poetic word order, alternate perfect endings, and predicative participles;
- paraphrase a chant unit in simple Latin before making an English version.

Chant texts are short, but they are not necessarily easy. A Gradual or Tract may excerpt distant psalm verses, omit a repeated subject, or coordinate clauses by rhythm rather than conjunction. A sequence adds rhyme, compressed images, and occasionally archaic forms. Treat the verse marker as a performance marker, not always a syntactic boundary.

In this volume a **chant unit** is the textual unit assigned to one chant position, even when it draws on nonadjacent source verses. A **Gradual** is the chant after the Lesson, an **Alleluia** is the alleluiatic chant before the Gospel, and a **Tract** takes the corresponding pre-Gospel place in specified non-alleluiatic Masses. A **Sequence** is an extended strophic text placed before the Gospel in the Masses to which the 1962 Missal assigns one, after the Alleluia or Tract as applicable. These liturgical definitions do not imply that all four share one poetic syntax.

Parallelism arranges corresponding members so that their likeness, contrast, or progression is perceptible. A **colon** is one such sense-and- rhythm member of a verse; punctuation may mark it, but a colon need not be an independent clause. **Poetic word order** separates or reorders related elements for pattern or emphasis while leaving their inflections and dependencies intact.

1.1 Psalmic parallelism

Universi, qui te exspectant, non confundentur, Domine. V. Vias tuas, Domine, notas fac mihi: et semitas tuas edoce me.

Source: *Missale Romanum* (1962), Dominica I Adventus, Graduale (Ps. 24:3–4).

Substantial *universi* is modified by *qui te exspectant* and is subject of passive *confundentur*. The next verse balances *vias tuas* with *semitas tuas*. In *notas fac mihi*, *notas* is predicate accusative with *vias*; *mihi* is dative. The second imperative *edoce* takes *me* and may take the thing taught as accusative. Do not supply a new divine subject between the parallel members.

The Alleluia of the same Mass reads:

Ostende nobis, Domine, misericordiam tuam: et salutare tuum da nobis.

Source: *Missale Romanum* (1962), Dominica I Adventus, Alleluia (Ps. 84:8).

The two imperatives reverse object and recipient: *nobis ... misericordiam* then *salutare ... nobis*. Neuter substantial *salutare* means the saving help manifested by God; it is not an infinitive.

1.2 The sustained Tract

Qui habitat in adiutorio Altissimi, in protectione Dei cæli commorabitur. V. Dicet Domino: Susceptor meus es tu, et refugium meum.

Source: *Missale Romanum* (1962), Dominica I in Quadragesima, Tractus (Ps. 90:1–2).

Substantial *qui* supplies the subject of future *commorabitur*. The two *in* phrases use ablatives and form a parallel description of dwelling. Future *dicet* takes dative *Domino*; the quoted sentence has *tu* as subject and *susceptor meus* and *refugium meum* as predicate nominatives. The long Tract continues by changing persons and speakers; mark those changes rather than assuming a single uninterrupted voice.

1.3 Sequence compression

Victimæ paschali laudes immolent Christiani. Agnus redemit oves: Christus innocens Patri reconciliavit peccatores.

Source: *Missale Romanum* (1962), Dominica Resurrectionis, Sequentia *Victimæ paschali laudes*.

immolent is jussive subjunctive; *Christiani* is its subject, *laudes* its object, and *Victimæ paschali* dative recipient. The next two clauses use stark nominative–verb–object patterns. Dative *Patri* belongs with *reconciliavit*; *Christus innocens* and the sacrificial *Agnus* have the same referent and form a theological parallel, but they are the distinct subjects of *reconciliavit* and *redemit*, respectively.

Later the sequence says:

Mors et vita duello confluxere mirando: dux vitæ mortuus regnat vivus.

confluxere is third-person plural perfect with the alternative ending *-ere* for *-erunt*; it is not a syncopated form. *duello mirando* is ablative of the wondrous combat. *mortuus* and *vivus* are predicative: the dead leader of life reigns living. Prose order helps—*dux vitæ, mortuus, vivus regnat*—but the crossed poetic order makes death and living meet in one line.

A **third-person plural perfect in *-ere*** uses an inherited alternative to the ending *-erunt*; the two endings have the same person, number, tense, voice, and mood. A **predicative** adjective or participle states a condition of a subject or object within the verbal assertion; an **attributive** one merely identifies or describes its noun inside the noun phrase. Thus *mortuus* and *vivus* tell how the leader stands in relation to *regnat*, not just which leader is meant.

