

Ecclesiastical Latin

EL-A4: Rhetoric and Periodic Prose

Prove a rhetorical pattern from exact grammatical members and explain how it orders, delays, balances, or foregrounds thought

A self-contained learning packet with a local reference card, enriched submodules, selected handwritten practice, a mastery record, and matching answers. This working study is not an official liturgical book or approved curriculum.

Corpus	1962 <i>Missale Romanum</i> ; Vulgate and ecclesiastical prose as supporting readers
Method	Print, annotate, parse, copy, transform, translate, and compose by hand
Pacing	Advance by demonstrated mastery; module packets use two focused sessions as a planning envelope
Document	Learning module; learner and terminal-key edition
Triptych: AI Driven Studies in Catholic Faith, Worship, and Law

Part I

Module Plan and Reference

CHAPTER 1

Plan, prerequisites, and advancement decision

Module ID	EL-A4
Course stage	Stage IV — Advanced Reading and Composition
Prerequisites	EL-A3 and complete syntactic control of long prayer periods
Observable outcome	Prove a rhetorical pattern from exact grammatical members and explain how it orders, delays, balances, or foregrounds thought
Printed practice	Worksheets IV.14 (period diagram, Variant B) and IV.16 (rhetoric gate, Variant D), with terminal keys
Extension bank	Worksheets IV.13 and IV.15 remain optional figure-diagnostic and rhetorical-imitation practice
Next dependency	EL-A5, Textual Comparison and Commentary

1.1 Two focused sessions

Session 1 — guided acquisition. Diagram a complete period and complete Worksheet IV.14.

Session 2 — transfer and gate. Analyze an unfamiliar chant and prayer in Worksheet IV.16, connecting each figure to syntax and function without overclaiming.

The two-session plan is a workload envelope, not permission to advance by elapsed time. Stop, correct in a different color, and use an omitted variant when the mastery evidence below is absent.

Advance when: On an unfamiliar prayer period, account for every clause and non-finite form, prove each proposed figure from corresponding Latin members, and explain its local function rather than merely naming terminology.

CHAPTER 2

Module reference card

2.1 Terms, forms, and decisions to retrieve

- anaphora, parallelism, antithesis, tricolon, climax, chiasm, and hyperbaton;
- finite spine, subordination, suspension, resolution, and framing order;
- sound or rhythm described cautiously from observable form; and
- figure, grammatical proof, development, and local function.

2.2 High-risk contrast

A rhetorical label is not analysis. The reader must identify exact corresponding forms, prove their syntax, and show what their arrangement contributes in this sentence.

2.3 Working protocol

Before looking anything up, mark the finite verb or verbal center, propose dictionary forms, and record at least two formally possible readings where an ending is syncretic. Use the identified 1962 Missal and the course source record for received wording. A familiar English rendering does not replace a parse.

Part II

Core Lesson

CHAPTER 1

A4. Rhetoric and periodic prose

Rhetorical analysis explains how arrangement guides attention and memory. It does not decorate a grammatical paraphrase with Greek labels.

Rhetoric here means the purposeful arrangement of language to shape a hearer's or reader's attention, judgment, and response. A **figure** is a recognizable pattern of wording or structure; naming one is only the beginning of analysis. Its **effect** is the contribution that the pattern makes in this passage, established from syntax and context rather than assigned from a memorized list.

On completing this unit, you can:

- identify parallelism, anaphora, antithesis, climax, hyperbaton, and periodic suspension;
- connect a figure to syntax and semantic effect;
- diagram a long preface or Canon sentence; and
- reproduce selected patterns in controlled prose.

1.1 A functional inventory

Figure	Definition and test	Possible work
Anaphora	repetition of the same word or phrase at the beginning of successive corresponding members	binds petitions or assertions into a cumulative act
Parallelism	two or more members with corresponding grammatical structure; correspondence must be shown, not merely asserted	makes likeness, contrast, or progression perceptible
Antithesis	semantic opposition sharpened by parallel or balanced structure; opposition without structural correspondence is not yet this figure	focuses a theological or moral distinction
Tricolon	a sequence of three corresponding members, whether or not they increase	gives a threefold sense of balance, range, or completion
Climax	members arranged in demonstrable increase of force, scope, or importance	creates ascent; three members alone prove only a tricolon

Figure	Definition and test	Possible work
Hyperbaton	separation of words that syntax binds closely, such as an adjective and noun, beyond their expected adjacency	can frame or foreground intervening material; rhetorical purpose still needs argument
Chiasm	two pairs arranged in inverted correspondence, schematically ABBA, with credible syntactic or semantic matching	concentrates reciprocal relation; four loosely related words do not establish it
Polyptoton	repetition of one lexeme in different inflected forms within a short span	varies grammatical relation while preserving visible verbal identity
Period	a sentence whose governing construction remains suspended while subordinate members accumulate toward completion	orders grounds, petition, and end toward the main resolution

Worked example: deictic accumulation in the Canon

Worked passage ID: W.IV.5; exact source and collation state are recorded in the passage inventory.

