are quite undiscoverable, and, in general, the phenomena are of comparatively slight interest except to special students of the arcana of philology. No vowel has been marked long unless the evidence seemed practically decisive.

The editors have been fortunate in securing the advice and assistance of Professor E. S. Sheldon, of Harvard University, for the first ten pages, dealing with phonetics and phonology. They are equally indebted to Professor E. P. Morris, of Yale University, who has had the kindness to revise the notes on historical and comparative syntax. Particular acknowledgment is also due to Mr. M. Grant Daniell, who has coöperated in the revision throughout, and whose accurate scholarship and long experience as a teacher have been of the greatest service at every point.

SEPTEMBER 1, 1903.

	mȳthos, M. *fable*	**Athōs**, M. *Athos*	**Dēlos**, F. *Delos*	**Īlion**, N. *Ilium*

a. Many names in -**ēs** belonging to the third declension have also a genitive in -**ī**: as, **Thūcȳdidēs, Thūcȳdidī** (compare § 44. *b*).

b. Several names in -**er** have also a nominative in -**us**: as, **Teucer** or **Teucrus**. The name **Panthūs** has the vocative **Panthū** (§ 81. 3).

c. The genitive plural of certain titles of books takes the Greek termination -**ōn**: as, **Geōrgicōn**, *of the Georgics*.

d. The termination -**oe** (for Greek -*οι*) is sometimes found in the nominative plural: as, **Adelphoe**, *the Adelphi* (a play of Terence).

e. Greek names in -**eus** (like **Orpheus**) have forms of the second and third declensions (see § 82).

THIRD DECLENSION (CONSONANT AND *i*-STEMS)

53. Nouns of the Third Declension end in **a, e, ī, ō, y, c, l, n, r, s, t, x.**

54. Stems of the Third Declension are classed as follows: —

I. Consonant Stems { *a.* Mute stems. *b.* Liquid and Nasal stems.

II. I-Stems { *a.* Pure i-stems. *b.* Mixed i-stems.

55. The Nominative is always derived from the stem.

The variety in form in the Nominative is due to simple modifications of the stem, of which the most important are —

1. Combination of final consonants: as of **c** (or g) and **s** to form **x**; **dux, ducis**, stem **duc-**; **rēx, rēgis**, stem **rēg-**.

2. Omission of a final consonant: as of a final nasal; **leō, leōnis**, stem **leōn-**; **ōrātiō, ōrātiōnis**, stem **ōrātiōn-**.

3. Omission of a final vowel: as of final **i**; **calcar, calcāris**, stem **calcāri-**.

4. Change of vowel in the final syllable: as of **a** to **e**; **prīnceps** (for **-caps**), **prīncipis**, stem **prīncip-** (for **-cap-**).

Consonant Stems

Mute Stems

56. Masculine and Feminine Nouns with mute stems form the Nominative by adding **s** to the stem.

A labial (**p**) is retained before **s**: as, **prīncep-s**.
A lingual (**t, d**) is dropped before **s**: as, **mīles** (stem **mīlit-**), **cūstōs** (stem **cūstōd-**).
A palatal (**c, g**) unites with **s** to form **x**: as, **dux** (for †**duc-s**), **rēx** (for †**rēg-s**).

a. In dissyllabic stems the final syllable often shows **e** in the nominative and **i** in the stem: as, **prīnceps**, stem **prīncip-** (for **-cap-**).

57. Nouns of this class are declined as follows:—

prīnceps, C., *chief*	**rādīx**, F., *root*	**mīles**, M., *soldier*

a. In like manner are declined —

ariēs, **-etis** (M.), *ram*; **comes**, **-itis** (C.), *companion*; **lapis**, **-idis** (M.), *stone*; **iūdex**, **-icis** (M.), *judge*; **cornīx**, **-īcis** (F.), *raven*, and many other nouns.

58. Most mute stems are Masculine or Feminine. Those that are neuter have for the Nominative the simple stem. But, —

a. Lingual Stems (**t**, **d**) ending in two consonants drop the final mute: as, **cor** (stem **cord-**), **lac** (stem **lact-**). So also stems in **ăt-** from the Greek: as, **poēma** (stem **poēmat-**).

b. The stem **capit-** shows **u** in the nominative (**caput** for †**capot**).

59. Nouns of this class are declined as follows: —

	cor, N., *heart*	**caput**, N., *head*	**poēma**, N., *poem*

60. The following irregularities require notice: —

a. Greek neuters with nominative singular in **-a** (as **poēma**) frequently end in **-īs** in the dative and ablative plural, and rarely in **-ōrum** in the genitive plural; as, **poēmatīs** (for **poēmatibus**), **poēmatōrum** (for **poēmatum**).

b. A number of monosyllabic nouns with mute stems want the genitive plural (like **cor**). See § 103. *g*. 2.

Liquid and Nasal Stems (*l*, *n*, *r*)

61. In Masculine and Feminine nouns with liquid and nasal stems the Nominative is the same as the stem.

Exceptions are the following: —

1. Stems in **ōn-** drop **n** in the nominative: as in **legiō**, stem **legiōn-**.

2. Stems in **din-** and **gin-** drop **n** and keep an original **ō** in the nominative: as in **virgō**, stem **virgin-**.[1]

3. Stems in **in-** (not **din-** or **gin-**) retain **n** and have **e** instead of **i** in the nominative: as in **cornicen**, stem **cornicin-**.[1]

4. Stems in **tr-** have **-ter** in the nominative: as, **pater**, stem **patr-**.[2]

62. Nouns of this class are declined as follows: —

cōnsul, M., *consul*	**leō**, M., *lion*	**virgō**, F., *maiden*	**pater**, M., *father*

NOTE 1. — Stems in **ll-**, **rr-** (N.) lose one of their liquids in the nominative: as, **far**, **farris**; **mel**, **mellis**.

NOTE 2. — A few masculine and feminine stems have a nominative in **-s** as well as in **-r**: as, **honōs** or **honor**, **arbōs** or **arbor**.

NOTE 3. — **Canis**, *dog*, and **iuvenis**, *youth*, have **-is** in the nominative.

[1] These differences depend in part upon special phonetic laws, in accordance with which vowels in weakly accented or unaccented syllables are variously modified, and in part upon the influence of analogy.

[2] These, no doubt, had originally **ter-** in the stem, but this had become weakened to **tr-** in some of the cases even in the parent speech. In Latin only the nominative and vocative singular show the **e**. But cf. **Māspitris** and **Māspiteris** (**Mā[r]s-piter**), quoted by Priscian as old forms.