1.4 A responsible ellipsis ledger

For every supplied word write one of three labels:

- G** grammatically required, as an implicit subject contained in a verb;
- P** supplied from a strict parallel member;
- I** interpretive, helpful for sense but not recoverable as exact wording.

Only G and carefully justified P supplies belong in a clause reconstruction. An I supply may appear in commentary but never inside the Latin quotation.

Advance when: on one unseen Gradual, one Tract section, and twelve unseen lines of a sequence, you identify all finite forms, reconstruct prose order, label every ellipsis G/P/I, and write a simple Latin paraphrase preserving the agents and actions; the parse and dependency score is at least 90%, without a facing translation.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 Psalmic parallelism — enrichment and transfer

Connection. Parallel members may repeat, develop, contrast, or complete one another while preserving distinct syntax.

Transfer task. Make a two-column map of the lesson's first parallel pair: align corresponding heads, verbs, objects, and modifiers, then name the semantic relation.

Retrieval check. Identify one repeated feature and one grammatical difference.

1.2 The sustained Tract — enrichment and transfer

Connection. A longer chant requires a speaker-and-addressee ledger across verse boundaries.

Transfer task. On the lesson's Tract selection, mark every finite verb and pronoun, then record speaker, addressee, and antecedent for each verse unit.

Retrieval check. State when a verse mark may not be treated as a sentence boundary.

1.3 Sequence compression — enrichment and transfer

Connection. Rhyme and balanced short lines can separate words that remain bound by case, agreement, or government.

Transfer task. Choose one stanza already printed in the lesson and present it in three forms: printed order, dependency groups, and neutral prose scaffold.

Retrieval check. Name one effect lost in the neutral scaffold.

1.4 A responsible ellipsis ledger — enrichment and transfer

Connection. A supply is a claim with an evidence class, not invisible editorial repair.

Transfer task. Record three possible supplies from selected practice, label each G, P, or I, and reject one tempting but unnecessary addition.

Retrieval check. Give the minimum evidence required for a grammatical supply.

Part IV

Selected Practice

Unit III.7 — Graduals, Alleluias, Tracts, and Sequences

III.7 — Variant A

Worksheet ID: III.25

Focus: Psalmic parallelism

Use: Treat verse markers as performance marks first.

1. **Text:** *Universi, qui te expectant, non confundentur, Domine. V. Vias tuas, Domine, notas fac mihi: et semitas tuas edoce me.*

Passage ID: III.25.1; exact source and collation state are recorded in the passage inventory.

Map both verses and the parallel objects.

-
2. Write the second verse in analytical order.

-
3. Why is *universi* substantival rather than modifying an omitted noun that must be restored?

-
4. Classify the two occurrences of *tuas* and one *te*.

-
5. Answer in Latin: *Qui non confundentur?*

-
6. Write a two-member parallel petition modeled on *vias ... semitas*.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction's rule.

III.7 — Variant D

Worksheet ID: III.28

Focus: Unseen chant audit

Use: Keep psalm quotation and liturgical voice distinct.

1. **Text:** *Hæc dies, quam fecit Dominus: exsulemus, et lætemur in ea. Confitemini Domino, quoniam bonus: quoniam in sæculum misericordia eius.*

Passage ID: III.28.1; exact source and collation state are recorded in the passage inventory.

Map relatives, exhortations, commands, and ellipsis.

-
2. Why does *ea* have feminine form?

-
3. Classify a bracketed copula after *quoniam bonus*.

-
4. Parse *confitemini*.

-
5. Answer in Latin: *Cur fideles exsultant?*

-
6. Give a lookup ledger with no more than two entries.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction's rule.

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

Psalmic parallelism — model and rubric

Connection. Parallel members may repeat, develop, contrast, or complete one another while preserving distinct syntax.

Model / acceptable evidence. The model aligns forms only where morphology and syntax support the correspondence and labels the relation cautiously. Merely placing two translated lines side by side is insufficient.

The sustained Tract — model and rubric

Connection. A longer chant requires a speaker-and-addressee ledger across verse boundaries.

Model / acceptable evidence. The ledger follows grammatical persons and antecedents; a verse mark is not a sentence boundary when dependencies or a finite clause continue across it.