Hæc dona, hæc munera, hæc sancta sacrificia illibata repeats *hæc* and develops three accusative objects, the last expanded by two adjectives. The sequence does not present three disconnected dictionary glosses; its anaphora and growing weight focus the objects of *habeas et benedicas*. A useful note connects repetition, morphology, and the governing verbs.

Worked example: the preface frame

Worked passage ID: W.IV.6; exact source and collation state are recorded in the passage inventory.

Vere dignum et iustum est, æquum et salutare coordinates two pairs of predicate adjectives around *est*; the following infinitive or substantive action states what is fitting. Before translating, bracket the predicate frame and trace how the longer sentence suspends completion through relative clauses before the angelic conclusion.

1.2 Prose rhythm

Cadence is the patterned movement toward a phrase or sentence ending; a **clausula** is a recognizable closing cadence, especially one described by conventional metrical or stress patterns. Because identifying a clausula requires more than noticing that a sentence ends neatly, claims here must cite a reference pattern and the relevant textual quantities or stresses.

Advanced commentary may observe cadence and clausula, but this course makes no pronunciation requirement and therefore treats rhythm through textual pattern, stress information from references, and comparison—not unsupported claims based on private recitation. Rhetorical structure remains available on the page through balance, length, recurrence, and closure.

Advance when: diagram one complete preface and one long Canon period; identify only defensible figures, and for each write a sentence explaining how grammar and arrangement affect the movement of thought. Then imitate one structural pattern with new, controlled content.

Part III

Enrichment by Submodule

CHAPTER 1

Connections, transfer, and retrieval

1.1 A functional inventory — enrichment and transfer

Connection. The same visible repetition may serve balance, accumulation, contrast, or closure depending on its grammatical members.

Transfer task. Choose one figure already printed in the lesson and fill four rows: exact form, syntactic role, corresponding member, and local development.

Retrieval check. Remove the figure's name and explain whether the analysis remains intelligible.

1.2 Prose rhythm — enrichment and transfer

Connection. A cautious rhythm note begins with clause boundaries, stress or sound observations, and a reproducible comparison rather than a vague claim of solemnity.

Transfer task. On the lesson's period, mark syntactic cola and repeated sounds, then write one claim you can support and one stronger historical or metrical claim you must withhold.

Retrieval check. Identify the grammatical boundary that anchors each proposed colon.

1.3 Worked period process — enrichment and transfer

Connection. A full process moves from verbs to dependencies to rhetorical function.

Transfer task. Using the complete period selected for Worksheet IV.14, produce four layers: verbal inventory, indented clause tree, parallel-member overlay, and three-sentence functional account.

Retrieval check. Which layer must be correct before a claim of suspension can pass?

Part IV

Selected Practice

CHAPTER 1

A4 worksheet family: rhetoric

A4-B — Diagramming a period

Worksheet ID: IV.14

Focus: Make long syntax visible.

Use: Use a complete preface or Canon sentence.

1. Copy the sentence and underline every finite verb twice, every non-finite verb once.

-
2. Place each subordinate clause on an indented line beneath its governor.

-
3. Circle the main-clause completion and explain what delays it.

-
4. Mark parallel members and any framing word order.

-
5. Write a prose account of how suspension orders the thought.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction's rule.

A4-D — Rhetoric gate**Worksheet ID:** IV.16**Focus:** Analyze without overclaiming.**Use:** Use an unfamiliar chant and prayer.

1. **Text:** *Vere dignum et iustum est, æquum et salutare.*

Passage ID: IV.16.1; exact source and collation state are recorded in the passage inventory.

Identify syntax and balance.

2. What must be supplied or follow for the semantic content of “it”?
-

3. **Text:** *Dies iræ, dies illa, solvet sæclum in favilla.*

Passage ID: IV.16.2; exact source and collation state are recorded in the passage inventory.

Identify repetition, demonstrative reference, and clause spine.

4. Why does poetic order not cancel syntax?
-

5. Write one paragraph connecting two figures to the meaning of either passage.
-

Definition/error check: First define uncertain Focus terms from memory; after the work, record each correction’s rule.