Sequence compression — model and rubric

Connection. Rhyme and balanced short lines can separate words that remain bound by case, agreement, or government.

Model / acceptable evidence. All three versions retain every printed form and bracket any supply. The return note may identify repetition, rhyme, suspense, or foregrounding, but must cite exact forms.

A responsible ellipsis ledger — model and rubric

Connection. A supply is a claim with an evidence class, not invisible editorial repair.

Model / acceptable evidence. A grammatical supply is demanded by construction; a parallel supply comes from an adjacent repeated frame; an interpretive supply assists sense but is not forced. The rejected addition must be shown unnecessary to the parse.

CHAPTER 3

Selected worksheet solutions

Unit III.7 — Graduals, Alleluias, Tracts, and Sequences

III.7 — Variant A

Worksheet ID: III.25

Focus: Psalmic parallelism

Use: Treat verse markers as performance marks first.

1. **Text:** *Universi, qui te expectant, non confundentur, Domine. V. Vias tuas, Domine, notas fac mihi: et semitas tuas edoce me.*

Passage ID: III.25.1; exact source and collation state are recorded in the passage inventory.

Map both verses and the parallel objects.

Answer / notes: Substantival *universi* with relative *qui te expectant* is subject of future passive *confundentur*; *Domine* vocative. In the verse, imperatives *fac/edoce*; *vias/semitas* parallel objects; *notas* predicate accusative with *vias*; *mihi* dative, *me* object.

2. Write the second verse in analytical order.

Answer / model: *Domine, fac vias tuas notas mihi et edoce me semitas tuas.*

3. Why is *universi* substantival rather than modifying an omitted noun that must be restored?

Answer / model: The adjective can itself mean all persons/everyone. A noun such as *homines* may explain the sense but is an interpretive, not grammatically required, supply.

4. Classify the two occurrences of *tuas* and one *te*.

Answer / model: *tuas*: accusative feminine plural possessive adjectives agreeing with *vias/semitas*; *te*: accusative personal pronoun, object of *expectant*.

5. Answer in Latin: *Qui non confundentur?*

Answer / model: *Universi qui Dominum expectant non confundentur.*

6. Write a two-member parallel petition modeled on *vias ... semitas*.

Answer / model: Model: *Veritatem tuam ostende mihi, et legem tuam edoce me.*

III.7 — Variant D

Worksheet ID: III.28

Focus: Unseen chant audit

Use: Keep psalm quotation and liturgical voice distinct.

1. **Text:** *Hæc dies, quam fecit Dominus: exsulemus, et lætemur in ea. Confitemini Domino, quoniam bonus: quoniam in sæculum misericordia eius.*

Passage ID: III.28.1; exact source and collation state are recorded in the passage inventory.

Map relatives, exhortations, commands, and ellipsis.

Answer / notes: *hæc dies* begins a verbless nominal acclamation; an English “this is the day” is interpretive. Relative *quam fecit Dominus*. Hortatory *exsulemus/lætemur*, with *in ea* referring to *die*. Plural imperative *confitemini* governs dative *Domino*. Both *quoniam bonus* and *quoniam in sæculum misericordia eius* are verbless clauses; [*Dominus est*] and [*est/manet*] are interpretive paraphrases, not grammatically required supplies. Source: Dominica Resurrectionis, Graduale (Ps. 117:24, 1).

2. Why does *ea* have feminine form?

Answer / model: It refers to feminine *dies* in this fixed-day context and is ablative after *in*.

3. Classify a bracketed copula after *quoniam bonus*.

Answer / model: I: the printed clause is verbless. [*Dominus est*] can clarify the dependency or supply an English copula, but it is not required as omitted Latin text.

4. Parse *confitemini*.

Answer / model: Second plural present imperative deponent of *confiteor*, *confiteri*, *confessus sum*; it governs dative *Domino*.

5. Answer in Latin: *Cur fideles exsultant?*

Answer / model: *Exsultant quia hæc est dies quam Dominus fecit et quia misericordia eius in sæculum manet.*

6. Give a lookup ledger with no more than two entries.

Answer / model: A defensible reader may need *confiteor* for its deponent form/government and *sæculum* for the idiom *in sæculum*. Endings and pronoun reference require no dictionary.

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-III.7, *Graduals, Alleluias, Tracts, and Sequences*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. This packet reads text, not chant notation or performance practice.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