Part V**Mastery Decision****CHAPTER 1**

One recurring error family		
Correction stated as a rule		
Unseen or delayed item used		

Advance / remediate decision: _____ **Next review date:**

Reason in one complete sentence:

Part VI

Answer Key

CHAPTER 1

How to Use the Keys

These keys diagnose grammatical decisions. Compare them only after completing the corresponding worksheet or assessment in ink. For a closed item, locate the form, function, government, or clause relation that decides the answer; a matching English paraphrase alone is not enough. For an open task, use the stated model and rubric to test morphology, syntax, idiom, and source control.

Some translations legitimately admit more than one English wording. An alternative is acceptable when it preserves the Latin agency, negation, time, dependency, and material ambiguity. Record a defensible alternative in the error ledger rather than changing it merely to imitate the model's style.

CHAPTER 2

Enrichment models and rubrics

A functional inventory — model and rubric

Connection. The same visible repetition may serve balance, accumulation, contrast, or closure depending on its grammatical members.

Model / acceptable evidence. A strong model still identifies what repeats or reverses, how members correspond, and what changes across them. If the account collapses without the label, it has not shown function.

Prose rhythm — model and rubric

Connection. A cautious rhythm note begins with clause boundaries, stress or sound observations, and a reproducible comparison rather than a vague claim of solemnity.

Model / acceptable evidence. The model aligns cola with finite or subordinate units and cites audible or visual recurrence. It withholds quantitative, authorial, or causal conclusions not established by the course evidence.

Worked period process — model and rubric

Connection. A full process moves from verbs to dependencies to rhetorical function.

Model / acceptable evidence. The clause tree must correctly locate the main completion and every dependent before the overlay or functional account is scored. Suspension is proved by the grammatical material delaying that completion.

CHAPTER 3

Selected worksheet solutions

CHAPTER 4

A4 worksheet family: rhetoric

A4-B — Diagramming a period

Worksheet ID: IV.14

Focus: Make long syntax visible.**Use:** Use a complete preface or Canon sentence.

1. Copy the sentence and underline every finite verb twice, every non-finite verb once.
Answer / model: Key is passage-specific; all finite verbs, infinitives, and participles must be accounted for before diagramming.
2. Place each subordinate clause on an indented line beneath its governor.
Answer / model: Require explicit labels for relative, purpose, substantive, temporal, or other relation; indentation without classification is incomplete.
3. Circle the main-clause completion and explain what delays it.
Answer / model: Identify the main predicate/petition and list intervening relative, participial, appositional, or coordinated material.
4. Mark parallel members and any framing word order.
Answer / model: The answer must cite exact corresponding forms; do not award labels based only on English translation.
5. Write a prose account of how suspension orders the thought.
Answer / model: Model: explain what grounds precede petition/assertion, where expectation is held, and how the main resolution gathers the subordinate material.

A4-D — Rhetoric gate

Worksheet ID: IV.16

Focus: Analyze without overclaiming.**Use:** Use an unfamiliar chant and prayer.

1. **Text:** *Vere dignum et iustum est, æquum et salutare.*
Passage ID: IV.16.1; exact source and collation state are recorded in the passage inventory.
Identify syntax and balance.
Answer / notes: Impersonal/predicate construction with *est*; four neuter singular predicate adjectives in two coordinated pairs, balanced as *dignum et iustum* / *æquum et salutare*.
2. What must be supplied or follow for the semantic content of “it”?
Answer / model: An infinitive or substantive act in the larger preface states what is fitting; the opening frame anticipates that completion.
3. **Text:** *Dies iræ, dies illa, solvet sæclum in favilla.*
Passage ID: IV.16.2; exact source and collation state are recorded in the passage inventory.
Identify repetition, demonstrative reference, and clause spine.
Answer / notes: Anaphora/repetition of *dies*; *illa* agrees with the second *dies*; *dies* is subject, *solvet* future active, *sæclum* object, *in favilla* prepositional phrase.
4. Why does poetic order not cancel syntax?

Answer / model: Endings and agreement still establish relations; meter/rhyme/foregrounding can rearrange constituents but do not remove morphology.

5. Write one paragraph connecting two figures to the meaning of either passage.

Answer / model: A successful answer names exact forms, proves their syntax, and explains emphasis, balance, dread, or closure; a list of terms earns no credit.

Part VII

Scope and Sources

CHAPTER 1

Scope and Qualifications

1.1 Packet boundary

This is module EL-A4, *Rhetoric and Periodic Prose*, in Triptych's print-first Ecclesiastical Latin curriculum. It imports one authoritative teaching unit, its local reference decisions, enrichment for each internal submodule, the selected worksheets named in the module plan, and the matching solutions. The packet treats literary function in selected prose and chant; it does not make unsupported claims about quantitative clausulae or authorial intention.

The unprinted worksheet variants remain course-owned extension material; their omission is intentional and is not a claim that the module exhausts available practice. Two focused sessions describe the packet's planned core, while the mastery gate and delayed recall determine advancement.

1.2 Corpus, text, and limits

The controlling reader is the 1962 typical edition of the *Missale Romanum*; the identified Clementine Vulgate and other ecclesiastical prose are supporting corpora. Running Latin normally uses consonantal *i*, the ligature *æ*, and no macrons. Received excerpts may normalize typography but are not diplomatic transcriptions unless labeled. Uncited short drills, transformations, and instructional models are project-composed; English translations and glosses are project translations unless identified otherwise.

This packet teaches language competence. It is not an official liturgical book, approved seminary curriculum, certification, pronunciation or ceremonial course, critical edition, or authority for a liturgical, theological, textual, or canonical judgment. Check received wording against the editions identified in the course-wide passage inventory.

1.3 Review, rights, and release state

Course-wide research records own the edition, passage, answer, curriculum, and source decisions; the leaf's module map records this packet's selection and enrichment. No independent Latinist, liturgist, pedagogue, theologian, or ecclesiastical reviewer is claimed. Page-image collation and the donor and liturgical-text distribution bases remain unresolved pre-installation gates. The packet therefore remains a working build on hold, not an installed or released publication.

CHAPTER 2

References

The following works are the course's controlling corpus and reference aids. Project-composed explanation, translation, analysis, exercises, and models are distinguished from received wording under the convention stated in the Scope and Qualifications appendix. Short source passages are identified so that the learner can verify their wider context. The adjacent edition manifest and passage inventory record exact source

roles, checks, access states, and known rights limits.

2.1 Primary corpus

- Catholic Church, *Missale Romanum ex decreto SS. Concilii Tridentini restitutum, Summorum Pontificum cura recognitum*, editio typica (Rome, 1962). A searchable presentation of the edition is hosted by the Holy See's Biblia Clerus project: <https://www.clerus.org/bibliaclerusonline/EN/gmb.htm>.
- A page-image scan of the 1962 typical edition is available through the Church Music Association of America: <https://media.churchmusicassociation.org/pdf/missale62.pdf>. Page images, rather than unsourced transcriptions, should decide doubtful punctuation or spelling.
- The Clementine Vulgate is the principal biblical comparison corpus. The public-domain 1914 edition edited by Michael Hetzenauer and its provenance are described at <https://www.sacredbible.org/vulgate1914/>.

2.2 Grammar and lexicography

- J. H. Allen and J. B. Greenough, *New Latin Grammar for Schools and Colleges* (1903), a donor-declared public-domain reference whose digital locator was not independently consulted during integration: <https://archive.org/details/allengreenoughsn01alle>.
- Charles E. Bennett, *New Latin Grammar*, 1918 revision, Project Gutenberg eBook 15665; public-domain text in the United States: <https://www.gutenberg.org/ebooks/15665>.
- Charlton T. Lewis and Charles Short, *A Latin Dictionary* (1879), searchable transcription: <https://logeion.uchicago.edu/lexidium>.
- Charles du Fresne, sieur du Cange, *Glossarium mediae et infimae latinitatis*, a donor-declared later-vocabulary aid whose digital locator was not independently consulted during integration: <http://ducange.enc.sorbonne.fr/>.

The underlying 1903, 1918, 1879, and 1883–1887 printed works are public domain in the United States. Digital transcriptions and interfaces retain their own terms and are cited as access tools, not relicensed or reproduced wholesale. The 1962 Missal, Scripture, official text, and other received wording retain their own status; see the scope appendix, research records, and final-page rights notice.

Classical reference grammars describe the inherited system but do not by themselves explain every biblical or ecclesiastical development. The advanced volume therefore distinguishes classical baseline, Vulgate usage, later Christian usage, and stable liturgical formula instead of labeling every difference an “exception.”

2.3 Citation convention

Missal passages are cited by liturgical location and text genre rather than by a page number that varies among printings. Biblical texts are cited by book, chapter, and verse. Historical authors are cited by work and section wherever possible. A learner preparing a formal commentary should verify each passage against the edition actually being used and record any variant. These references are not a claim that every historical-linguistic question can be settled by the listed school grammars and dictionary interfaces.
